**CHRONOMETRIC**, kron-o-met'rik, } *a.* Relat-  
**CHRONOMETRICAL**, kron-o-met're-kal, } ing to or measured by a chronometer.

**CHRYALIS**, kris'a-lis, *s.* (*chryso*, gold, Gr. from the colour of some of the kinds.) The second stage of a metabolan or changeable insect, during which it is transformed from the caterpillar or grub state to the perfect winged insect. In this stage the animal is inactive, takes no food, and is enclosed in a transparent covering which has often a metallic lustre.

**CHRSYAMMIC ACID**, kris-sam'mik as'id, *s.* (*chryso*, gold, Gr.) An acid forming a fine golden-yellow powder, obtained by the action of nitric acid on aloes. With ammonia it forms chrysammate of ammonia, consisting of black adamantine

crystals; and with potash, a beautiful car powder, called the chrysammate of potash.  
**CHRYSAOR**, kris'ay-or, *s.* (*chryso*, gold, sword or weapon, Gr.) A name given by Montfort to a genus of *Belemnites*.

**CHRYSAORA**, kris-a'o-ra, *s.* A genus of Family, *Milliporidae*.

**CHRSYDIDES**, kris'e-des, } *s.* (*chrysis*, or  
**CHRSYDIDÆ**, kris-e-di'e, } genera.)

A genus of Hymenopterous insects, distinguished by others of that order by being furnished with tubuliferous ovipositor. They are all and coloured with the richest metallic hues.

**CHRSYSITERA**, kre-sip'te-ra, *s.* (*chryso*, a pteron, a wing, Gr.) A genus of ovifishes with large pectoral fins: Family, *Chrsysitidae*.

**CHRSYSIS**, kris'is, *s.* (*chryso*, gold, Gr.) brilliant colour, which may challenge a comparison with that of the humming-birds.) The *Wasp*, a genus of Hymenopterous insects of this genus may often be seen about in a continued state of agitation and fences, exposed to the heat of a burn. They deposit their eggs in the nests of the *Mason-bees*, or in those of other Hymenopterous insects. Their larvae devour those of the other.

**CHRSYBALANACEÆ**, kris-o-bal'a-na'se-æ, } *s.* (*chryso*, gold, and  
*solalanus*, one of the genera.) A natural plants, classed by Lindley in his *Rosales*, and placed between *Calycanthaceæ* and *Rosaceæ*. It consists of trees or shrubs, the leaves are simple, alternate, stipulate, without and having veins that run parallel to each from the mid-rib to the margin; flowers: calyx tubular or apetalous, in racemes, punctate, regular, or nearly so; carpel solitary, a style proceeding from its base; petals none; stamens definite or none; ovary one or two-celled; fruit a drupe.

**CHRSYBALANUS**, kris-o-bal'a-nus, *s.* A gold, and *balanus*, an acorn, Gr. in reference to the yellow fruit of some of the species.) A genus of trees, with simple leaves, and racemes of insignificant flowers: Order, *Chrsybalanaceæ*.

**CHRSYBERYL**, kris'o-ber-il, *s.* (*chryso*, rich, and *beryllos*, beryl, Gr.) *Prasmatum*, a precious green-coloured mineral fossilized, and in rolled fragments, in the deposits of rivers. It consists, according to analysis, of alumina, 71.5; lime, 6; oxide of iron, 1.5. Dr. Thomson's analysis indicate 15 to 18 per cent. of lime, and only an occasional quantity of iron.

**CHRSYCHLOUS**, kris-o-klo'rus, *s.* (*chryso*, and *chloros*, green, Gr.) A genus of green coloured Dipterous insects, the larvae of which live in cow dung: Family, *Notædridæ*.

**CHRSYCOL**, kris'o-kol, *s.* (*chrysokolla*, old designation of the sub-borate of soda, being used as a solder for gold.)

**CHRSYCOLLA**, kris'o-kol-la, *s.* (*chryso*, gold, and *kolla*, gluten, Gr. in allusion to the possessing the natural joints by transmitting a variety of Malachite or copper ore, the green of Jamieson. It consists of oxide of iron, 50.0; silica, 26.0; carbonic acid, 0 to 17 to 20.

**CHRSYDODOMUS**, kris-od'de-mus, *s.* (*chryso*, gold, and *dome*, an edifice, Gr.) A genus of

## CHRYSOGASTER—CHRYSOPRASE.

## CHRYSOPS—CHUFF.

the shells of which are distinguished from those of the genus *Fusus*, in which it is included by Lamarck, by the comparative shortness of the basal channel, and the ventricose shape of the body-wheel. They are large and beautiful shells of an orange colour: Family, Turbellinidae.

**CHRYSOGASTER**, kris-o-gas'tur, *s.* (*chryso*, gold, and *aster*, the belly, Gr.) A genus of Dipterous insects: Tribe, Syrphidae.

**CHRYSOLEPTIC ACID**, kris-o-lep'tik as'sid, *s.* (*chryso*, gold, and *lepis*, a scale, Gr.) An acid obtained in beautiful golden-yellow scales from the mother liquid and washings of chrysammic acid. Its compounds are—*chrysolepate of potash*, in long shining needles, having a violet metallic lustre by reflected light; *chrysolepate of silver*, in brownish-red needles; *chrysolepate of soda*, in long green needles, with a metallic lustre.

**CHRYSOHITE**, kris'o-lite, *s.* (*chryso*, valuable, and *lithos*, a stone, Gr.) A precious mineral, the Peridot of Hany. It occurs in angular or somewhat rounded crystalline masses, and in prismatic crystals variously terminated: it consists of magnesia, 43.5; silica, 39.0; oxide of iron, 12.0 to 20.0: sp. gr. 3.5.

**CHRYSOLOCHUS**, kris-sol'o-fus, *s.* (*chryso*, gold, and *lykos*, a wolf, Gr.) The Walking Tyrant, a genus of birds belonging to the Tyrant Siskies, natives of Brazil: Family, Laniidae.

**CHRYSOLOPHUS**, kris-sol'o-pus, *s.* (*chryso*, gold, and *lypos*, a thin skin or peel, Gr.) A genus of Coleopterous insects: Family, Rynchophora.

**CHRYSOPELA**, kris-som'e-la, *s.* (*chryso*, gold, and *pala*, a limb, Gr.) A genus of Coleopterous insects: Tribe, Chrysomelinae.

**CHRYSOPELIDE**, kris-o-mel'e-de, } *s.* (*chrysomela*,  
**CHRYSOPELIS**, kris-o-mel'e-ne, } one of the genera.) A family of Coleopterous insects, having convex bodies; four-jointed tarsi; antennae not clavate; and their larvae, at least those of the type naked. They live on the leaves of plants, of which they leave nothing but the fibrous skeleton.

**CHRYSONOTUS**, kris-o-no'tus, *s.* (*chryso*, gold, and *notos*, the back, Gr.) A genus of birds belonging to the Picidae, or Woodpeckers, natives of India.

**CHRYSOPTERUS**, kris-sol'o-ter, *s.* (*chrysophoros*, wearing gold, Gr.) A genus of exceedingly beautiful green and green-coloured Coleopterous insects: Family, Lamellicornes.

**CHRYSOPTERUS**, kris-sof'ria, *s.* (*chryso*, gold, and *optera*, the brow, Gr.) A genus of fishes, with ovate broad bodies attenuated at each end. Family, Chaetodontidae.

**CHRYSOPTERYLUM**, kris-o-fil'tum, *s.* (*chryso*, gold, and *pteron*, a leaf, Gr. the leaves of most of the species having yellow silky down on the under surface.) The Star Apple, a genus of tropical South American or West Indian lustrous trees, often cultivated in hothouses for their beautiful golden-coloured downy foliage: Order, Sapotaceae.

**CHRYSOPIA**, kris-so'pe-a, *s.* (*chryso*, gold, and *opsis*, juice, from the trees yielding yellow juice when cut, Gr.) A genus of beautiful trees, natives of Madagascar.

**CHRYSOPRASE**, kris'o-prase, *s.* (*chryso*, Gr. and *prase*, a green variety of quartz.) An apple-green variety of Chalcedony. It consists, according to Klaproth, of silica 96.16, oxide of nickel 1.0, and minute portions of lime, magnesia, alumina,

and oxide of iron. It is much prized by jewellers, and is usually cut in a convex form.

**CHRYSOPS**, kris'ops, *s.* (*chryso*, gold, and *ops*, the eye, Gr.) A genus of Dipterous insects: Family, Tabanidae.

**CHRYSOPTERYX**, kris-sop'te-rika, *s.* (*chryso*, gold, and *pteryx*, a wing, Gr.) A genus of birds belonging to the Ampelidae, Fruit-eaters, or Chat-terers: Subfamily, Ampelinae, or Typical Chatterers.

**CHRYSOPTILUS**, kris-sop'te-lus, *s.* (*chryso*, gold, and *ptilon*, a wing or plume, Gr.) A genus of birds belonging to the Picidae, or Woodpeckers, natives of tropical America: Subfamily, Picinae.

**CHRYOSPLENIUM**, kris-o-sple-ne-um, *s.* (*chryso*, gold, and *splene*, the spleen, Gr. in reference to the golden colour of the flowers, and its supposed virtues in curing diseases of the spleen.) Golden Saxifrage, a genus of perennial herbs. *C. alternifolium* and *C. oppositifolium* are British species: Order, Saxifragaceae.

**CHRYSOSTACHYS**, kris-sa'ta-kis, *s.* (*chryso*, gold, and *stachys*, a spike, Gr. in reference to its dense heads of golden-coloured flowers.) A climbing Brazilian shrub: Order, Combretaceae.

**CHRYSTOMA**, kris-sos'to-ma, *s.* (*chryso*, gold, and *stoma*, a mouth, Gr.) A genus of Mollusca: the shells of which are turbinate; the whorls few and convex; aperture round; inner lip thickened and almost concealing the umbilicus: Family, Trochidae.

**CHRYSTIS**, kris-so'tis, *s.* (*chryso*, and *os*, the ear, Gr. in reference to the yellow colour on the ears and face.) A genus of Parrots, natives of America.

**CHRYSTOXUM**, kris-o-tok's-um, *s.* (*chryso*, gold, and *toxos*, an arrow or shaft, Gr.) A genus of Dipterous insects: Family, Athericera.

**CHRYSTUS**, kris-so'tus, *s.* (*chryso*, gold, and *otos*, an ear, Gr.) A genus of Dipterous insects: Family, Tanytoma.

**CHUR**.—See Leuciscus.

**CHUBBED**, tshubd, } *a.* Like a chub; plump, short.

**CHUBBY**, tshub'be, } and thick.

**CHUBFAKE**, tshub'faste, *a.* Having a plump, fat face.

**CHUCK**, tshuk, *v. n.* To make a noise like a hen when she calls her chickens;—*v. a.* to call as a hen calls her chickens; to jeer; to laugh; to give a gentle blow under the chin;

**CIBARIUS**, se-ba're-us, *a.* (*cibarius*, Lat.) relating to food; useful for food; edible.

**CIBOL**, sib'bol, *s.* (*ciboule*, Fr.) A sort of onion.

**CIBORIUM**, se-bo're-um, *s.* (Latin.) An erection open on each side with arches, and a dome of an ogee form carried or supported

## CICADA—CICINDELA

## CICINDELETE—CILIA

**cicada.** It is also the coffer or case in which the host is deposited.

**CICADA,** se-ha'da, *s.* (*cicada*, a grasshopper, Lat.)

The Grasshoppers, a genus of Hemipterous insects, celebrated for their shrill chirp or song. The *cicada* are divided into two leading sections, the Cicadidae, or singing cicadas, and the Cercopidae, or leaping cicadas.

**CICADILLE,** sik-a-da'te-e, } *s.* (*cicada*, one of the

**CICADILLE,** sik-a-de-de, } genera.) The Sing-

ing Grasshoppers, a family of leaping Hemipterous insects, remarkable for their musical chirp. There is only one species in Britain, *C. Anglica*, but, in the south of Europe, in India and Africa, they are most abundant, are much larger, and louder in their song.

**CICADILLA,** sik-a-dell'a, *s.* A genus of Hemipterous insects: Family, Cicadidae.

**CICATRICE,** sik'a-tris, } *s.* (*cicatrix*, Lat. and Fr.

**CICATRICE,** sik'a-trika, } *cicatrice*, Ital.) The scar

remaining after a wound. In Conchology, the deep impression on the inside of valves to which the muscles of the animal have been attached.

**CICATRICLE,** sik'a-trik-kl, *s.* (*cicatricula*, Lat.) The germinating or fetal point in the embryo of a seed, or the yolk of an egg.

**CICATRICOSE,** sik'a-tri-koze, } *a.* Full of scars.

**CICATRICE,** sik'a-trize, } *a.* Full of scars.

**CICATRIMENT,** sik-a-tris'ment, *s.* An application which induces a cicatrice.

**CICATRIMENT,** sik-a-tris-iv, *a.* Proper to induce a cicatrice.

**CICATRIZER,** sik'a-trize, *v. a.* To heal a wound by causing a skin; to apply healing medicines to a wound or ulcer.

**CICUS,** sik'kus, *s.* A genus of Hemipterous insects: Family, Cicadidae.

**CICUT,** sik'le, *s.* The common name of the Umbelliferous plants of the genus *Chaerophyllum*.

**CICK,** s'kur, *s.* (*Chick*, force or strength, Gr. from its native qualities.) The Chick-pea, a genus of leguminous plants: Tribe, Vicieae.

**CICCONI,** tshé-tshé-ro'ne, *s.* (Italian.) A guide; one who explains curiosities.

**CICCONIAN,** shé-se-ro'ne-an, *a.* Having a flowing, pure, and elegant style.

**CICCONIANISM,** shé-se-ro'ne-an-izm, *s.* Imitation of the style of Cicero.

**CICLASONA,** sik-in-so'ma, *s.* (*cyclea*, a genus of fish of the same family, and *soma*, a body, Gr.)

A genus of fishes with oval bodies, the caudal and the large pectoral fins rounded; ventrals long and pointed, dorsal and anal long and attenuated behind: Family, Chaetodonidae.

**CICORICLE,** si-ko-ri-se-e, *s.* A tribe of Composite plants, distinguished by their corollas being slit or ligulate, constituting Lindley's suborder *ligulate*.

**CICORACEOUS,** si-ko-ra'shus, *a.* Having the properties of succory.—See *Cichorium*.

**CICORICUM,** si-ko-re-um, *s.* (*cichoric*, Fr.) Succory, a genus of Composite plants, of which *C. intybus*, or wild succory, is the only British species. *C. radix*, the Endive, is an extremely wholesome salad, possessing bitter and anodyne qualities.

**CICOGA,** shé-ha, *s.* A genus of the Lacertidae, or long-tongued lizards: Order, Saurae.

**CICINDELA,** se-sin'de-la, *s.* (*cicindela*, a glow-worm, Lat.) A genus of Coleopterous insects of predatory habits, and remarkable for the beauty of their

colours. This Linnean genus is now divided into twenty subgenera, of which only one is British, and to this the term *cicindela* is restricted.

**CICINDELETE,** se-sin'de-le-te, *s.* (*cicindela*, one of the genera.) A tribe of Coleopterous insects, belonging to the family Carnivora.

**CICINURUS,** sis-e-no'rus, *s.* (*kikinos*, a curled lock of hair, and *oura*, a tail, Gr. in reference to the form of the tail.) A genus of the Paradisidae, or Birds of Paradise, in which the hypochondrical feathers are broad and compact, with truncated ends.

**CICISBEISM,** tshé-tshiz'be-izm, *s.* (from *cicisbeo*.) The conduct of a *cicisbeo*; the practice of dangling about married ladies.

**CICISBEO,** tshé-tshiz'be-o, *s.* (Italian.) A term applied to a person in Italy who attends on a married lady with all the respect and devotion of a lover. The word is synonymous with *cavalier servente*.

**CICONIA,** si-ko'ne-a, *s.* (Latin.) The Storks, a genus of wading-birds, the largest of the Heron family, measuring, when standing erect, nearly six feet; they are social and useful birds, and, from their destroying vast numbers of reptiles and other vermin, are encouraged in many countries to build near the habitations of men.

**CICURATE,** sik'u-rate, *v. a.* (*cicuro*, Lat.) To tame; to reclaim from wildness; to make tractable.

**CICURATION,** sik-u-ra'shun, *s.* The act of taming or reclaiming from wildness.

**CICUTA,** se-ku'ta, *s.* (A word used by Pliny, but of doubtful meaning.) The Cowbane, or Water-hemlock, a genus of umbelliferous plants with white flowers and reddish anthers, one of the rankest of our deadly poisons.

**CID,** sid, *s.* (French.) An Arabian chief; a commander.

**CIDARIS,** sid'a-ria, *s.* (Latin, a turban or mitre.)

The name given to the mitre of the Jewish high-priest; a genus of Echini, made up of polygonal plates, and having the surface divided vertically by bands, with rows of double perforations studded over with papillae, to which movable spines are attached; the mouth beneath, central, and supplied with teeth; the vent above, and vertical; also, a genus of the Senectinae, or Snake-shells; pearly-shells; turbinate; generally smooth; the base not produced; aperture round, but oblique.

**CIDER,** si'dur, *s.* (Saxon, *cidre*, Fr.) A fermented liquor made from the expressed juice of apples; the term formerly denoted all kinds of strong liquors, except wine.

He schal not drinke wyn ne *cyder*.—*Wicliffe*.

**CIDERIST,** si'dur-ist, *s.* A maker of cider.

**CIDERKIN,** si'dur-kin, *s.* An inferior kind of cider, made from the gross matter of apples after the cider is pressed out.

**CIELING.**—See *Ceiling*.

**CIERGE,** seerj, *s.* (French.) A candle carried in processions.

**CIGAR,** se-gar', *s.* (*cigarro*, Span.) Tobacco leaves rolled into a tubular form, used for smoking.

**CILIA,** sil'o a, *s.* (*cilium*, an eyelash, Lat.) The hairs which grow on the margin of the eyelids: the term is likewise applied to the hairlike filaments which project from animal membranes, and are endowed with quick vibratile motion, as in the infusoria, polypi, and sponges. It is also used in Botany for the long hairs situated on the margin of leaves, &c.

## CILIARY—CINCHONACEÆ.

## CINCHONINE—CINNABAR.

**CILIARY**, sil'e-a-re, *a.* Belonging to the eyelashes.

In Anatomy, applied to the several parts connected with the eyelashes, as the *ciliary ligament*, which is the circular portion dividing the choroid membrane from the iris, and adhering to the sclerotic coat; and the *ciliary processes*, white folds at the margin of the uvea in the eye, and proceeding from it to the crystalline lens.

**CILIATED**, sil'e-ay-ted, *a.* Furnished with cilia, or fine hairs, like those of the eyelash.

**CILICÆA**, sil'e-se'a, *s.* A genus of Crustaceans: Order, Isopoda.

**CILICIOUS**, sil-ish'us, *a.* Made of hair.

**CILIOGRADA**, sil'e-o-gra'da, *s.* (*cilium*, an eyelash, and *gradior*, I proceed by steps, Lat.) A tribe of the Aculephans, or Sea-nettles, comprehending such species as swim by means of cilia.

**CILLOSI**, sil-lo'sis, *s.* (*cilium*, the eyelid, Lat.) A spasmodic trembling of the eyelid.

**CIMELIARCH**, sim-e-le-ark, *s.* (from *keimeliarches*, Gr.) The chief keeper of plate, vestments, and things of value belonging to a church; also, the name given to the apartment in a church where articles of value are deposited.

**CIMEX**, si'miks, *s.* (*cimex*, a bug, Lat.) A Linnæan genus of Hemipterous insects, now subdivided into eight families, each including several genera and many species, all of which have the mouth consisting of one lengthened proboscis, with bristle-like processes employed in wounding the vegetable and animal substances, on the juices of which they feed. The common Bed-bug, *Cimex lectularius*, is the type of the extensive tribe Cimicidæ.

**CIMICIDÆ**, se-mis'e-dee, *s.* (*cimex*, one of the genera, Lat.) A tribe of Hemipterous insects, of which Cimex is the type.—Which see.

**CIMICIFUGA**, se-me-sif-u-ga, *s.* (*cimex*, a bug, and *fugo*, I drive away, Lat. in reference to certain virtues the plants possess, particularly *C. firtida*.) A genus of perennial herbs with racemes of whitish flowers, and drastic poisonous roots: Order, Ranunculaceæ.

**CIMITER**.—See Scimitar.

**CIMMERIAN**, sin-me're-an, *a.* Relating to the Cimmerii, a people on the western coast of Italy; extremely dark.

Hence, bathed melancholy,  
In dark cimmerian desert ever dwell.—Milton.

**CIMOLITE**, sin'o-lite, *s.* (island of Cimolo, now Agenteria, situated near Milo.) A light grey silicate of alumina, occurring sometimes massive, or of a slaty texture. It is dull, opaque, and has an earthy fracture. It consists of silica, 63.00; alumina, 23; oxide of iron, 1.25; water, 12.

**CINARA**.—See Cynara.

**CINARIA**, sin-a're-a, *s.* (*cinerea*, ashes, Lat. in reference to the fine soft white down which clothes the lower and often the upper surface of the leaves.) A genus of Composite plants: Tribe, Senecioneæ.

**CINCHONA**, sin-ko'na, *s.* (said to be in honour of the Countess de Chinchon, vice queen of Peru, who was cured of a fever in 1638 by this remedy.) The celebrated genus of plants which yields the valuable medicine Peruvian bark, and its extract quinine: classed under the order Rubiaceæ, but by Lindley made to form the type of his order Cinchonaceæ, in which Rubiaceæ is included.

**CINCHONACEÆ**, sin-ko-na'ee-e, *s.* (*cinchona*, one of the genera.) The Rubiaceæ of Jussieu and

other botanists, a natural order of plants consisting of trees, shrubs, and herbs, with long stamens, straight anthers, bursting distally, and leaves with interpetiolar calyx adherent; corolla superior and stamens arising from the corolla, all on line and alternate with its segments. It is nearly allied to the Compositæ, but distinguished by its distinct anthers, bilocular ovary, abundant albumen, small and stipules.

**CINCHONINE**, sin'ko-nine, *s.* A substance tating the salifiable base or alkali of Cinchona conclaminaæ.

**CINCLIDOTUS**, sin-kle-do'tus, *s.* (*highlilota*, Gr. from the netted manner in which the peristome are united in parcels.) A moss plants found floating in streams: Eraginulati.

**CINCLUS**, sin'klus, *s.* A genus of the Myr or Ant-thruses: Family, Merulidæ.

**CINCTURE**, singk'ture, *s.* (*cinctura*, Lat.) a girdle; a band; something worn on body; an enclosure. In Architecture, a list, or fillet at the top and bottom of a separating the shaft from its capital or base.

**CINDER**, sin'dur, *s.* (*cinder*, Sax. *cendre*, Fr. residue of coal after combustion; a hot has ceased to flame.

which is obtained from it in a metallic state by distillation. Vermilion is pure cinnabar, being a compound of mercury and sulphur, in nearly the same proportion, viz.: mercury, 84.50; sulphur, 15.5: sp. gr. 6.7 to 8.2.

**CINAMATE**, sin'-na-mate, *s.* A compound formed by the union of cinnamic acid and a metallic oxide.

**CINAMON**, sin'-a-mun, *s.* The bark of the Cinnamon Zeylandica.—See Cinnamonum.

**CINAMON-STONE**, sin'-na-mun-stone, *s.* (from its colour resembling that of cinnamon.) A mineral of a red colour, with an occasional orange-yellow tinge, found in Ceylon, Sweden, and Brazil. It occurs commonly in masses, full of fissures, and is composed of silica, 40; alumina, 22.99; lime, 0.57; oxide of iron, 3.66, with minute portions of potash and magnesia.

**CINAMONUM**, sin'-na-mo'-num, *s.* (*china*, and *amomum*, a genus of plants.) A genus of plants, two species of which yield the highly aromatic bark cinnamon, brought from the hollow parts of Asia: Order, Lauraceæ.

**CINAMULE**, sin'-na-mule, *s.* The hypothetical base of cinnamon and of cinnamic acid, =  $C_{18}H_{14}O_2$ . Cinnamic acid, an acid formed in hard translucent prisms, when oil of cinnamon is long exposed to the action of the atmosphere, =  $C_{18}H_{12}O_4$ : Symb.  $C_{18}O$ .

**CINNYLIDÆ**, sin'-bir'e-de, *s.* (*cinnyrus*, one of the gods.) The Sun-birds, a family of birds, some of which have remarkably brilliant plumage. The family is placed by Swainson between the Meliphagidæ, or Honey-suckers, and the Trochilidæ, or Humming-birds.

**CINNYRIS**, sin'-ne-ris, *s.* The Sun-bird, a genus of birds: Type of the family Cinnyridæ.

**CINQUE**, singk, *s.* (French.) The number five; a term used in certain games.

**CINQUEFOIL**, singk'foyl, *s.* In Botany, the common name of plants of the genus *Potentilla*. In Architecture, a five-leaved ornament, in circular and other divisions of the windows of ancient churches, and also on panels. It is a rosette of five equal leaves; when in circles, the leaves not formed by the solid parts, but by the open spaces; there is also an open space in the middle.

**CINQUEPACE**, singk'pase, *s.* (*cinqus*, and *pas*, a step, Fr.) A kind of slow dance.

**CINQUE PORTS**, singk'portse, *s.* Five havens that lie on the east part of England, towards France, which have a particular policy, and are governed by a lawyer, with the title of the Lord-warden of the Cinque Ports, which office belongs to the constable of Dover; and their representatives are called Barons of the Cinque Ports. These five ports are, Dover, Hastings, Romney, Hythe, and Sandwich; to which Wincheles and Rye have been added.

**CIRCAETUS**, ser-ka'e-tus, *s.* (*kirkos*, Greek name for a falcon that moves round in a circle.) A genus of the Aquiline, or Eagles: Family, Falconidæ.

**CIRCASSIAN**, ser-kas'she-an, *s.* A native of Circassia;—*a.* pertaining to Circassia, a country situated on the northern declivity of Mount Caucasus.

**CIRCENSIAN**, ser-sen'she-an, *a.* (*circenses*, Lat.) Relating to the exhibitions in the Roman amphitheatres.

**CIRCIAN**, ser'she-an, *a.* Pertaining to Circe, the daughter of Sol and Perseus, who was supposed to have great knowledge of magic and venomous herbs, by means of which she was able to fascinate and work her incantations.

**CIRCILLIUM**, ser-sil'le-um, *s.* A genus of Coleopterous insects: Family, Lamellicornes.

**CIRCINAL**, ser'se-nal, *a.* (*kirkos*, a circle, Gr.) In Botany, applied when the leaves of plants are rolled up in a spiral manner downwards, the tip being in the centre.

**CIRCINATE**, ser'se-nate, *v. n.* To make a circle; to compass.

**CIRCINATION**, ser-se-na'shun, *s.* An orbicular motion; a turn round.

**CIRCINUS**, ser'sin-us, *s.* (Latin.) In Astronomy, the Compasses, a constellation near the south pole.

**CIRCLE**, ser'kl, *s.* (*circol*, Sax. *circulus*, Lat. *cerce*, Fr.) In Geometry, a plane figure comprehended by a single curve line, called its circumference, having all its parts equally distant from a common centre; the space included in a circular line; a round body; an orb; compass; enclosure; an assembly; a surrounding company; a series ending as it begins, and perpetually repeated; circumlocution; indirect form of words; an inconclusive form of argument, in which the foregoing proposition is proved by the following, and the following proposition is inferred from the foregoing;—*v. n.* to move round anything; to enclose; to surround; to circle in, to confine; to keep together;—*v. n.* to move circularly.

**CIRCLE**, *Horary*, on the globe, a brazen circle fixed to the north pole, and furnished with an index,

## CIRCLE—CIRCLING.

showing the difference of meridians, and serving for the solution of many problems. On globes of late structure, this circle is often placed on the equator, and the index is made to slide on a brass wire running parallel to the equator, and above it. In Dialing, *horary circles* are the lines which show the hours on dials, though these be not drawn circular, but nearly straight.

**CIRCLE of Illumination**, a circle passing through the centre of the earth or moon, perpendicular to a line drawn from the sun to the respective body. This is supposed to separate the illuminated part of the globe from the darkened part, which it does very nearly.

**CIRCLE of Perpetual Apparition**, one of the less circles parallel to the equator, described by any point of the sphere touching the northern point of the horizon, and carried about with the diurnal motion. All the stars included within this circle never set, but are ever visible above the horizon.

**CIRCLE of Perpetual Occultation** is another circle at a like distance from the equator, and contains all those stars which never appear in our hemisphere. The stars situated between these circles alternately rise and set at certain times.

**CIRCLES of Declination** are great circles intersecting each other in the poles of the world.

**CIRCLES, Diurnal**, are parallels to the equinoctial, supposed to be described by the stars, and other points of the heavens, in their apparent diurnal rotation about the earth.

**CIRCLES, Druidical**, a name given to certain ancient enclosures, formed by rude stones circularly arranged. These, it is supposed, were temples, or places for solemn assemblies, for councils, or seats of judgment.

**CIRCLES of Excursion** are circles parallel to the ecliptic, and at such a distance from it, as that the excursions of the planets towards the poles of the ecliptic may be included within them; usually fixed at ten degrees.

**CIRCLES of Latitude, or Secondaries of the Ecliptic**, are great circles perpendicular to the plane of the ecliptic, passing through the poles thereof, and through every star and planet. They are so called, because they serve to measure the latitude of the stars, which is nothing but an arch of one of these circles intercepted between the star and the ecliptic.

**CIRCLES of Longitude** are several less circles parallel to the ecliptic, still diminishing in proportion as they recede from it. On the arches of these circles the longitude of the stars is reckoned.

**CIRCLES, Polar**, are immoveable circles, parallel to the equator, and at a distance from the poles equal to the greatest declination of the ecliptic.

**CIRCLES of the Sphere**, such as cut the mundane sphere, and have their circumference in its surface. They are either moveable or fixed.

**CIRCLED**, ser'kld, *a.* Having the form of a circle; round.

**CIRCLER**, ser'kler, *s.* A mean commonplace poet.—Obsolete.

Nor so begin as did that circler late,  
I sing a noble war, and Priam's fate.—

Ben Jonson.

**CIRCLET**, ser'klit, *s.* A little circle or orb.

Certain ladies or courtesans, with plain circlets of gold without flowers.—Shaks.

**CIRCLING**, ser'kling, *a. part.* Having the form of a circle; circular; round.

## CIRCUIT—CIRCULATORIA

**CIRCUIT**, ser'kit, *s.* (French.) The round anything; the space enclosed by a ring; a diadem; that by which any thing is circled; the visitations of the judges in their circuits; the tract of country visited by a circuitor. *Circuit of action*, a longer course of proceedings than to recover anything sued for;—*v. n.* to move round; to travel round;—*v. a.* to move round; to travel round.

**CIRCUTION**, ser-ku-ish'un, *s.* (circum) act of going round; compass; movement.

**CIRCUITOR**, ser-ku'e-tus, *a.* Going round; not direct.

**CIRCUTORIALLY**, ser-ku'e-tus-le, *ad.* In a circuitous manner.

**CIRCUIT**, ser-ku'e-te, *s.* An indirect way.

**CIRCULABLE**, ser'ku-la-bl, *a.* That which can be circulated.

**CIRCULAR**, ser'ku-lar, *a.* Round like a circle; circumscribed by a circle; successive in returning; circumferential; ending. *Circular lines*, such straight lines as are drawn from the divisions made in the arc of a circle. *Circular letter*, a letter addressed to persons having a common interest in some parts, five parts of a right-angled or spherical triangle; they are the legs, the hypotenuse, and the two oblique angles. *Circularity*, the undulatory theory of light, a supposition of the particles of ether in motion when a pencil of plane polarized light passes through these media.

**CIRCULARITY**, ser-ku-lar'e-te, *s.* A circularity.

**CIRCULARLY**, ser'ku-lar-le, *a.* End in form of a circle.

**CIRCULATE**, ser'ku-late, *v. n.* To move round; to move from place to place; to be dispersed; to move from place to place; to move from place to place; to disseminate.

**CIRCULATING**, ser'ku-lay-ting, *a. part.* a circle; passing from hand to hand. *decimals*, decimals in which two or more are constantly repeated in the same medium, in Commerce, the exchanges, or of sale and purchase, gold, silver, paper, or any other article as representing the value of the article sold.

**CIRCULATION**, ser-ku-la-shun, *s.* Motion; a course in which the motion point from which it began; a series in the same order is always observed, and it returns to the same state; a reciprocity of meaning; currency; circulating library, applied to the function which is conveyed from the left ventricle through the systematic arteries, and right auricle, to the right ventricle thence through the pulmonary organs to the left auricle.

**CIRCULATORIOUS**, ser-ku-la-to're-us, *a.* in a circuit. Applied anciently to a person who went about from place to place peddling.—Obsolete.

## CIRCULATORY—CIRCUMFLUENT.

**CIRCULATORY**, ser-ku-lay-tur-e, *a.* Circular;—  
a chemical vessel.

**CIRCULUS**, ser-ku-lus, *a.* (Latin.) In Anatomy,  
any round or annular part of the body; as, *circulus oculi*, the orb of the eye.

**CIRCUMAMBIENCY**, ser-kum-am-be-en-se, *s.* (cir-  
cum, round about, and *ambio*, I encompass, Lat.)  
The act of encompassing or surrounding.

**CIRCUMAMBIENT**, ser-kum-am-be-ent, *a.* Encom-  
passing; surrounding; enclosing.

cum, and *ambulo*, I walk, Lat.) To pass round  
about.

**CIRCUMCELLIANE**, ser-kum-sel'le-ans, *s.* A sect of  
the Donatists, in Africa, in the fourth century,  
who rambled from one place to another, pretending  
to reform the public manners and redress griev-  
ances. They manumitted slaves without the con-  
sent of their masters, and forgave debts that were  
not their own. Through zeal for martyrdom,  
they frequently destroyed themselves in various  
ways.

**CIRCUMCISE**, ser-kum-size, *v. a.* (*circumcideo*, Lat.)  
To cut off the prepuce or foreskin.

**CIRCUMCISER**, ser-kum-si-zur, *s.* One who cir-  
cumcises.

**CIRCUMCISION**, ser-kum-sish'un, *s.* The act or rite  
of cutting off the prepuce or foreskin in males, and  
the *hida minora* in females; a rite practised not  
only by the Jews in ancient times, but by the  
Egyptians, Idumaeans, Ammonites, Moabites, and  
Ismaelites of the desert. The Jews practise cir-  
cumcision only on males; the Arabs, Egyptians,  
and Persians, on both sexes.

**CIRCUMCLOSION**, ser-kum-ku-shun, *s.* The act  
of enclosing all round.

**CIRCUMCULATION**, ser-kum-kur-za'shun, *s.* (cir-  
cum, and *curso*, I run, Lat.) The act of running  
up and down.

**CLOUD**, *kloud*, *s.* (derivation uncertain.) A mass of vesicular vapour floating at a considerable height in the atmosphere. The height of clouds varies to upwards of a mile, but is more frequently less than this. Clouds are classed by Mr. Luke Howard as follows: 1. The *Cirrus*, or Curl-cloud, resembling a lock of hair, or a feather. It consists of numerous hair-like stripes, parallel to each other, and often bent or curled. It is the thinnest of all the forms which the clouds assume, and, according to Dalton, rises to a height of from three to five miles above the level of the sea. Its varieties are the *Linear* and the *Reticulated cirrus*. The *Coma* cirrus, called by the country people of England 'the Mare's tail,' is, however, the true form of the cirrus. 2. The *Cumulus*, or Stacken-cloud, which increases from above in dense, convex, or conical heaps. 3. The *Stratus*, or Fall-cloud, is the name given to an extended continuous level sheet of cloud, increasing from beneath. It is composed of the fogs and mists, which, chiefly during night, cover the surface of the earth, in extensive sheets, and usually disappear with the advancing temperature of the day. 4. The *Cirro-stratus*, or Sonder-cloud, consists of well-defined and parallel masses of cloud, placed in close or distant contact, forming often extensive horizontal beds, when the component nucleoli are very close and round in their form, and closer in their position than usual, it is regarded as the forerunner of storms. 5. The *Cirro-stratus*, or Wane-cloud, often seen on fine summer evenings, consists of a slightly inclined sheet, attenuated at its upper concave downward, or undulated. The *Wane-stratus* seldom continues long in the same form, hence called the 'Wane-cloud,' from the verb 'to wane.' The *Cymoid cirro-stratus* is a variety of the cirro-stratus, which consists of small rows of little clouds, curved in a particular manner: it is a sure indication of stormy weather. 6. The *Cumulo-stratus*, or Twin-cloud, is a compound of the cumulus and the cirro-stratus, the cirro-stratus being rather intermingled with the cumulus, or rather extending its base so that, while the base is flat, and united like the cirro-stratus, the superstratum resembles large cumuli rising from the base in the form of detached mountains and rocks: it may be regarded as a stage towards the production of rain. 7. *Cumulo-cirro-stratus*, *Nimbus*, or

**COLOSSUS**, *kol'* (Latin.) A brass statue of Apollo, erected by Chares, a disciple of Lysippus, across the harbour of Rhodes, in honour of the sun. It was about 126 feet high, and esteemed one of the seven wonders of the world. It was overthrown by an earthquake; and so great was its bulk, that when the Saracens took Rhodes in 667, they loaded 900 camels with the brass it was made of, the value of which has been estimated at £36,000.

**COLOSTRUM**, *kol'* (Latin.) The first milk secreted by the female of mammiferous animals after parturition: that of the cow is called *beastings*: also, a mixture formed of turpentine with the yolk of an egg.

**COLOR**, *kol'* (Latin.) The appearance of bodies to the eye; tint; hue; dye; freshness; representation of anything superficially examined; concealment; palliation; excuse; pretence; false show; kind; species; character; plural, a standard; an ensign of war. In Natural Philosophy, it is that property in bodies, which, when acted upon by the rays of light, impresses us through the medium of vision, with those sensations which we denominate colour. Light, although apparently white or colourless, is capable of being separated into seven tints or hues, red, orange, yellow, green, blue, indigo, and violet, such as we naturally witness in the rainbow. These seven colours were designated by Newton *primitive colours*. It is now, however, determined that the primitive colours consist only of three—red, yellow, and blue, by the various combinations of which the other tints are produced; as may be easily proved by mixing red with yellow, thus producing orange; or yellow with blue, thus producing green. If a substance be so constituted that it absorbs none of the rays of light, it will appear white; but if it absorbs all the rays of light, it will appear black; and if it absorbs all the rays but one, it will appear of the colour of the ray which it rejects. *Accidental colours*, if we look with one eye intently upon any coloured spot, such as a piece of wax upon a sheet of white paper, and then turn the same eye to another part of the paper, a similar spot, but of a different colour, will be seen. *Adjective colours*, in Dyeing, such colours as will not unite with the material to be dyed without a mordant. *Prismatic colours*, the colours into which the rays of light are decomposed or refracted through a prism, known as

Newton's seven primitive colours. *Substantive colours*, in Dyeing, such colours as unite immediately with the material to be dyed without a mordant. In Heraldry, the colours are thus distinguished—red, *gules*; blue, *azure*; black, *sable*; green, *vert*; purple, *purpure*; yellow, *or*, (gold); white, *argent*, (silver);—*v. a.* to mark or cover with some hue or dye; to dye or tinge; to paint; to palliate; to excuse; to dress in specious colours, or fair appearances; to make plausible; to exaggerate;—*v. a.* to blush.

In the English Church, the imposition of hands upon those who have been baptized, and are come to years of discretion. 'I came out of the water,' says Tertullian, 'anointed with the holy christ; then imposition of hands, which calls down the Ghost.' This was termed *bebnotia*, and was practised in the baptism of adults, as well as of infants, which is still the Greek Church. The Protestants, at the Reformation, caused the rite to be discontinued, and afterwards the Council of Trent, in the seventh year. The rite is regarded by Protestant dissenters as a popish origin, and rejected as unchristian. In the Catholic Church, *confirmation* is one of the sacraments: it consists in the bishop laying his hand on the forehead of the person, saying, 'I confirm thee with the sign of the cross, and the chrism of salvation, in the name of the Father, and of the Son, and of the Holy Spirit.' The bishop then gives a slight blow on the cheek, and concludes with pronouncing the following words: *Pax tecum*, 'Peace be with thee.' *Confirmation* also signifies, in Ecclesiastical law, the ratification of the election of a bishop or bishop by the king. *Confirmation* is an assent to an estate or inheritance, by which act the person confirms and gives validity to the estate so far as is in his power. *Disulphuret of, or Covellite*, occurs in greenish-blue incrustations, having the appearance of spiders' webs; deposited round the rim of the crater of Mount Vesuvius. It consists of copper, 66; and sulphur, 32.

*Black; Copper Black; or Melanconite*, is of a blackish-brown colour, friable and never crystallized. It consists of copper, 66; and oxygen, 20.17.

*Blue; Azurite, Azure Copper Ore, or Azure Malachite*, is of an azure or blue colour, with sometimes a tinge of black. It is crystallized in a great variety of forms, and consists of deutoxide of copper, 70; carbonic acid, 6; water, 6; sp. gr. 3.5—3.77.

*Emerald;—See Dioptase.*

*Grey; Tetrahedral Copper Glance, or Pannetierite*, is of a steel-grey or iron-black colour, and consists of about 40 per cent. of copper, and varieties of arsenic, iron, sulphur, silver, and antimony: sp. gr. 4.4—5.2. Copper is the most abundant ore of copper, is of a blue colour, rather deeper than that of azurite, from which it is easily distinguished by yielding to the knife. The crystals are prismatic, having the solid angles replaced.

*Green Carbonate of, or Fibrous Malachite*, is of a shade of green, and occurs in slender crystals which are sometimes fasciated, and somewhat flattened. It contains about 70 per cent. of copper, and 8 or 9 of water.

*Hydrated Phosphate of*, occurs both massive and crystallized. The colour of the massive variety is emerald-green, striated, with blackish-blue. The crystals are generally dull, and of a green colour externally, and, by transmittance, emerald green. It consists of phosphoric acid, 21.687; oxide of copper, 62.847; water, 15.464: sp. gr. 4.2—4.3.

*Muriate of.—See Atacamite.*

*Octahedral Arseniate of, or Lenticular Ore*, is of a sky-blue, small-blue, deep blue, or verdigris-green colour, and is crystallized in rectangular prisms. It consists of arsenic, 40.00; oxide of copper, 14.00; and water, 45.00. A specimen analyzed by Wachtmeister contained oxide of copper, 35.19; arsenic, 22.24; alumina, 8.03; oxide of iron, 1.1; phosphoric acid, 3.61; silica, 4.04.

*Oblique Prismatic Arseniate of, or Radiated Olivenite*, is of a bluish-black, passing to a deep black colour; occurs, though in oblique rhomboidal prisms, often transparent and of a beautiful greenish-blue colour by transmitted light. It is composed of oxide of

# COPPER.

copper, 54; arsenic acid, 30; water, 16; sp. gr. 4.1—4.28.

*COPPER, 1 Acophate of, or Diprismatic Olive Malachite*, occurs crystallized, and in radiated masses; externally the crystals are greenish or blackish-green, resplendent with uneven surfaces. It consists of phosphoric acid, 28.7; oxide of copper, 68.6; water, 7.4.

*COPPER PYRITES, Octahedral or variegated*, occurs both massive and crystallized, of a copper-red or tombac-brown colour; in the crystallized varieties the latter colour prevails, with an iridescent tarnish, generally blue, sometimes yellow. It contains from 19 to 23 per cent. of sulphur; 7 to 18 per cent. of iron; and from 58 to 61 of copper.

*COPPER, Red Oxide of, or Octahedral Copper Ore*, occurs crystallized in the form of the octahedron and its varieties, and is of a red, sometimes crimson-red colour. It contains about 70 per cent. of copper, and 10 of oxygen; sp. gr. 5.6—6.1.

*COPPER, Rhomboidal Arseniate of, Prismatic Copper, or Copper Mica*, is of a grass-green or emerald-green colour. It occurs in six-sided tabular crystals, of which the lateral planes are trapeziums. Its constituents are from 39 to 58 per cent. of oxide of copper; 21 to 43 of arsenic acid; water, 17 to 21; sp. gr. 2.5—2.6.

*COPPER, Right Prismatic Arseniate of, Prismatic Olive Malachite, Acicular Olivenite, or Acicular Arseniate of Copper, &c.*, is of an olive-green, pistachio-green, or black-green colour, passing into liver-brown and wood-brown. It occurs in prismatic crystals. Its varieties are capillary or acicular, fibrous, arseniate of copper, and hematitic or wood arseniate of copper. It is composed of about 60 per cent. of copper, and 40 of arsenic acid, sometimes associated with water and phosphoric acid.

*COPPER, Silenuret of, or Berceline*, occurs in masses having an impalpable composition, and of a silver-white colour. It consists of copper, 64; and silicium, 40.

*COPPER, Sulphuret of, Vitreous Copper, or Copper Glance*, is of a lead or iron-grey colour. It occurs crystallized in regular six-sided prisms. It contains about 80 per cent. of copper, 12 to 20 of sulphur, and a little iron.

*COPPER, Sulphate of, Blue Vitriol, or Cyanose*, is of a deep sky-blue colour, passing sometimes into bluish-green; occurs massive, stalactitic, and pulverent. It consists of oxide of copper, 82.13; sulphuric acid, 31.57; water, 36.80. A specimen from Mexico, analyzed by Berthier, contained oxide of copper, 66.2; sulphuric acid, 16.6; water, 17.2.

*COPPER, Velvet Blue*, is a compound of oxide of copper, sulphuric acid, silica, and zinc. It consists of short delicate fibres of a small-blue colour, frequently grouped in spherical globules, and produced by the divergement of the capillary crystals from a centre.

*COPPER, kop pur, a.* Consisting of copper;—*v. a.* to cover with copper.

*COPPERAS, kop pur-as, s.* (*Kopparosa*, Ital. *cuperose*, Fr.) Sulphate of iron or green vitriol. It crystallizes into transparent rhomboidal prisms, has a strong styptic taste, and reddens vegetable blues.

*COPPER BUTTERFLIES, or COPPERS.—See Lycaena.*

**COPPERISH**, kop'pur-ish, *a.* Containing copper; resembling copper.

**COPPER-NICKEL**, kop'pur-nik'el, *a.* A native arsenuret of nickel, a mineral of a copper colour, found in Westphalia.

**COPPER-NOSE**, kop'pur-noze, *s.* A red nose.

I had as lively Helen's golden tongue had commended  
Trilus for a copper-nose.—*Shaks.*

**COPPERPLATE**, kop'pur-plate, *a.* A plate of copper, flattened, smoothed, and polished, on which designs are engraved.

**COPPERSMITH**, kop'pur-smith, *s.* One whose occupation is to construct and manufacture articles from copper.

**COPPERY**, kop'pur-e, *a.* Containing copper; made of copper.

**COPPICE**, kop'pis, } *a.* (*coppis*, Norm.) A wood of  
**CORSE**, kops, } small growth; a place over-  
grown with short wood; a wood cut at stated  
times for fuel.

**COPPLE-DUST**, kop'pl-dust, *a.* A powder used in purifying metals.

**COPPLE-STONES**, kop'pl-stonz, } *a.* Boulders.—

**CORBLE-STONES**, kob'bl-stonz, } Which see.

**COPRACHATIA**, kop-ra-kra'she-a, *s.* (*kopros*, excrement, and *akrateia*, want of command, Gr.) Involuntary discharge of faeces, or excrements.

**COPRINUS**, kop-rinus, *s.* (*kopros*, Gr.) A genus of Fungi: Order, Hymenomyces.

**COPRIS**, kop'ris, *s.* (*kopros*, Gr.) A genus of insects, so named from their living and burrowing in dung: Subfamily, Scarabæinæ, or True Scarabæi.

**COPROBIS**, kop-ro-bis, } *s.* (*kopros*, and *bios*,  
**COPROBIS**, kop-ro-be-us, } life, Gr.) A genus of  
insects of the Scarab family, which live in dung:  
Subfamily, Scarabæinæ.

**COPROLITE**, kop-ro-lite, *s.* (*kopros*, and *lithos*, a stone, Gr.) The petrified feces of fishes, reptiles, or other animals. Coprolites occur abundantly in certain formations, such as the Lias and the Coal strata: the former containing those of the fish-lizards of that period, and the latter of the sauroid fishes; the other remains of teeth, scales, &c. are very abundant.

**COPROLITIC**, kop-ro-lit'ik, *a.* Composed of coprolites; containing coprolites.

**COPROMESIA**, kop-ro-me'zhe-a, } *s.* (*kopros*, and  
**COPROMESIS**, kop-ro-me'sis, } *emesia*, vomit-  
ing, Gr.) Vomiting of faeces.

**COPROPHAGA**, kop-rof'a-ga, } *s.* (*kopros*, dung,  
**COPROPHAGANS**, kop-rof'a-ganz, } and *phago*, I  
eat, Gr.) A section of Lamellicorn beetles, so  
named from their living in and upon the dung of  
animals.

**COPROPHAGOUS**, kop-ro-fa'gua, *a.* (*kopros*, and  
*phago*, I eat, Gr.) Feeding on excrements.

**COPROPHILUS**, kop-ro-fil'us, *s.* (*kopros*, and *philo*,  
I love, Gr.) A genus of Coleopterous insects:  
Family, Brachelytra.

**COPROPHORIA**, kop-ro-fô're-a, *s.* (*kopros*, and *phoro*,  
I carry away, Gr.) Evacuation of feces.

**COPROSCLEROSIS**, kop-ro-sklo-ro'sis, *s.* (*kopros*,  
and *skleros*, hard, Gr.) Induration of the feces.

**COPROSMA**, kop-roz'ma, *s.* (*kopros*, and *osme*,  
smell, Gr.) A genus of plants: Order, Cinchona-  
ceæ.

**COPROTASIA**, kop-ro-ta'zhe-a, *s.* (*kopros*, and *stasis*,  
stoppage, Gr.) Complete obstruction of the  
bowels.

**CORSE**, kops, *v. a.* To preserve unde-

**CORSEY**, kop'se, *a.* Having corse.

**CORTIC**, kop'tic, *a.* Relating to the  
the ancient Egyptians, called *Copti*,  
distinguished from the Arabians and  
tants of modern Egypt;—*a.* the  
Copts.

**CORTIS**, kop'tis, *s.* (*Coptis*, I cul.)  
plants: Order, Ranunculaceæ.

**CORTODERA**, kop-tod'e-ra, *s.* (*Cortis*,  
the summit or peak, Gr.) A gen-  
terous insects: Family, Carabideæ.

**COPULA**, kop'u-la, *s.* (Latin, a bond)  
Logic, that part of a proposition  
denies the predicate of the subject.

**COPULATE**, kop'u-late, *v. a.* (*Copula*,  
unite; to conjoin; to link together)  
come together sexually;—*a.* joined.

**COPULATION**, kop-u-la'shun, *s.* (*Copula*,  
Union of the two sexes; coition.

**COPULATIVE**, kop'u-lay-tiv, *a.* *7*  
couples. *Copulative propositions*,  
where the subject and predicate are  
gather, that they may be all severally  
denied one after another;—*a.* a  
conjunction by marriage.—Obsol.  
sense.

**COPY**, kop'pe, *s.* (*copia*, Fr.) A trans-  
archetype or original; a single  
books, as a good or fair copy; *the*  
the original; that from which any  
an imitation of an original work,  
statue; abundance; plenty.—Obso-  
two senses. *Copy*, among Letter-  
the manuscript, or original, of a  
printed. *Copy-book*, a book in  
written for learners to imitate;—  
scribe; to write after an original;  
endeavour to resemble; to form  
to follow as a pattern;—*a.* to  
imitation of something else; to try.

**COPYER**, kop'pe-ur, } *s.* A trans-

**COPYIST**, kop'pe-ist, } sator.

**COPYHOLD**, kop'pe-holde, *s.* In  
customary estate, held by virtue  
court roll; that is, where the tenan-  
denced by a copy of the rolls of a  
the steward of a lord's court.

**COPYHOLDER**, kop'pe-holde'dur, *s.* *6*  
possession of land in copyhold.

**COPYRIGHT**, kop'pe-rite, *s.* In  
property in a literary or musical  
in an author. The law of copy-  
tection for the period of forty-  
cases; but should an author sur-  
tion of his work forty-two years,  
still continues during his lifetime,  
years after his death. Articles fur-  
zines, reviews, &c., though paid for  
lisher, cannot be published separat-  
consent of the author; the right of  
in any form he pleases, reverts to  
signees at the end of twenty-  
their first appearance, for the re-  
terms specified for other works.  
given to authors, by statute, *or*  
coupled with the condition of pres-  
of every work, if demanded, to  
braries; namely, that of the Bod-  
the British Museum, Faculty of *Ar-*

Public Library of Cambridge, and that of College, Dublin.

**COR, kôk'le-kô, a.** (French name.) The red, or corn poppy, a troublesome weed in fields. The *Papaver Rhœas* of Linnaeus; the name given to a colour of the same red.

**ko-ke't', s.** (*coquet*, Fr.) A gay, volatile, airy girl, who endeavours to gain by affected manners; a vain woman; a coquette.

**ko-ke't', v. a.** To entertain with complaisant amorous tattle; to treat with an appearance of amorous tenderness;—*v. a.* to act the coquette by blandishments.

**ku, ko-ke't'ish, a.** Affecting the manners of a coquette.

**ku, ko-ke't're, s.** Affectation of amorousness; desire of attracting notice.

**a.** The measure of a pottle; an old measure.—*Obsolete.*

**a** after the tenth part of a bath out of the corner of ten baths.—*Ezek. xlv. 16.*

**Corony, the heart.** *Cor Caroli*, a constellation in the northern hemisphere, situated between the Arctics and Ursa Major, so termed by Halley in honour of King Charles I. of England. *Cor Hydra*, a fixed star of the first magnitude in the constellation Hydra. *Cor Regulus*, a fixed star of the first magnitude in the constellation Leo.

**a, ko-ra'she-as, s.** (*Korax*, a crow, Gr.) *Korax*, a genus of Asiatic birds, allied to the family, Corvidæ.

**a, ko-ras'e-na, s.** (*Korax*, a crow, Gr.) A genus of birds, separated from the true crows by being distinguished from the other species of crows, or fruit crows, by the front of the bill being protected by short thick feathers.

**a, ko-ras'e-ne, s.** (*coraciina*, one of the crows.) The Fruit Crow, a subfamily of the crows, or Crow family, natives of South America: *Curirostris*.

**a, kor'a-ki, s.** (*curugle*, Welsh.) A boat used by fishermen, made by drawing a sail-cloth upon a frame of wicker work.

**BRACHIALIS, kor'a-ko-bra-ke-s'lis, s.** The brachial muscle. In Anatomy, a muscle situated on the interior and superior part of the arm, extending from the coracoid process of the scapula to the middle of the internal border of the *brachii*. Its use is to raise the arm and forwards.

**ku, kor'a-koyd, a.** (*Korax*, a raven, and resemblance, Gr.) Resembling a raven's beak. In Anatomy, certain processes are so denominated, as the *coracoid* processes of the scapula; *coracoid* ligament (ligament *coracoidien*, Fr.), a fibrous band, by which the superior border of the scapula is converted into a foramen, for the transit of the supra-scapular branch of the axillary artery.

**BRACHIAL, kor'a-ko-ra'de-al, a.** An epithet applied by Winslow to the *Biceps flexor cubiti*, as attached to the *coracoid* process of the scapula and the radius.

**kor'al, s.** (*corallium*, probably from *kore*, a mountain, and *alis*, the sea, Gr.) A calcareous production secreted by polypi.

**CORALLACEOUS, kor-al-la'shus, a.** Like coral, or partaking of its qualities.

**CORALLE, ko-ral'le, s.** A genus of serpents, allied to the Boas: Family, Serpentina.

**CORALLIA, ko-ral'le-a, s.** A family of Corticiferous Polyparia, in which the animals are hydriform, with internal ovaria, and ten tentacula irregularly scattered on the surface of a compound polyparium, formed externally of a living gelatinose-calcareous substance, and internally of a solid, horny, or calcareous axis, concentrically laminated, with a large base, by which they are attached to foreign substances.

**CORALLIFERI, kor-al-lif'er-e, s.** (*korallion*, and *fero*, I bear, Gr.) In Zoology, an order of Zoophytes, the species of which were long considered as marine plants; the calcareous secretions of minute animals called polypi, more or less analogous to Actinæ or Hydrea, connected by a common body, and nourished in common, so that what is eaten by one goes to the nutrition of the general fabric, and of all the other polypi. Their volition seems also to be in common, at least in the free species, such as the *Pennatulæ*, which are seen swimming by the contractions of their stems, and the combined motions of their polypi.

**CORALLIFORM, kor'al-le-fawrin, a.** Shaped like coral.

**CORALLINA, kor-al-li'na, s.** *Corallines*, a genus of the Pseudozouaria, in which the stem and branches are flabelliform; trichotomous, with distinct articulations, the upper ones being compressed and dilated; the pores obscure.

**CORALLINE, kor'al-line, a.** (*corallin*, Fr. *corallino*, Ital.) Composed of coral; resembling coral; of the colour of coral;—*s.* a zoophyte, in which each polypus is contained in a calcareous or horny shell without any central axis; also, the animal which secretes coral; a polypus.

**CORALLIUM RUBRUM, kor'al-le-um rû'brum, s.** Red coral. The *Gorgonia nobilis* of Linnaeus, a genus and species of coral, a native of the Mediterranean, the cells of which are immersed in a thin external fleshy ligament; the axis is thick, strong, solid, striated, ramified, and fixed by a broad basis: Family, Corallia.

**CORALLODENDRON, kor-al-o-den'drun, s.** (*korallum*, and *dendron*, a tree, Gr.) The Coral-tree.—See *Erythrina*.

**CORALLOID, kor'al-loyd, s.** (*a.* *coral*, and *eidos*, form, Gr.) Resembling the form of coral.

**CORALLORHIZA, kor-al-lo-ri'za, s.** (*korallion*, and *rhiza*, a root, Gr. in reference to its branched roots, which have the resemblance of coral.) Coral root, a genus of plants, one of the species of which, *C. innata*, the *Ophrys corallorhiza* of Linnaeus, is found in marshy umbrageous woods in Scotland: Order, Orchidaceæ.

**CORAL-RAG, kor'al-rag, s.** In Geology, a calcareous highly coralliferous deposit in the neighbourhood of Calne, England, forming a member of the Oolitic formation.

**CORAL-ROOT.**—See *Corallorhiza*.

**CORAL-TREE.**—See *Erythrina*.

**CORAL-WORT, kor'al-wurt, s.** In Botany, the common name of plants of the genus *Dentaria*.—Which see.

**CORANT, ko-rant', s.** A lofty sprightly dance.

**CORU, kawrb, s.** (*corbis*, Lat.) A basket used in coaleries; an ornament in a building.

**CORBAN**, kawr'ban, *s.* (Latin.) An alms-basket; a receptacle of charity; a gift; an alms. Among the ancient Jews, an offering which had life, in opposition to the *minchub*, or those which had not life; also, a ceremony which the Mahometans perform at the foot of Mount Ararat in Arabia, near Mecca: it consists in killing a great number of sheep, and distributing them among the poor.

**CORBE**, kawrb, *a.* (*corbe*, Fr.) Crooked.

**CORBELS**, kawr'beels, *s.* (*corbis*, a basket, Lat.) In Architecture, sculptured baskets of flowers or fruit, sometimes placed on the heads of caryatides. The term is also applied to the bell of the Corinthian capital. In Fortification, little baskets of earth set upon the parapets, to shelter the men in firing on the besiegers.

**CORBELS**, kawr'beels, *s.* In castellated and Gothic edifices, a row of stones projecting from the wall to support the parapet, serving in the place of brackets or modillions; also, applied to a horizontal row of stones and timber in a wall or vault, to sustain the floor or roof. *Corbel* is sometimes used to denote a niche or hollow in a wall, for the reception of a bust or statue; also, the vase of the Corinthian capital, so called from its resemblance to a basket. *Corbel table*, a series of semicircular arches, which cut one another in a wall, supported by timbers with their ends projecting out, and carved into heads, faces, lions' heads, &c.

**CORBIS**, kawr'bis, *s.* A genus of bivalved Mollusca, the shell of which is transversely roundish; the bones curved in different directions; cardinal teeth, 4; lateral, remote; short, 3.

**CORBULA**, kawr'bu-la, *s.* (Latin, a little pannier or basket.) A genus of bivalve-shelled Mollusca, in which the shell is inequivalve and ovate; the umbones central; one more prominent than the other; valves not gaping, cardinal teeth 4, bearing the ligament: Family, Myidae.

**CORBY**, kawr'be, *s.* A raven.—Obsolete.

**CORCHORUS**, kawr'ko-rus, *s.* (*koreo*, I purge, and *kure*, the pupil, Gr. in reference to the purgative qualities of *C. aliteria*.) A genus of small shrubs or herbs, with simple serrated leaves, covered with simple or stellate hairs, and having a small yellow corolla.

**CORD**, kawrd, *s.* (*corde*, Fr. *cord*, Welsh.) A rope; a string composed of several strands or twists; a measure for firwood, so called because it was anciently measured by a cord. Its dimensions are said to be eight feet in length, four feet in height, four feet in breadth, and its weight ten cwt. It is equal to 1000 billets.—*v. a.* to bind or fasten with a cord.

**CORBACK**, kawr'dij, *s.* (Spanish and French.) A general term for the running rigging of a ship; also for the rope which is kept in reserve to supply the place of such as may be rendered unserviceable; a quantity of cords or ropes.

**CORDATE**, kawr'date, } *a.* (*coriatus*, Lat.) In

**CORDATED**, kawr'day-ted, } Botany, having the shape of a heart, as represented on a card; when the word is joined by a hyphen to another term, it signifies between heart-shaped and that term indicated by the term to which it is linked: as, cordate-reniform, cordately-reniform, cordate-triangular, cordate roundish, cordate-oblong, cordate-sagittate, cordately-sagittate, cordate-auriculate, having auricles at the base, so as to give the leaf the

figure of a heart; cordate orbicular, cordate-ovate, cordate-peltate.—See the latter.

**CORDATELY**, kawr'date-ly, *ad.* In a corner.

**CORDED**, kawr'ded, *a.* Bound with a rowed. In Heraldry, a cross *corded* wound or wrenched about with cords made of two pieces of cord.

**CORDELIEN**, kawr-de-lier', *s.* (French) a certain friar: so named from the cord which he wore for a cincture.

**CORDIA**, kawr'do-a, *s.* (in memory of E. dius, a German botanist.) A genus of shrubs with drupaceous fruit, and bitomous style: Type of the order Cordiales.

**CORDIACEÆ**, kawr'do-a-se-e, *s.* (*cordia* genera.) A natural order of Exogonæ consisting of trees with harsh, alternate leaves, without stipules, and panicled with minute bracts; an inferior 5-toothed calyx, usually ribbed; a 4- or 5-lobed, regular, imbricated corolla; free stamens; axile placentæ; leaf folded longitudinally; fruit drupaceous.

**CORDIAL**, kawrd'yal, *a.* (French.) Proximate the heart; warm; sincere; affectionate; invigorating; restorative;—*a.* in Medicine, which excites the system, raises the spirits, and quickly produces strength and cheerfulness.

**CORDIAL-HEARTED**, kawrd'yal-hart', *a.* cordial affection; generous; warm-hearted.

**CORDIALITY**, kawr-de-al-ite, *s.* Freedom from hypocrisy; relation to the heart used in the last sense.

**CORDIALIZE**, kawrd'al-ize, *v. a.* To make cordial.

**CORDIALLY**, kawrd'yal-ly, *ad.* Sincerely; without hypocrisy.

**CORDIALNESS**, kawrd'yal-ness, *s.* Heartiness; sincerity.

**CORDIERA**, kawr-de-e-ra, *s.* (in honor of the sculptor, Nicolo Cordieri.) A genus of plants: Order, Cinchonaceæ.

**CORDIFORM**, kawr'do-fawrin, *a.* Heart-shaped.

**CORDINER**.—See Cordwainer.

**CORDISTES**, kawr dis'tes, *s.* A genus of terous insects: Family, Carabidae.

**CORD-LEAF**, kawrd'leef, *s.* The name given by Lindley to the natural order of plants which see.

**CORDMAKER**, kawrd'may-kor, *s.* One who is to make ropes; a ropemaker.

**CORDON**, kawr'don, *s.* (French.) In Architecture, a row of stones jutting out before the base of a parapet. In Military, a line or series of military posts: signify a ribbon, as the *corde bleu*, the order of the Holy Ghost.

**CORDOVAN**, kawr-do-van', *s.* Seal-skins made into leather; Spanish leather, termed from the city of Cordova in Spain.

**CORDUROY**, kawrd-du-roy', *s.* (*corde*, Fr.) A stout corded cotton cloth, originally made of silk.

**CORDWAIN**.—See Cordwain.

**CORDWAINER**, kawrd-de-nur, *s.* (from *cord*, a shoe-maker.)

**CORDWOOD**, kawrd'wood, *s.* Wood used for firing.

## CORKING-PIN—CORNCRAIK.

## CORNEA—CORNETTER.

**CORKING-PIN**, kawrk'ing-pin, *a.* A pin of the largest size.

**CORK-SCREW**, kawrk'akroo, *a.* A screw to draw corks from bottles.

**CORK-TREE**, kawrk'tre, *a.* *Quercus suber*, a species of the oak cultivated in Spain, Portugal, and the south of France, for its exterior bark, which is stripped off every eight or ten years. After being flattened and partially charred, to close up the transverse pores, it is sold to be manufactured into corks, &c.

**CORK-WOOD**, kawrk'wud, *a.* The soft spongy wood of the West Indian *Annona palustris*, used by the country people of Jamaica and the other islands for the same purposes as common cork.

**CORKY**, kawrk'e, *a.* Consisting of cork; resembling cork.

**COR LEONIS**, kor le-o'nis, *s.* (Latin.) The lion's heart; a star in the constellation Regulus.

**CORMORANT**, kawr'mo-rant, *s.* *Phalacrocorax carbo* of Temminck, and *Pelecanus carbo* of Linnaeus, a bird about the size of a goose, having black plumage, with green and yellow reflections, and numerous slender white feathers on the head, neck, and thighs. It frequently visits fresh-water lakes and rivers. It breeds in holes among the rocks: Order, Palmipides.

**CORMUS**, kawr'mus, *s.* (*kormos*, a stem, Gr.) A short roundish rhizoma.

**CORN**, kawrn, *s.* (*corn*, Sax. *korn*, Germ.) The seeds of the cereal grasses used as food; viz., wheat, barley, oats, rye, and maize; a hard excrescence of the skin of the feet;—*v. a.* to salt; to feed a horse with oats.

**CORNACEÆ**, kawr-na'se-o, } *s.* (*cornus*, one of the

**CORNEÆ**, kawr'ne-o, } genera.) A natural order of umbellated Exogens, consisting of trees or shrubs, seldom herbs; leaves, except in one species of the genus *Cornus*, opposite, entire or toothed, and feather-nerved; flowers capitate, umbellate, or corymbose; naked or with an involucre, rarely dioecious from abortion; fruit pulpy and edible; sepals four, superior; petals four, oblong, broad at the base, inserted into the top of the calyx, regular, valvate in aestivation; stamens four, inserted along with the petals, and alternate with them; anthers ovate, oblong, and two-celled; ovary adherent; ovules solitary and pendulous; drupe berried; seeds pendulous: found over all the temperate parts of Europe, Asia, and America.

**CORNAGE**, kawrn'idj, *s.* An ancient tenure of lands, which obliged the tenant to give notice of an invasion by blowing a horn.

**CORNAMUTE**, kawr'na-mute, } *s.* (*cornemuse*, Fr.)

**CORNEMUSE**, kawr'ne-muse, } A kind of rustic pipe.

**CORNBASH**, kawrn'brash, *s.* (a local name, from its being useful as manure in the raising of corn crops.) In Geology, a thin calcareous deposit, forming the uppermost band of the Bath Gault. It is extremely rich in Echinodermata and marine bivalve shells.

**CORN COCKLE**, kawrn kok'kl, *s.* *Agrostemma Githago*, an annual weed, common in corn-fields: Order, Caryophyllaceæ.

**CORNCRAIK**, kawrn'krake, *s.* *Crex pratensis*, or Land-rail, a bird which arrives in Britain in the latter end of April, and leaves it in September; so named from its peculiar evening cry of 'creeg, creeg,' and from its being chiefly an inhabitant in

corn or grass fields. The nest is made of a little moss and withered grass; very numerous—as many as sixteen found in one nest, though often not half that number: these are of a white colour, blotched with ash and red. The corncraik is seldom seen on the wing. Grallidæ.

In Pathology, a sudden, involuntary, and most painful contraction of one or more muscles, generally those of the lower limbs, arising usually from exhaustion or fatigue, inordinate exertion, or an unwonted attitude of the muscles affected. When cramp or spasm of the stomach, or of any internal organ, or external member, arises from spinal irritation or disease, nothing but attention to the source of the complaint can permanently remove it;—*a.* difficult; stiff; knotty;—*s. a.* to pain with cramps; to confine; to restrain; to bend with a cramp or crampirons.

**CHAMP**, *kramp*, *s.* In Masonry, a piece

**CHAMPIRON**, *kram'p'i-urn*, *s.* of metal, usually iron, bent at each end, and let into the upper of two pieces of stone, when their perpendicular faces are joined together. Copper, though more expensive, is preferable, where great durability is required, from its not oxidising. The ancients used bronze.

**CRAMP-FISH**, *kram'p'ish*, *s.* The Raia torpedo, or Electric Ray of Linnaeus, and Torpedo vulgaris of Fleming, a fish about two feet in length; head and body nearly round, so termed from its possessing the power of giving, when touched, a slight electric shock, producing numbness and tremor.

**CRAMPONNE**, *kram-po-ne*, *s.* (French.) In Heraldry, a cross, having at each end a cramp, or square piece coming from it.

**CRAMPOONS**, *kram'poonz*, *s. pl.* Hooked pieces of iron, something like double callipers for raising timber, stones, or other heavy materials.

**CRANAGE**, *kra'nij*, *s.* The liberty of using a crane at a wharf; also, the money paid for the use of it.

**CRANBERRY**, *kran'ber-re*, *s.* The *Oxycoccus palustris*, a small prostrate evergreen creeping shrub, common in turf bogs in Scotland, Ireland, and some places in England. The berries are globular, often spotted, crimson, of a peculiar flavour, with a strong acidity, grateful to most people in the form of tarts, for which purpose they are imported in large quantities into this country from Russia. The American or large-fruited cranberry has red flowers and scarlet berries, which are quite transparent, and have an exquisite taste: Order, *Ericaceæ*.

**CRANE**, *kra-na*, *s.* (*cran*, Sax. *Arane*, Dan.) In Ornithology, the *Grus cinerea*, or common crane, a bird which breeds in higher northern latitudes than Britain, said, in former times, to have visited this country in numerous flocks. It is a species of the stork: Family, *Ardeæ*. In Mechanics, a machine employed in raising great weights by means of a rope or chain, acted on by a windlass, and passing over a pulley at the extremity of a projecting arm or jib. It is so termed from its supposed resemblance to the neck of a crane. In Marine affairs, *Crane lines* are lines going from

the upper end of the sprit-sail-topmast to the middle of the forestays, which serve to keep the sprit-sail-topmast upright and steady in its place, and to strengthen it.

**CRANE-FLY**, *krané'fli*, *s.* A small insect of the genus *Tipula*, so termed from the form of its proboscis.

**CRANE'S BILL**, *kranyn'sbil*, *s.* An instrument used by surgeons. In Botany, plants of the genus *Geranium*.—See *Geranium*.

**CRANGON**, *kran'gon*, *s.* (*kraggon*, Gr.) A genus of long-tailed Crustaceans, comprising those shrimps whose anterior feet are terminated by a monodactylous and subcheliform hand. *C. vulgaris*, the common shrimp, is very common on the coasts of England and France, and is regarded as the most delicious of the Macrurus, or long-tailed Crustaceans.

**CRANIA**, *kran'no-a*, *s.* (*cranium*, a skull, Lat. in consequence of a supposed resemblance of the interior of the shells to a skull.) A genus of Brachyopoda Mollusca, the shell of which is a regular inequivalved bivalve; the upper valve convex and patelliform, with the umbo near the centre; the lower valve flat and nearly round, and pierced internally with three oblique and unequal holes.

**CRANICHNIDÆ**, *kran-ik'e-da*, *s.* (*cranichis*, one of the genera.) A family of plants of the tribe Neottieae: Order, Orchidaceae.

**CRANICHIS**, *kran'o-kis*, *s.* A genus of plants: Order, Orchidaceae.

**CRANIOMOMY**, *kran-e-og'no-me*, *s.* (*kranion*, the skull, and *gnomon*, an index, Gr.) The doctrine or science of determining the properties or characteristics of the mind by the conformation of the skull.

**CRANIOLOGIA**, *kran-e-o-la're-a*, *s.* (*kranion*, a skull, Gr. from the form of the capsule.) A genus of villous, clammy herbs, with opposite five-lobed leaves and racemose flowers, the corollas of which are white, with a coloured throat. The dried roots of this plant are used in the preparation of a cooling bitter drink by the inhabitants of Venezuela: Order, Pedaliaceae.

**CRANIOLOGICAL**, *kran-e-o-loj'o-kal*, *s.* (from *craniology*.) Pertaining to craniology.

**CRANIOLOGIST**, *kran-e-o-lo'oj-ist*, *s.* A phrenologist; one who studies the connection between the development of the cranium, and character and disposition of mind.

**CRANIOLOGY**, *kran-e-o-lo'oj-e*, *s.* (*kranion*, the skull, and *logos*, a discourse, Gr.) The study of skulls. The diversity of size, shape, and proportion of skulls, being intimately connected with the development of human character, the study of character through the medium of that development has now become a favourite pursuit with many individuals, and a profession with others, under the name of *phrenology*.—Which see.

**CRANIOMETER**, *kran-e-o-m'e-tur*, *s.* (*kranion*, and *metron*, a measure, Gr.) An instrument for measuring the dimensions of the skulls of animals.

**CRANIOMETRICAL**, *kran-e-o-m'e'tre-kal*, *s.* Pertaining to craniometry or the measurement of skulls.

**CRANIOMETRY**, *kran-e-o-m'e'tre*, *s.* The art of measuring the skulls of animals for the purpose of discovering their distinguishing characteristics.

**CRANIOSCOOPY**, *kran-e-o'sko-pe*, *s.* (*kranion*, and

## CRANIOSPERMUM--CRANI

*scopeo*, I explore, Gr.) The inspection of the skull according to the width of or space between the parietal bones—(*bregmate*, the narrow, or Ethiopian of the *novo-bregmate*, the middle, or variety;—(3) the *platy-bregmate*, the Egyptian variety.—See *Phrenology*.

**CRANIOSPERMIUM**, *kran-e-o-sper'mum*, and *sperma*, Gr. a seed, in reference to the like shape of the nuts.) A genus of natives of Siberia: Order, Boraginaceae.

**CRANIOTOME**, *kran-e-o'to-me*, *s.* (*kranion*, a helmet, and *tome*, a section, Gr. in reference to the short galea, or helmet.) herbaceous plants, natives of the Order, Lamiaceae.

**CRANIUM**, *kran'e-um*, *s.* (*kranion*, Gr.) or superior part of the head which encloses the cavity containing the brain. The cranium is composed of eight bones—the os frontis, parietalis, the two ossa tempora, the occiput, the os ethmoides, and the os sphenoides.

**CRANK**, *kran'k*, *s.* In Mechanics, an axle by which a reciprocating motion is made to produce a revolving motion, and axle connected with it; an iron for many purposes; any bending or sag; a twist or turning in speed, which consists in a change in the form of a word.

Quips and cracks, and wanton smiles.—*a.* stout; healthy; sprightly. *Considered*, the quality of a ship, which, if sufficient quantity of ballast or cargo, or rowness of make, is rendered incapable of sailing, without being exposed to the danger of setting. *Crank by the ground*, is also of a ship, whose floor is so narrow, that it not be brought on the ground with *Crank wheel*, in Ropemaking, for spinning boxwood, &c., is a machine fixed on an axle or axis, with a handle to turn it by: between two posts; the after one is one foot broad, and five inches thick; the part, above the wheel, is let in a round two feet six inches long, two feet two inches thick, to receive three sets of with wheels on them, for the spinners threads on; at the front side of the short post, supported by a knee of spindle to rest on.

**CRANKLE**, *kran'kl*, *v. n.* To run in a course;

See how this river comes me cranking.—*v. n.* to break into angles or undulations to crinkle;

Old Vega's stream,  
Crinkling her banks.—*Pope*.

—*s.* a bend or turn; a crinkle.

**CRANKNESS**, *kran'k-ness*, *s.* Healthless vigour; liability to overset, as a ship.

**CRANKY**, *kran'ke*, *s.* Same as *crank*.

**CRANNIED**, *kran'e-ed*, *s.* Having cracks, or fissures.

**CRANNY**, *kran'ne*, *s.* (*crata*, Fr.) A fissure; an instrument used by glass-makers for the necks of glasses.

**CRANTERIES**, *kran-te'ries*, *s.* (*kranion*, and *ter*, I make perfect, Gr.) The Dentures

# GRANTS—GRASS.

Wisdom-teeth, so called because they come last, and complete the number of the teeth.

**GRANTS.** *krant*, *a*. (*krantz*, Germ.) Garlands carried before the list of a maiden and hung over her grave.

Yet here she is allow'd her virgin grants,  
Her maiden ornaments, and her bringing home  
Of bell and burial.—*Shaks*

**GRANTIA**, *brant'se-a*, *s*. (in honour of H. J. N. Grant.) A genus of umbelliferous herbaceous plants: Tribe, Hydrocotyleae.

**GRATING DOORS**, *krap'o-din dorze*, *s*. (*crapaud*, a toad-hole, Fr.) Doors which turn on their hinges.

**GRAYS**, *kray*, *s*. (*Grapp*, Germ.) A light transparent silk fabric, from which the gloss has been removed by a particular mode of preparation; it is usually dyed black, and is worn as a sign of mourning for the dead. Grays is also used for the gowns, &c., of the clergy.

A saint in grays is twice a saint in lawn.—*Pope*.

—*e. a.* to curl or form into ringlets.

**GRAYS**, *krap'nel*, *s*. A hook or drag, supposed to be corrupted from *graynel*, a grappling iron.

**GRIPPER**, *krap'pl*, *a*. (*crac*, Welsh.) A claw.—*Shaks*.

**GRIPULA**, *krap'ul-a*, *s*. (Lat. from *krapula*, a surfeit, Gr.) The oppressed state of the stomach and head arising from excess in eating or drinking.—*See* *surfeit*.

**GRIPPLENCK**, *krap'u-lens*, *s*. Sickness from surfeit of eating or drinking.—*Not* used.

**GRIPPLENT**, *krap'u-lent*, *a*. Sick from intemperance.

**GRIPPLETIONS**, *krap'n-lus*, *a*. Drunk; surfeited with meat or drink.—*Not* used.

**GRASH**, *krash*, *v. a.* (*crasher*, to crush, Fr.) To break; to break;—*e. n.* to make a loud harsh noise, as in the act of falling and breaking at the same time;—*s.* the loud mixed sound produced by sudden breakage, or of many things falling and breaking.

**GRASHING**, *krash'ing*, *s*. A violent mixed sound.

**GRASH**, *kras's*, *s*. (*krasis*, from *krainnyai*, I mingle, Gr.) Mixture; more particularly applied to humours of the body, when there is such an admixture of their constituent parts as to constitute a healthy state.

**GRASPHEMOPHALLA**, *kras-pe-do-sel'a-lus*, *a*. (*Grasphe*, I devour, and *phalle*, the head, Gr. from the head being covered with scales.) A genus of poisonous snakes allied to the rattlesnake, and having the anteorulal plates double: Family, Crotalidae.

**GRASPION**, *kras'pe-dun*, *s*. (*Graspion*, the beard of a garment, Gr.) A relaxation of the uvula when it hangs down like a garment.

**GRASS**, *kras*, *a*. (*crassus*, Lat.) Thick; gross; bulky. In Natural History, the following terms are used in the definition of species:—*crassiceps*, thick-headed; *crassicollis*, thick-necked; *crassicornis*, thick-horned; *crassicastrum*, thick-ribbed; *crassidonta*, thick-toothed; *crassifolius*, thick-leaved; *crassilabrus*, thick-lipped; *crassinervius*, having thick nerves or veins in the leaves; *crassipes*, large-footed; *crassipennis*, thick-winged; *crassipetalus*, having thick petals; *crassirostris*, thick-beaked; *crassispinus*, thick-spined; *crassisequatus*, thick-shouldered; *crassiusculus*, deeply-furrowed.

# CRASSAMENTUM—GRATEVA.

**CRASSAMENTUM**, *kras-sa-mon'tum*, *s*. In Physiology, the fibrine, or red portion of the blood which thickens and forms the clot, when exposed to the atmosphere.—*See* *Blond*.

**CRASSATELLA**, *kras-sa-tell'a*, *s*. (*crassus*, thick, Lat.) A genus of Mollusca, with a solid, close, heavy bivalve shell; hinge very thick; cardinal teeth  $\frac{3}{4}$ , subangular, striated, and placed on one side; lateral teeth obsolete; a triangular cartilage immediately below the umbones: Family, Myidae.

**CRASSILABRUS**, *kras-se-lab'rus*, *s*. (*crassus*, and *labrum*, a lip, Lat. from the excessive thickness of the lips.) A genus of fishes, in which the mouth is oblique; lips thick; eyes small; ventral fins short; dorsal and anal fins without scales at their base; and the forehead abruptly gibbous: Family, Chetodonidae.

**CRASSIMENT**, *kras'se-ment*, *s*. Thickness.

**CRASSINA**, *kras'se-na*, *s*. (*crassus*, thick, Lat.) A genus of Mollusca, in which the shell is bivalve, solid, suborbicular, and the bosses nearly central; cardinal teeth  $\frac{3}{4}$ , unequal in one valve; lateral teeth wanting: Subfamily, Venerinae.

**CRASSISPIRA**, *kras-sis-pi'ra*, *s*. (*crassus*, thick, and *spira*, a spiral, Lat.) A genus of Mollusca, in which the shell is univalve, small, subclavate, and tuberculated; the outer-lip furnished with a slight sinus above, and thickened internally at the top and bottom; the top of the inner-lip with a thick pad: Subfamily, Columbellinae.

**CRASSITUDE**, *kras'se-tude*, *s*. (*crassitudo*, Lat.) Grossness; coarseness; thickness.

**CRASSNESS**, *kras'nes*, *s*. Grossness.

**CRASSULA**, *kras'u-lu*, *s*. (dim. of *crassus*, thick, Lat.) A genus of plants consisting of fleshy herbs or shrubs, chiefly natives of the Cape of Good Hope: Order, Crassulaceae.

**CRASSULACEAE**, *kras-u-lu'se-e*, *s*. (*crassula*, one of the genera.) House Leeks, a natural order of plants, consisting of succulent herbs or shrubs, with entire or pinnatifid leaves without stipules; the flowers usually in cymes; sepals from three to twenty; petals same in number as the sepals; stamens inserted with the sepals; carpels the same in number as the petals; fruit consisting of several follicles; seeds attached to the margins of the suture.

**CRASSUM INTESTINUM**, *kras'sum in-tes'te-num*, *s*. (Latin.) The large intestine.

**CRASSINATION**, *kras-to-na'shun*, *s*. (*cras*, to-morrow, Lat.) Delay.—*Not* used.

**CRATAEGUS**, *kra-ta'e'gus*, *a*. (*cretaceus*, from *creta*, chalk, Lat.) Chalky; having the qualities of chalk; like chalk; abounding with, or formed of chalk. In Geology, *cretaceous Group*.—*See* *Chalk Formation*.

**CRATÆGEA**, *kra-t'e'gus*, *s*. (*kratos*, strength, Gr. in reference to the hardness and strength of the wood.) The Hawthorn, a genus of thorny shrubs, or trees, with angular or toothed leaves and terminal corymbs of flowers, which are usually white, or white tinged with red: Order, Pomaceae.—*See* *Hawthorn*.

**GRATEVA**, *kra-te'va*, *s*. (In memory of Cratæva, a Greek botanist, who lived in the time of Hippocrates.) The Garlic Pear, a genus of plants, consisting of shrubs and trees with trifoliate leaves and terminal cymes, or racemes of flowers: Order, Capparidaceae.

CRATCH—CRAVE.

- CRATCH**, kratsh, *a.* (*croche*, Fr.) A rack; a grated crib, or manger, in which hay is kept for horses.
- CRATCHES**, kratsh'es, *s. pl.* (*kratze*, the itch, from *kratzen*, to scratch, Germ.) In Farriery, a swelling on the pastern under the fetlock, and sometimes under the hoof of a horse.
- CRATE**, krata, *s.* (*crates*, Lat.) A hamper, or basket, of wicker-work, used in the packing of china, glass, and crockeryware.
- CRATER**, kra'tur, *a.* (*krater*, Gr. *crater*, Lat.) A brass vessel with a broad base and a narrow mouth; the aperture or mouth of a volcano; a constellation in the southern hemisphere containing thirty-one stars.
- CRATERICARPUM**, kray-tur-e-kâr'pum, *s.* (*krater*, and *karpus*, a seed, Gr. from the cup-like form of the seeds.) A genus of plants: Order, Onagraceæ.
- CRATERIFORM**, kra'tur-e-fawrm, *a.* (*cruter*, and *forma*, shape, Lat.) Having the shape of a large cup, as in *Spongia crateriformis*.
- CRATERITECOMA**, krat-ur-et-e-ko'ma, *s.* (*krateros*, strong, Gr. and *coma*, a bush, Lat.) A genus of plants: Order, Bignonaceæ.
- CRATEROIDEÆ**, kray-tur-oyd'e-o-æ, *s.* (*krater*, a cup, and *eidos*, resemblance, Gr.) A name given by Reichenbach to a family of Lichens, distinguished by the cup-like shape of their organs of reproduction.
- CRATEROMYCES**, kray-tur-om'e-ses, *s.* (*krater*, and *mykes*, a mushroom, Gr.) A genus of Fungi: Suborder, Physomyces.
- CRATEROPODINÆ**, kra-tur-o-pod'e-ne, *s.* (*crateropus*, one of the genera.) The Bubbler, or Long-legged Thrushes, a family of birds, placed by Swainson between the Merulide, or true Thrushes, and the Orioles. They are distinguished by their legs being remarkably strong and large; their wings are very short, which causes them to fly with difficulty, and only for short distances, retreating generally among reeds and other aquatic plants, to which they cling. Their note is loud and disagreeable; the plumage sombre, lax, and soft: Order, Dentinestres.
- CRATEROPUS**, kra-ter'o-pus, *s.* (*krateros*, strong, and *pous*, a foot, Gr.) A genus of the type of the Crateropodina, or Long-legged Thrushes.—Which see.
- CRATEROSTIGMA**, krat-ur-o-stig'ma, *s.* (*krateros*, and *stigma*, Gr. from the largeness of the stigmas.) A genus of plants: Order, Gesneraceæ.
- CRATICULA**, kra-tik'u-la, *s.* The grate which covers the ash-hole of a chemical furnace.
- CRATOXYLUM**, kra-toks'e-lum, *s.* (*kratos*, strength, and *xylos*, wood, Gr.) A genus of plants, consisting of a tall Javanese tree with opposite oblong lanceolate leaves, which stand on short pedicels, and terminal panicles of yellow flowers: Order, Hypericaceæ.
- CRATYLIA**, kra-til'e-a, *s.* A genus of Composite plants: Tribe, Phaseoleæ.
- CRAUNCH**, krawnsh, *v. a.* (*schrantzen*, Dut.) To crush with the teeth; to chew with violence and noise.
- CRAVAT**, kra-vat', *s.* (*cravatta*, Ital. *cravata*, Port.) A neckcloth; a piece of fine cloth worn about the neck by men.
- CRAVE**, krave, *v. a.* (*cræhan*, to implore, Sax.) To ask with earnestness or importunity; to ask submissively; to beseech; to implore; to beg; to entreat.

CRAVEN—CRAZINESS.

- CRAVEN**, kra'ven, *a.* (supposed to be from *crægan*, to beg.) A word of obloquy, applied to a man who had been overcome in combat, and begged for mercy; hence, a recreant; a conquered dispirited cock. The word is sometimes written *craven*, or *cravest*.
- CRAVER**, kra'vur, *s.* One who craves.
- CRAVING**, kra'ving, *a.* A vehement desire to possess or enjoy.
- CRAVINGNESS**, kra'ving-ness, *s.* The desire to possess.
- CRAW**.—See *Crop*.
- CRAWFISH**, kraw'fish, *s.* Sometimes called *crayfish*; the *Astacus fluviatilis*, a species of tailed Crustaceans, found in the fresh waters of Europe and the north of Asia: It is used as food, but it is esteemed as these are.
- CRAWFURDIA**, kraw-fur'de-a, *s.* (in honor of Crawford, Esq. author of a history of the Archipelago, and formerly governor of Singapore.) A genus of glabrous plants with elongated slender branches, and large showy pale blue flowers: Order, Liliaceæ.
- CRAWL**, krawl, *v. a.* (*crielen*, Belg. *kräla*, Swed.) To creep; to move on the ground as a reptile; to move on one's knees; to move or walk slowly and unsteadily; to move slowly and weakly;—a place of confinement, formed by a bank and hurdles on the sea-coast, to confine the sea.
- CRAWLER**, kraw'lar, *s.* One that crawls; a reptile.
- CRAWLING**, kraw'ling, *a.* Slow; timorous; insinuating.
- CRAX**, kraks, *s.* (*crax*, I vociferate.) The Curassows, a genus of large gallinaceous birds, having the head crested with curled feathers. The eggs are white, and about the size of a turkey, natives of Mexico and South America. See *Craxidæ*.
- CRAYFISH**.—See *Crawfish*.
- CRAYON**, kra'on, *s.* (*crayon*, from *cray*, Materials for drawing. Crayons are of two kinds, natural and artificial. The principal native colors are black, white, and red; the best black is from Italy. It is a species of earth, found in the ground, but happens on exposure to the air to become white. The best white is a pure chalk obtained from the mountains of France. The red is a chalk, or clay, coloured with oxide of iron. Artificial crayons are made of different coloured earths and other pigments, pressed into solid sticks with some tenacious binding matter. Those formed of plumbago are called *black lead pencils*;—a design or drawing made with a crayon;—*v. a.* to sketch with a crayon.
- CRAZE**, krazo, *v. a.* (*cræsser*, to break, Fr.) To break; to crush; to weaken or impair the intellect; to crack.
- CRAZED**, krazed, *u. part.* Having the intellect broken; bruised.
- CRAZEDNESS**, krazed-ness, *s.* A brain disease; a state of the mind characterized by a deceleration; an impaired state of the intellect.
- CRAZE-MILL**, kraz'e-mil, *s.* A mill for grinding crayons.
- CRAZING-MILL**, kraz'ing-mil, *s.* A mill for grinding crayons.
- CRAZILY**, kraz'e-le, *ad.* In a crazed manner.
- CRAZINESS**, kraz'e-ness, *s.* The state of the mind characterized by a deceleration; an impaired state of the intellect.

**CRAZY—CREBRICOSTATE.**

**weakened in body or mind; imbecility**  
**decrepitude.**

**Creb.** *a.* Broken; decrepit; shattered in  
 body; broken-witted; weak; shattered;  
 foolish.

**Crech.** *v. n.* (*crechm*, Welsh.) To make a  
 crack.

**Creckling.** *a.* A harsh grating sound.  
**Creem.** *v. n.* (*cremor*, Lat.) The nutritious or  
 of milk;—*v. a.* to gather cream; to  
 froth. *Cream of Tartar*, the purified  
 of tartar.

**CREBRISULCATE—CREDULITY.**

dinal elevation, Lat.) Marked with closely-set  
 ribs or ridges, as in the shells *Fusus crebrico-*  
*tatus*, *Mitra crebricosta*.

**CREBRISULCATE**, *kre-bre-sul'kate, a.* (*creber*, and  
*sulcus*, a furrow, Lat.) Marked with closely-set  
 transverse furrows, as in the shell *Venus crebri-*  
*sulca*.

**CREBRITUDE**, *kreb're-to-de, a.* (*creber*, frequent,  
 Lat.) Frequency.—Obsolete.

**CREBROUS**, *kreb'rus, a.* (*creber*.) Frequent.—Ob-  
 solete.

**CREDENCE**, *kre'dens, s.* (from *credo*, I credit, Lat.)  
 Belief; credit; that which gives a claim to credit  
 or belief;—*v. a.* to believe.—Obsolete as a verb.

In credencing his tales.—Shelton.

**CRUMENTARIA**, kroo-men-ta're-a, *s.* (*cruma*, Lat. in allusion to its thin papery substance.) A genus of annual plants, with flowers, natives of Brazil: Order, Rubiacæ.

**CRUMMALE**, krum'ma-bl, *s.* That which is broken into small pieces.

**CRUMMY**, krum'me, *a.* Full of crumbs.

**CRUMP**, krump, *a.* (Saxon.) Crooked; shouldered.

**CRUMPET**, krum'pit, *s.* A soft cake.

**CRUMPLE**, krum'pl, *v. a.* To draw together to crush together in complications; to shrink up; to contract.

**CRUNK**, krunkt, } *v. n.* To cry.

**CRUNKLE**, krunkt'l, } *v. n.* To cry.

**CRUR**, krod'ur, *s.* (Latin.) Gore; coagulation.

**CRURIA**, krod'o're-a, *s.* (*crur*, Latin.) A genus of Algae: Order, Fucacæ.

**CRUP**, krup, } *s.* The buttocks.

**CRUPP**, kroup, } *s.* The buttocks.

**CRUP**, krup, *a.* Short; brittle.—Obsolete.

**CRUPINA**, krod-pi-na, *s.* A genus of plants: Order, Compositæ.

**CRUPPER**, krup'pur, *s.* (*cruppius*, Fr.) Manege, the rump or buttocks of a horse.

**CRUPP**, krup'pur, *s.* A thong of leather put under a horse's hind legs, drawn up by a strap to the buckle of the saddle, so as to keep him from casting forward on his neck.

**CRURÆA**, krod-re-us, } *a.* (*crux*, a cross, Lat.)

**CRURALIS**, krod-ra'lis, } muscle situated on the thigh. It arises—fleshy—from the two trochanters and the os femoris inserted—tendinous—into the opposite patella behind the rectus.

**CRURAL**, krod'ral, *a.* (French.) Belonging to the thigh.

**CRUSADE**, krod-sade', *s.* (*croisade*, Fr.) A military expedition against infidels. The term is applied to those military expeditions during the eleventh, twelfth, and thirteenth centuries, by the Christian nations of Europe, for the purpose of recovering Palestine from the Saracens. They were so named in consequence of the cross having been a distinguishing banner.

**CRUSADER**, krod-sa'dur, *s.* A person engaged in a crusade.

**CRUSADO**, krod-sa'do, *s.* A name given to the Portuguese coins; the old crusado of 400 reis, and the new crusado of 200 reis.

**CRUSK**, kroos, *a.* (*kruis*, Dut.) A bottle.

**CRUSKA**, krod'se-a, *s.* (in honour of St. Crispin.) A genus of herbaceous plants, with

and red flowers, disposed in capitate umbels, girded by involucre: Order, *Cruciferae*.

**CRU'LT, s. (crucet, Fr.)** A goldsmith's melting-pot.

**CRU'LB, v. a. (crucier, Fr.)** To press between opposite bodies; to squeeze; to force down; to press with violence; to overcome; to subdue; to conquer resistance;—*v. n.* to be condensed; to close body;—*s.* a collision; the act of crushing. *Crush a cup, to empty a cup; together.*

**CRUSH'UR, s.** A violent breaker; a beater. **CRUST, s. (crusta, Lat.)** Any shell or envelope by which a body is enveloped; an incrustation; a collection of matter into a hard body; a pie; the outer hard part of bread; a crust of bread;—*v. a.* to envelope; to cover and case; to cover with concretions;—*v. n.* to contract into a hard covering.

**CRUSTA, s. (Latin.)** In Gem Sculpture, a gem to a gem engraved for inlaying on a hard object. In Pathology, a scab; the scab; *crusta lactea*, milk scab, or scald; *crusta villosa*, the mucous coat of the small intestine.

**CRUSTACEA, s. (crusta, a hard crust, s. crustaceus, Lat.)** covering, Lat.) the animal kingdom, consisting of articulated feet, respiring by branchia, protected in some by the shell, and external in others, but that enclosed in special cavities of the body, to receive air from openings in the surface of the body. The Crustacea are apterous or denuded, are furnished with compound eyes, usually with ocelli, and usually with four pairs of legs, with the exception of the Pycnogonida, have a pair of jaws, the two superior ones, by the name of mandibles, included; the lower jaws, the last four of which, however, species, become true feet: they are furnished with ten feet, properly so called, all of which are terminated by a single small nail. The Crustacea, presents a labrum and a labrum lower lip, properly so called, or compound of the latter. Their envelope is calcareous and solid; they change their form and natural activity. They are marine and aquatic. Cuvier divides the Crustacea into two sections, the Malacostraca and Stomatopoda.—Which see.

**CRUSTACEAN, s. (crusta, a hard crust, s. crustaceus, Lat.)** a discourse, a description of Crustaceous animals.

**CRUSTACEAN, s. (crusta, a hard crust, s. crustaceus, Lat.)** Pertaining to Crustacea; having a soft articulated shell.

**CRUSTACEAN, s. (crusta, a hard crust, s. crustaceus, Lat.)** The quaternary jointed shells.

**CRUSTACEAN, s. (crusta, a hard crust, s. crustaceus, Lat.)** Relating to Crustacea.

**CRUSTACEAN, s. (crusta, a hard crust, s. crustaceus, Lat.)** One versed in the study of Crustaceous animals.

**CRUSTACEAN, s. (crusta, a hard crust, s. crustaceus, Lat.)** Same as Crustaceous.

**CRUSTACEAN, s. (crusta, a hard crust, s. crustaceus, Lat.)** Covered with a crust.

**CRUSTACEAN, s. (crusta, a hard crust, s. crustaceus, Lat.)** An adherent covering.

**CRUSTILY, krus'te-la, ad.** Peevishly; snappishly; harshly.

**CRUSTINESS, krus'te-nes, s.** The quality of being crusty; peevishness; moroseness.

**CRUSTULA, krus'tu-la, s. (dim. of crusta, a shell, Lat.)** In Pathology, an effusion of blood under the tunica conjunctiva, from a bruise or other cause.

**CRUTCH, krus'te, s.** Covered with a crust; like a crust; of the nature of a crust; peevish; snappish; morose.

**CRUT, krus'te, s.** The rough part of oak bark.

**CRUTCH, krus'te, s. (cruc, Sax. croccia, Ital.)** A support used by cripples; the term is used in the following passage for old age;

Beauty doth varnish age, as if new born,  
And gives the crutch the cradle's infancy.—*Shaks.*

—*s. a.* to support on crutches as a cripple.

**CRUTCHED, krus'te, s.** Supported with crutches.

**CRUTCH, krus'te, s. (Welsh.)** A musical instrument

**CRUTCH, krus'te, s. (Welsh.)** formerly much used in Wales, resembling a violin. It was about twenty-two inches in length, and an inch and a half in thickness, with six strings supported by a bridge.

**CRUX, krus'te, s. (Latin, a cross.)** Anything that vexes or puzzles. In Astronomy, a constellation of the southern hemisphere, situated close to the hinder legs, and under the body of Centaurus: it contains seven stars.

**CRY, kri, v. n. (crier, Fr.)** Past and past part.

**CRYED, kri, v. n. (crier, Fr.)** Past and past part. To speak with vehemence and loudness; to call importunately; to talk eagerly or incessantly; to repeat continually; to proclaim publicly; to make public; to utter lamentations; to squall as an infant; to weep; to shed tears; to yelp as a hound on a scent; to proclaim as a hawk; to call for vengeance or punishment; to cry out, to exclaim; to scream; to clamour; to complain loudly; to blame; to censure; to declare aloud;—*v. a.* to proclaim publicly something lost or found; to cry down, to blame; to depreciate; to decry; to prohibit; to overbear; to cry up, to applaud; to exalt; to praise; to raise the price by proclamation;—*s. (cri, Fr.)* lamentation; shriek; scream; weeping; mourning; clamour; outcry; exclamation of triumph or wonder; proclamation; the hawk's proclamation of wares to be sold in the streets, as the cries of London; acclamation; popular favour; voice; utterance; manner of vocal expression; importunate call; yelping of dogs; yell; inarticulate noise; a pack of dogs.

**CRYING, kri'ing, s.** Importunate call or outcry; shout; clamour; exclamation;—*a.* notorious; common.

**CRYOLITE, kri'o-lite, s. (kryos, ice, and lithos, a stone, Gr.)** A mineral of a white, reddish, or yellowish-brown colour, occurring in West Greenland in crystalline masses. It consists of fluoric acid, 47; soda, 32; alumina, 21.

**CRYOPHORUS, kri-o'fo-rus, s. (kryos, cold or ice, and phoreo, I bear, Gr.)** An instrument for showing the relation between evaporation at low temperatures and the production of cold.

**CRYOPHYLLA, kri-o-sof-o-la, s. (kryos, and phileo, I love, Gr.)** A genus of plants: Order, Palmaraceae.

**CRYPHÆA, kri-fe'a, s. (kryphaia, secret, or concealed, Gr.)** A genus of Moss-plants: Order, Bryaceae.

CRYPTHIA—CRYPTICUS.

CRYPTIDÆ—CRYPTOGRA

**CRYPTHIA**, kri'fo-a, s. (*kryphaios*, hidden, Gr. in allusion to the enclosed corollas.) A genus of plants, consisting of shrubs, natives of New Holland: Order, Lamiaceæ.

**CRYPTHIACANTHUS**, kri'fo-a-kan'thus, s. (*kryphaios*, and *akanthos*, a spine, Gr.) A genus of plants: Order, Acanthaceæ.

**CRYPTHOSPERMUM**, kri'fo-o-sper'mum, s. (*kryphaios*, and *sperma*, a seed, Gr.) A genus of Composite plants: Suborder, Tubulifloræ.

**CRYPTINA**, kri'p-se-rina, s. (*kryptos*, concealed, and *scires*, a siren, Gr.) A genus of birds belonging to the subfamily Glaucopinae, or Wattlows.

**CRYPTIS**, kri'pis, s. (*krypto*, I conceal, Gr. the heads of the flowers being concealed in the sheaths of the leaves.) A genus of plants: Order, Gramineæ.

**CRYPT**, kript, s. (*crypta*, Lat. from *krypto*, Gr.) The under or hidden part of a building; also, that part of churches and abbeys appropriated below to the monuments of deceased persons and the interment of the dead. *Crypt porticus*, subterranean or dark passages and galleries in the ancient Roman villas, frequently used as cool sitting-rooms.

**CRYPTA**, kri'p'a, s. (Latin.) In Botany, a name given to the small round receptacles for secretion in the leaves of some plants, as in the orange and myrtle.

**CRYPTADIA**, kri'p-ta'de-a, s. (*kryptadios*, concealed, Gr.) A genus of Composite plants: Suborder, Tubulifloræ.

**CRYPTÆ**, kri'p'te, s. (*krypto*, Gr.) In Anatomy, a term applied to minute rounded lenticular hollow bodies, situated in the substance of the skin and mucous membranes, and which pour out upon the surface, from a small orifice, different fluids secreted in the interior. The *Cryptæ* keep the parts in a moist and supple state, and protect them from the irritating action of the various bodies which come in contact with them.

**CRYPTANDRIA**, kri'p-tan'dre-a, s. (*krypto*, and *aner andrus*, a male, Gr. in allusion to the stamens being hidden by the petals.) A genus of small heath-like shrubs, natives of New Holland: Order, Rhamnaceæ.

**CRYPTANGUINA**, kri'p-tan'gwin-a, s. (*krypto*, Gr. *anguina*, a serpent, Lat.) A genus of plants: Order, Cyperaceæ.

**CRYPTANTHUS**, kri'p-tan'thus, s. (*krypto*, and *anthos*, a flower, Gr.) A genus of plants: Order, Bruniellaceæ.

**CRYPTARRHENA**, kri'p-ta-re'na, s. (*krypto*, and *arren*, a male, Gr. in reference to the hooded apex of the column which covers up the anther.) A pretty little stemless plant, with distichous leaves and neat yellow flowers: Order, Orchidaceæ.

**CRYPTERONIA**, kri'p-to-ro'ne-a, s. (*krypto*, and *pteron*, a wing, Gr. in allusion to the seeds being terminated by a narrow wing.) A genus of plants, consisting of a tall tree, a native of Java: Order, Celastraceæ.

**CRYPTIC**, kri'p'tik, } a. Hidden; secret; occult.

**CRYPTICALLY**, kri'p'te-kal-le, ad. Secretly; occultly.

**CRYPTICUS**, kri'p'te-kus, s. (*kryptikos*, able to conceal, Gr.) A genus of birds belonging to the Trogonidae, or Trogon family: Tribe, Fissirostræ; also,

a genus of Coleopterous insects: F.

**CRYPTIDÆ**, kri'p'te-de, s. A family of terous insects, in which the abdomen petiolated, and the ovipositor inserted as long as the body.

**CRYPTOCALYX**, kri'p-to-ka'lek, s. (*krycal*, and *kalyx*, calyx, Gr.) A genus of Order, Verbenaceæ.

**CRYPTOCARPON**, kri'p-to-kar'pon, s. (*karpus*, Gr.) A genus of Moss-pl.

**CRYPTOCARPUS**, kri'p-to-kar'pus, s. (*karpus*, a seed, Gr.) A genus of pl.

**CRYPTOGARYA**, kri'p-to-ka're-a, s. (*karyon*, a nut, Gr.) A genus of pl.

**CRYPTOCEPHALUS**, kri'p-to-sef'a-hed, and *kephale*, the head, Gr.) A genus of insects: Family, Chrysomelidæ.

**CRYPTOCERUS**, kri'p-toe'e-rus, s. (*kryps*, a horn, Gr.) A genus of Hymenopt.

**CRYPTOCONCHUS**, kri'p-to-kong'kua, s. (*kogchle*, a shell, Gr. *conchus*, Lat.) A by some conchologists to such of the have their shelly plates entirely concealed investing border. The plates of moderate, and entirely covered with of the zone, each plate having two tubular pores, the anterior one has Cyclobranchia.

**CRYPTOCORYNE**, kri'p-to-kor'e-ne, s. (*koryne*, a club, Gr.) A genus of pl.

**CRYPTOCORYNEÆ**, kri'p-to-ko-ria'e-e, *coryne*, one of the genera.) A fact of the natural order Araceæ, in which are distinct from the pistils, which are whorled round the base of the others combined into a many-celled ov.

**CRYPTODISCUS**, kri'p-to-dis'kus, s. (*diskos*, a quoit, Gr.) A genus of s.

**CRYPTOGAMIA**, kri'p-to-ga'mi-a, s. *gamia*, marriage, Gr. from the crysation being concealed.) The name Linnean arrangement to the Cellular system.—See Acotyledonæ.

**CRYPTOGAMIAN**, kri'p-to-ga'me-an, }  
**CRYPTOGAMIC**, kri'p-to-ga'mik, }  
**CRYPTOGAMOUS**, kri'p-to-ga'mus, } Cryptogamia.

**CRYPTOGAMIST**, kri'p-to-ga'mist, a versed in cryptogamic botany.

**CRYPTOGLOTTIS**, kri'p-to-gloi'tis, s. *glotta*, the tongue, Gr.) A genus of der, Orchidaceæ.

**CRYPTOGRAMMA**, kri'p-to-gram'ma, s. *gramma*, a letter or mark, Gr.) Ferns: Order, Polypodiaceæ.

**CRYPTOGRAPHER**, kri'p-to-gra'fur, s. *grapho*, I write, Gr.) One who writes characters.

**CRYPTOGRAPHICAL**, kri'p-to-gra'fik, ten in secret characters.

**CRYPTOGRAPHY**, kri'p-to-gra'fi, s. writing secret characters; cyphers; ters.

CRYPTOLEPIS—CRYPTOSPILERIA.

**LEPIS**, krip-to-le'-pes, *s.* (*krypto*, I hide, and *scale*, Gr. in reference to the scales in the of the corolla.) A genus of East Indian shrubs: Order, Apocynaceae.

**LOGY**, krip-to-lo'-je, *s.* (*krypto*, and *logos*, a word, Gr.) Enigmatical language.

**LOPHOS**, krip-to-lo'-fa, *s.* (*krypto*, and *lophos*, a hook, Gr.) A genus of birds belonging to the ally Muscipinae, or Fly-catchers.

**MERIA**, krip-to-me'-re-a, *s.* (*krypto*, and *a portion*, Gr.) A genus of Pine-trees: Cupressaceae.

**MYCETES**, krip-to-mi'-se-tes, *s.* (*krypto*, and *a mushroom*, Gr.) A genus of small Fungi, on willow branches: Tribe, Ascomycetes.

**NEMLA**, krip-to-ne'-me-a, *s.* (*krypto*, and *a thread*, Gr.) A genus of Sea-woods: Ceramaceae.

**NYX**, krip-to-nika, *s.* (*krypto*, and *onyx*, a Gr.) A genus of birds of the Grouse or Ge kind, so named from the hinder toe being a claw. The head is conspicuously crested: Tetracnidae.

**PETALUM**, krip-to-pe'-ta-lum, *s.* (*krypto*, and *a petal*, Gr. the petals being minute and in the calyx.) A genus of annual plants, of Chili: Order, Saxifragaceae.

**PHAGOS**, krip-to-fa'-gus, *s.* (*krypto*, and *I eat*, Gr.) A genus of minute Coleopter insects found in fungi and on flowers: some live in damp cellars: Family, Engidae.

**PHAGMIUM**, *s.* (*krypto*, and *phragma*, a Gr.) A genus of plants: Order, Acan-

**PODA**, krip-top'-o-da, *s.* (*krypto*, and *pous*, a Gr.) A section of the Brachyurans, or called Crustacea, remarkable for a vaulted of the posterior extremities of their under which their feet, except the two an- claws, can be completely retracted and con-

**RYPTORHYNCHUS**, krip-to-ring'-ko-des, *s.* (*cryptos*, one of the genera.) A family of insects, containing above twenty ge- The insects of this family have characters with Cryptorhynchus, the antennae of short and twelve-jointed; the funiculus of the first joint rather larger than the the club oval, or oblong-oval; rostrum moderate and rather arched; thorax broader than and furnished with tufts on the anterior elytra ovate, covering the abdomen; acuticinct; legs moderate, and often armed spines beneath. Upwards of ninety species genera are natives of Britain.

**RYPTORHYNCHUS**, krip-to-ring'-kus, *s.* (*krypto*, and *the mouth*, Gr.) A genus of Coleopter insects. — See Cryptorhynchides.

**SEMIUM**, krip-to-aper'-mum, *s.* (*krypto*, and *a seed*, Gr. from the seed, or rather a seed, being hidden in the involucre.) A of tropical weeds: Order, Valerianaceae.

**SEMIUM**, krip-to-se'-ro-a, *s.* (*krypto*, and

CRYPTOSTEGIA—CRYSTALLIZE.

*sphaero*, a sphere, Gr.) A genus of Fungi: Sub-order, Gasteromycetes.

**CRYPTOSTEGIA**, krip-to-ste'-je-a, *s.* (*krypto*, and *stego*, I cover, Gr. in reference to the scales in the throat covering the anthers.) A genus of plants, with opposite leaves, and large showy purple flowers, natives of the East Indies: Order, Asclepiadeae.

**CRYPTOSTEMMA**, krip-to-stem'-ma, *s.* (*krypto*, and *stemma*, a crown, Gr. the scaly crown of the grains being involved in wool.) A genus of tender annuals, natives of the Cape of Good Hope: Order, Compositae.

**CRYPTOSTYLIS**, krip-to-s'te'-lis, *s.* (*krypto*, and *stylis*, a style, Gr.) A genus of plants: Order, Orchidaceae.

**CRYPTOTANIA**, krip-to-te'-ne-a, *s.* (*krypto*, and *teinia*, vitta, Gr. from the vitta of the mericarps being hidden by a pericarp.) A genus of plants, consisting of erect herbs with white flowers: Order, Umbellaceae.

**CRYPTOTHECA**, krip-to-the'-ka, *s.* (*krypto*, and *theca*, a cover, Gr. from the capsule being hidden by the calyx.) A genus of plants, consisting of suffruticose branched herbs, with minute axillary flowers, natives of Java: Order, Lythraceae.

**CRYPTURUS**, krip-to-urus, *s.* (*krypto*, and *oura*, a tail, Gr. from the tail feathers being concealed and confounded with the upper covers.) A genus of birds of the Grouse kind, natives of tropical America: Family, Tetracnidae.

**CRYPTUS**, krip'tus, *s.* A genus of Hymenopterous insects: Tribe, Ichneumonidae.

**CRYSTAL**, kris'tal, *s.* (*krysallos*, Gr. *crystallus*, Lat. probably from *kryos*, ice, and *cello*, I set, Gr.) A body formed in the processes of consolidation into a symmetrical figure, through the agency of chemical affinity, and the peculiar form of the molecules of which it is composed; glass used in the manufacture of drinking-vessels, chandeliers, &c. Rock-crystal, colourless transparent quartz.

**CRYSTALFORM**, kris'tal'-fawrm, *a.* Having the form of crystal.

**CRYSTALLINE**, or **CRYSTALLINE**, kris'ta-llin, or kris'ta-line, *a.* Consisting of crystal; bright; clear; pellucid; transparent. *Crystalline heavens*, in ancient Astronomy, two orbs supposed between the *primum mobile*, or first power, and the firmament, in the Ptolemaic system. *Crystalline humour of the eye*, an extremely white transparent firm substance, formed like a glass lens, to converge rays of light, situated behind the iris, in the vitreous humour of the eye.

**CRYSTALLIZABLE**, kris-tal-li'-za-bl, *a.* That may be crystallized; that may be formed into crystals.

**CRYSTALLIZATION**, kris-tal-li'-za-shun, *s.* The act by which the particles of gaseous and liquid bodies, during conversion into solids, attach themselves in a certain order, so as to form symmetrical bodies or crystals. Every perfect crystal is bounded by plane surfaces, which are called its faces; the straight line formed by the intersection of two faces, is called an edge; the meeting of three or more edges in a point, forms a solid angle. Crystals are simple or compound: a simple form has all its faces equal and similar to each other; while a compound form of crystal is bounded by at least two different classes of faces.

**CRYSTALLIZE**, kris'tal-lize, *v. a.* To cause to concrete in crystals; — *v. n.* to be converted into a

crystal; to unite as the separate particles of a substance; to concrete.

**CRYSTALLOGRAPHER**, kris-tal-log'gra-fur, *s.* (*crystal*, and *grapho*, I write, Gr.) One who describes crystals, or the mode of their formation.

**CRYSTALLOGRAPHIC**, kris-tal-lo-graf'ik, }

**CRYSTALLOGRAPHICAL**, kris-tal-lo-graf'fo-kal, }

*a.* Relating to crystallography.

**CRYSTALLOGRAPHICALLY**, kris-tal-lo-graf'fo-kal-le, *ad.* In the manner of crystallography.

**CRYSTALLOGRAPHY**, kris-tal-log'gra-fe, *s.* The doctrine or science of crystallization.

**NOTE**.—The above words are usually spelled with a double *t*, in conformity with the Greek and Latin; but Webster spells them with only one *t*: either way may be considered as correct.

**CRYSTALWORTS**, kris'tal-warts, *s.* A name given by Lindley to his natural order Rieineeae. —Which see.

**CTENACANTHUS**, ten-a-kan'thus, *s.* (*ktenion*, and *akanthos*, a spine, Gr.) A genus of fossil fishes of the Placoid order of Agassiz, found in the mountain limestone and old red sandstone formations.

**CTENIPUS**, te'ne-pus, *s.* (*kteis*, a comb, and *pous*, a foot, Gr.) A genus of Coleopterous insects: Family, Carabidae.

**CTENISTES**, te-nis'tes, *s.* (*ktenistes*, one who combs hair, Gr.) A genus of Coleopterous insects: Family, Pselaphii.

**CTENITUM**, ten'e-um, *s.* (*ktenion*, a little comb, Gr.) A genus of plants: Order, Graminaeae.

**CTENOBRAUCHIATA**, ten-o-brug'ke-ny-ta, *s.* (*ktenion*, and *branchia*, gills, Gr.) A name given by some naturalists to the Pectinobrauchiata of Cuvier; applied to those gasteropods which have pectinated branchiae.

**CTENODACTYLA**, ten-o-dak'te-la, *s.* (*ktenion*, and *daktylos*, a finger, Gr.) A genus of Coleopterous insects: Family, Carabidae.

**CTENODUS**, ten'o-dea, *s.* (*ktenion*, a little comb, Gr.) A genus of Coleopterous insects: Family, Cerambycidae.

**CTENODUS**, ten'o-dus, *s.* (*ktenion*, and *odus*, a tooth, Gr.) A genus of fossil fishes from the carboniferous formation; also, a genus of Algae: Order, Ceramiaeae.

**CTENOID**, te'noyd, *a.* (*kteis*, or *ktenion*, a comb, and *eidos*, resemblance, Gr.) Comb-shaped; having the appearance of a comb; applied by Professor Agassiz to those fishes, the scales of which, like those of the perch, are pectinated on their posterior margin.

**CTENOIDEA**, te-noy'de-a, } *s.* (*kteis*, a comb, and *eidos*, resemblance, Gr.) An order of fishes, according to the arrangement of Agassiz. They are so named from the posterior margin of the scales resembling the teeth of a comb, as in those of the perch. Fishes of this order do not appear to have existed previous to the cretaceous period.

**CTENOIDEAN**, te-noy'de-an, *a.* Belonging to the third order of fishes, according to the arrangement of Agassiz.

**CTENOLEPIS**, ten-o-le'pis, *s.* (*ktenion*, and *lepis*, a scale, Gr.) A genus of Ctenoid fishes from the Oolite formation.

**CTENOMERIA**, ten o-me're a, *s.* (*ktenion*, and *meria*, a part, Gr.) A genus of plants: Order, Euphorbiaceae.

**CTENOPHORA**, te-nof'o-ra, *s.* (*ktenion*, and *phora*, Gr.) A genus of Dipterous insects: Nemoscera.

**CTENOPUS**, ten'o-pus, *s.* (*ktenion*, and *pous*, Gr.) A genus of Coleopterous insects: Family, Trachilidae.

**CTENOSTOMA**, te-nos'to-ma, *s.* (*ktenion*, and *stoma*, the mouth, Gr.) A genus of Coleopterous insects: Family, Carabidae.

**CEN**, kub, *s.* The young of certain young boy or girl, in a contemptuous stall for cattle; applied in the following the young of a whale:

Two mighty whales, which swelling sea  
One as a mountain vast, and with her  
A cub, not much inferior to his dams —

—*c. a.* to bring forth a cub or cubs, a woman in contempt; to shut up in a stall.

**CINATION**, ku-ba'shun, *s.* (*cubitus*, Lat.) of lying down.

**CUBATORY**, ku'ba-tur-e, *a.* Recumbent down.

**CUBATURE**, ku'ba-ture, *s.* The finding of solid contents of a body.

**CUBE**, kube, *s.* (*kubos*, Gr. *cubus*, Lat.) metry, a regular solid body, with six faces, each of which is a square, that is, a surface by four lines equal to each other, and by right angles. In Arithmetic, the product number multiplied into itself, and then multiplied by the same number; as,  $4 \times 4 \times 4 = 64$ , the cube of four. *Cube-root*, the number or quantity which, multiplied by itself, then into the product, produces the cube; the preceding example being the cube of 4. *Cubo ore*, hexahedral olivinite, or a mineral of a green colour.

**CUBES**.—See Cubea.

**CUBEBA**, ku-be'ba, *s.* (*cubabai*, Arab.) A plant, the berries of which are called *Cubeba* Piper cubeba of Linnaeus. The dried fruit of an ash-brown colour, generally with a ressembling pepper. They form a pungent spice, with an agreeable smell, and are used in India and Java as a cure for the venereal disease. **CUBEHINE**, ku-be'hine, *s.* A vegetable found in the seeds of Piper cubeba. It is crystallizable, and tasteless. Its formula is  $C_{17}H_{19}O_9$ .

**CUBIC**, ku'bik, } *a.* Having the form of a cube. **CUBICAL**, ku'be-kal, } parties of a cube may be contained within a cube. *Cubic*, in Arithmetic, a number produced by multiplying a number into itself twice; thus,  $27$  is a cubic number—because,  $3$  multiplied by  $3$ , and the product afterwards by  $3$ , makes  $27$ .

**CUBICALITY**, ku'be-kal-le, *ad.* In a cubic quality of being cubical.

**CUBIC EQUATION**, ku'bik e-kwa'shun, *s.* An algebraic equation in which the unknown quantity rises to the third or cubic degree.

**CUBICULAR**, ku-bik'u-lar, *a.* (*cubiculum*, Lat.) relating to a chamber.

**CUBICULARY**, ku-bik'u-la-re, *a.* The posture of lying down.

**CUBIFORM**, ku'le-fawrm, *a.* Having the form of a cube.

**CUBITAL**, ku'be-tal, *a.* Containing the measure of a cubit.

ku-be-tal, *a.* (*cubitus*, the forearm, Lat.)  
to the forearm; *cubital artery*, the ulnar  
*cubital nerve*, the ulnar nerve.

**CUTICLE, kut'e-kl, s. (cuticula, Lat.)** In Anatomy, the epidermis, or scarf skin, the delicate and transparent membrane, which, destitute of nerves and blood-vessels, invests the whole surface of the skin, with the exception of the parts occupied by the nails. In Botany, the thin, and generally colourless, pellicle which covers the exterior of plants, and which is easily detached from the vegetable structure.

## CUVETTE—CYANITE

DIAPYCNITE,  $\text{Ca}_2\text{Si}_2\text{O}_7$ , A mineral of

**NOGEN-CYANURIC.**

It occurs regularly crystallized; and disseminated; texture foliated; fragments splintery. It is composed 4.80; silica, 34.33; with a trace of small portion of lime.

*Prussian blue*, *a.* (*Azyanur*, blue, and *gymno-* reduced, Gr. because it is an essential Prussian blue.) A substance which compound radical with oxygen, hydro- of the other non-metallic elements; the metals. It is composed of 12 carbon and 14 of nitrogen: its for- its symbol, Cy; equivalent = 26. gas of a strong and peculiar odour, of rubbed peach leaves. It is ob- cyanuret of mercury under a three or four atmospheres, when it rapid liquid. It is highly poisonous, contact with air with a rich purple hydrogen it produces hydrocyanic and with the metals, cyanurets or the oxygen it forms cyanic acid,  $CyO$ ; azotic acid,  $CyO + HO$ ; fulmic acid, azuric acid,  $Cy^2O_3$ ; hydrated cyanuric +  $3HO$ .

*o-nom'e-tur, s. (kyano, and me-*  
re, Gr.) An instrument invented by  
ascertaining the deepness of the blue  
somewhere. It is formed of a band of  
pasteboard, divided into fifty-one  
which is painted of a different shade  
rising gradually from the deepest to  
blue. It is held in the hand, the ob-  
ject at the time which of the blues re-

*Grav's disease*. The Blue disease, called  
*Grav's disease*, an affection in which the whole  
 body exhibits a blue or purple colour,  
 arising from a communication between  
 the pulmonary cavities of the heart, or  
 between the circulation existing in

di-a-nos'e-ri, s. (*Kynos*, Gr.) A composite plant: Suborder, Labiati-

*si-an-o-sper'itum*, s. (*hymos*, and  
ed. Gr.) A genus of Leguminous  
order, Papilionaceæ.

noises, & (*lyones*, and *olos*, the ear,  
of plants: Order, *Commelynaceæ*.  
of birds of the *Grouse* kind, natives  
family, *Tetraonidæ*.

di-an'o-tipe, *n.* A modification of

*helius*, s. (*hyme*, a helmet, and *an-*  
Gr.) A genus of Humming-birds:  
514g.

**Cyanurate of Potassa**, *s.* A salt formed with cyanic acid and a soluble base. *Cyanurate of Potassa*, in white crystals, formula,  $2\text{HO} + \text{KO} + \text{C}_3\text{N}_3$ . *Cyanurate of Silver*, a white precipitate:  $\text{HO} + \text{C}_3\text{N}_3 + (\text{Ag})$ .

si-an'u-nk as'id, *n.* An acid in

CYANURUS—CYBIUM.

the form of oblique, rhombic, colourless, inodorous prisms. It is a tribasic: the formula of its hydrate is  $\text{Cy}^{3}\text{O}^{3} + 3\text{HO} = 130.17$ .

**CYANURUS**, si-an'u-rus, *s.* (*kyanos*, and *oura*, the tail, Gr.) A genus of birds belonging to the Garruline, or Java: Family, Corvidæ.

**CYAR**, si'ar, *s.* (*kyar*, the eye of a needle, Gr.) In Anatomy, the internal auditory foramen.

**CYATHEA**, si-a'the-a, *s.* (*kyathos*, a cup, Gr.) A genus of Ferns: Order, Polypodiaceæ.

**CYATHACEÆ**, *si-a-thee-s*. (*Cyathæa*, one of the genera.)  
A family of plants of the order Polypodiaceæ, distinguished by the spore-cases having a vertical ring, usually sessile, on a more or less elevated receptacle, and the spores being three-cornered or three-lobed.

**CYATHIFORM**, si-ath'o-fawrm, a. (*cyathus*, a cup, and *forma*, a shape, Lat.) In the form of a cup; cup-shaped.

**CYATHISCUS**, si-a-this'kus, *s.* (*kyathos*, a cup, Gr.)  
A probe, with a hollow at the end of it, to remove  
wax, &c. from the ear.

**CYATHOCLINE**, si-a-thok'le-ne, *a.* (*kyathos*, a cup, and *kline*, a couch, Gr.) A genus of Composite plants: Suborder. Tubulifloræ.

**CYATHOCOMA**, si-a-thuk'o-ma, s. (*kyathos*, and *kome*, foliage, Gr.) A genus of plants: Order, **CYPERACEÆ**.

**CYATHOCHINITES**, *si-a-tho-kre-ni'tes*, *s.* (*cyathus*, a cup, and *crinin*, a lily, Lat.). A genus of fossil Crinoidæ from the carboniferous limestone, in which the pelvis is formed of five plates, with five costals; the fingers of a single series of joints; column not enlarged; articulating surface of the columnar joints radiated; axillary side-arms round, and placed irregularly.

**CYATHODES**, *si-a-tho'-des*, *s.* (*kynthos*, a cup, and *odus*, a tooth, Gr. in reference to the disk, which is cup-shaped and five-toothed.) A genus of plants with funnel-shaped flowers, natives of Van Diemen's Land: Order, Eupacridaceæ.

**CYATHODIUM**, si-a-tho'de-um, s. (same as Cyathodes.) A genus of plants: Order, Marchantiaceae.

**CYATHOPHYLLOUS**, si-a-tho-fil'us, *a.* (*kythos*, a cup, and *phyllon*, a leaf, Gr.) Having cup-shaped leaves.

**CYATHUS**, *si'-thus*, *s.* (*Kyethos*, Gr.) A drinking cup; an ancient Roman liquid measure, equal to the twelfth part of a sextarius, or about two ounces of water or wine; also, a solid measure equal to two drachms. In modern Medical prescription, the term *cyathus* means a wine glass which is estimated to contain  $\frac{1}{2}$  fl. oz.; also, a genus of Fungi: Tribe, Gasteromycetes.

CYBELE, si-be'la, *s. (kybele, Gr.)* In Mythology, a name given originally by the Phrygians to the goddess of the earth. Her worship was afterward introduced among the Greeks, who confounded her with their Rhea, as the Latins, at a later period with their Ops. Her rites were celebrated with frantic gestures, howlings, clashing of cymbals, &c. The priests of Cybele were known by the different names of Corymbantes, Galli, Curetes, &c.

STYLIANTHUS, sib-e-an'thus, *s.* (*kybos*, a square, and *anthos*, a flower, Gr. in reference to the square form of the corolla.) A genus of small trees natives of Brazil: Order. Myrsinacæ.

CYBICUM, sib'e-um, *s.* (*lybion*, Gr.) A genus of fishes, in which the body is rather elongated, the

scales small and of equal size; the teeth sharp, large, and compressed; the mouth large, and opening beyond the eyes. Family, Scomberide.

**CYCADEE**, si-ka-de-e, } *s. (cycas, one of*

**CYCADACEE**, si-ka-de-a'se-e, } the genera.) A

natural order of the class Gymnosperms, or Gymnogens of Lindley, consisting of trees or shrubs with a simple continuous stem, parallel-veined pinnate leaves, and antheriferous cone scales; and in their general aspect approaching the palms. In their structure they form, or are rather allied to, the Ferns on the one hand, and the Firs on the other, than to the Palms. They are natives of the tropics, and temperate parts of America and Asia.

**CYCADITES**, si-ka-de-tes, *s.* A name given to certain fossil species of the Cycadaceæ.

Our fossil cycadites are closely allied, by many remarkable characters of structure, to existing Cycadæ.—*Dr. Buckland.*

**CYCAS**, si'kas, *s. (kykas of Theophrastus.)* A genus of plants: Type of the order Cycadaceæ.

**CYCHLA**, sik'la, *s.* A genus of fishes, in which the mouth is large, the under jaw longest, dorsal fin slightly emarginate and naked, and the teeth very small: Subfamily, Labrini.

**CYCLAMEN**, si'klu-men, *s. (kyklos, a circle, Gr. on account of the numerous coils of the fruit stalks.)* A genus of plants, with bulbous roots and beautiful flowers: Order, Primulaceæ.

**CYCLAMINE**, si'kla-min, *s.* A non-azotized vegetable principle found in the root of the plant *Cyclamen Europæum*. It crystallizes in fine white needles, of a burning acid taste, and possessed of emetic and purgative properties.

**CYCLANTHACEÆ**.—See Pandanaceæ.

**CYCLANTHUS**, si-klan'the-us, *s. (cyclanthus, one of the genera.)* A family of plants of the natural order Pandanaceæ, in which the flowers are usually furnished with a calyx, and the leaves flabellate or pinnate.

**CYCLANTHERA**, si-klan'the-ra, *s. (kyklos, and anthera, an anther, Gr.)* A genus of plants: Order, Cucurbitaceæ.

**CYCLANTHUS**, si-klan'thus, *s. (kyklos, and anθος, a flower, Gr.)* A genus of plants: Order, Pandanaceæ.

**CYCLARTHUS**, si-klar'thus, *s. (kyklos, a circle, and arthros, a joint, Gr.)* A genus of fossil fishes, from the Lias of Lyme Regis.

**CYCLAS**, si'klay, *s. (kyklos, a circle, Gr.)* A genus of Mollusca, type of the subfamily Cyclinæ. The shell is thin, transversely ovate, equilateral; cardinal teeth small; lateral teeth 2, long and compressed; the ligament external: Family, Tellinidæ.

**CYCLE**, si'kl, *s. (kyklos, a circle, Gr.)* In Chronology, a certain period or series of years, which regularly proceed from the first to the last, and then return again to the first, and circulate perpetually. *Cycle of the sun*, a revolution of twenty-eight years, in which time the days of the month return again to the same days of the week, and the sun's place to the same signs and degrees of the ecliptic on the same month and days. *Cycle of the moon*, commonly called the golden number, a revolution of nineteen years, in which time the conjunctions, opposition, and other aspects of the moon, are within an hour and a half of being the same as they were on the same days of the month nineteen years before. *Cycle of indiction*, a period of fifteen years, in use among the ancient

Romans, commencing from the third of Christ; an imaginary orb or circle in

**CYCLIC**, si'klik, } *a. Pertaining*

**CYCLICAL**, si'kle-kal, } to a circle.

**CYCLINÆ**, si'klin-e, *s.* A subfamily of fishes, the animal generally fusiform, and covered by an epidermis.

**CYCLOBOTHA**, si-klo-bot'h-ra, *s. (kyklos, a circle, and bothe, a small excavation or pit, Gr.)* A genus of plants: Order, Liliaceæ.

**CYCLOBRANCHIA**, si-klo-brang'ke-a, *s.*

**CYCLOBRANCHIANS**, si-klo-brang'ke-an, *s.*

**CYCLOBRANCHIATA**, si-klo-brang'ke-a-ta, *s.*

*chia, gills, Gr.)* An order of Mollusca, the organs of respiration are branched in the form of foliated branches placed very near the vent, which is situated on the medial line of the posterior part of the skin is naked, and more or less naked. The Cyclobranchians of Cuvier form the order of his Gastropods, and contain Patella and Clitons.

**CYCLOCÆLUS**, si-klo-se'lus, *s. (kyklos, a circle, and celus, the intestine, Gr.)* used by Ehrenberg for those Infusoria, their intestines disposed in a circular form.

**CYCLOCANTHA**, si-klo-kan'tha, *s. (kyklos, a circle, and akantos, a spine, Gr.)* A genus of plants, belonging to the Genetinae, or Snake-shells. The shell is subdepressed, trochiform, and perforate; the mouth slightly oblique: Family, Trochidae.

**CYCLOCENTYLE**, si-klok-o-se'le, *s. (kyklos, a circle, and entyle, a leaf, Gr.)* A genus of intestinal worms: Family, Paracanthidae.

**CYCLOHERMA**, si-klo-der'ma, *s. (kyklos, a circle, and herma, the skin, Gr.)* A genus of fungi: Family, Mycetozoidæ.

**CYCLOGRAPH**.—See Archograph.

**CYCLOID**, si'kloyd, *s. (kyklos, and eidos, a form, Gr.)* A curve generated by the motion of a point on the periphery of a circle, while the circle revolves on a right line, till that point has touched the line at the beginning, and be brought back to touch it again.

**CYCLOIDAL**, si-kloy'dal, *a.* Relating to a cycloid.

**CYCLOIDEAN**, si-kloy'd-e-an, *a.* Pertaining to a cycloid.

**CYCLOIDEANS**, si-kloy'd-e-ans, *s.* (kyklos, a circle, and eidos, appearance, Gr.) A name given to one of his four great orders of fishes, distinguished by the scales being round, like salmon and herring.

**CYCLOLITE**, si'klo-lite, *s. (kyklos, and lithos, a stone, Gr.)* A name sometimes given to a genus Madrepora.

**CYCLOMITES**, si-klo-mi'tes, *s. (kyklos, a circle, and mitos, a measure, Gr.)* A genus of fossil corals, belonging to the Madrepora family.

**CYCLOPOMA**, si-klo-po'ma, *s. (kyklos, a circle, and poma, a podium, Gr.)* A genus of plants: Family, Podiaceæ.

**CYCLOMETRY**, si-klo-met'ry, *s. (kyklos, a circle, and metron, a measure, Gr.)* The art of measuring circles.

**CYCLONASRA**, si-klo-nas'sa, *s. (kyklos, a circle, and nasas, a cognate genus, Gr.)* A genus of Mollusca, in which the shell is univalve, compressed, and nearly round; the base not defined; pillar broad and flattened.

**CYCLOPEA—CYCLOTUS.**

ected: Subfamily, Cassius: Family,

*si-klo-pe-a*, *s.* (*kyklos*, a circle, and *pous*, in allusion to the replicate circle which and the base or foot of the pods.) A plants, consisting of elegant, smooth, Leguminous shrubs, with sessile tri- and yellow flowers, natives of the Good Hope: Suborder, Papilionaceæ.

*si-klo-pe'an*, *a.* Relating to the *si-klo'pik*, } *Cyclops*; vast; terri-  
fic; savage.

*si-klo-pe-don*, *s.* (*kyklos*, and *poiein*, to make, or to do, *dein*, instruction, circle of knowledge, embracing the entire the arts and sciences; a book of univer-  
sal knowledge.

*si-klo-pe-ra*, *s.* (*kyklos*, and *phora*, to carry, *Gr.*) A genus of Mollusca, belonging to the *si-klo-pe-de*, or common land-snails, the shell is turritate, the spire short and pointed, the aperture very large, and the aperture entire: Malicide.

*si-klo-pe-um*, *s.* A genus of fishes, the eyes are very minute: Family, Silu-

*si-klo-pa*, *s.* (Latin, from *kyklos*, and *ops*, to look, *Gr.*) In fabulous History, the sons of and Amphitrite, said to have been above in number; Jupiter threw them into as soon as they were born, but they were at the intercession of Tellus, and became sons of Vulcan. They were of prodigious and had each only one eye, which was in the middle of their foreheads: they are represented as forging the thunderbolts, and again as the first inhabitants of the dwelling round Mount Etna.

*si-klo-pe-de*, *s.* (*Cyclopterus*, a genus.) The Lump-suckers, a family of fishes, in which the body is with- and slimy; the pectoral fins very broad.

*si-klo-pe-ter-is*, *s.* (*kyklos*, and *pteron*, a wing, *Gr.*) A genus of fossil Ferns, in which the of a round or oval shape: they occur in formation.

*si-klo-pe-ter-us*, *s.* (*kyklos*, and *pteron*, a wing, *Gr.*) A genus of fishes, in which the body is short, thick, and slimy, without having rows of thick cone-shaped tu- Type of the family Cyclopteridæ.

*si-klo-pe-ter-us*, *s.* (*kyklos*, a circle, *Gr.*) A genus of Gastropodous mollusca. Also, a Entomotracheans with very minute and delicate.

*si-klo-pe-ter-us*, *s.* A term applied to the the vital fluids in plants.

*si-klo-pe-ter-us*, *s.* (*kyklos*, a circle, and *stoma*, a mouth, *Gr.*) A genus of plants: Maloidæ.

*si-klo-pe-ter-us*, *s.* (*kyklos*, and *stoma*, a mouth, *Gr.*) A genus of Gastropodous mollusca, the aperture of the shell is round. Also, Cartilaginous fishes, in which the mouth is by a large circular lip, forming a large in the tongue.

*si-klo-pe-ter-us*, *s.* (*kyklos*, and *stoma*, a mouth, *Gr.*) Having a circular mouth.

*si-klo-pe-ter-us*, *s.* (*kyklos*, round, *Gr.*) A Mollusca, in which the shell is nearly

**CYCLURA—CYLINDRICALLY.**

disoid without a pillar, the spire scarcely raised, and the tip obtuse; a small siphon is situated at the top part of the aperture.

*CYCLURA*, *si-ku'ra*, *s.* (*kyklos*, and *oura*, a tail, *Gr.*) A genus of reptiles, having the general form of the Iguana, with a thick tail, and the neck and back furnished with a crest of strong spines: Family, Iguanidæ.

[The following compounds connected with *cyclo*, round, are used in Natural History. — *Cyclocaryus*, round-toothed. *Cycloxyler*, round-bellied. *Cycloctus*, having a circle round the back; *Cyclophyllus*, round-leaved; *Cyclopterus*, round-winged or finned; *Cyclostelia*, having circular papillæ; *Cyclosporus*, round-seeded; *Cyclostomus*, round-mouthed; *Cyclotus*, round-tailed.]

*CYCNIUM*, *si-ku'ne-um*, *s.* (probably from *kyklos*, a swan, but for what cause unknown.) A genus of rigid scabrous herbaceous plants, natives of Africa: Order, Scrophulariaceæ.

*CYDER*—See *Cider*.

*CYDONIA*, *si-do'ne-a*, *s.* (*Cydon* in Candia.) The Quince, a genus of plants, consisting of trees and shrubs. The fruit of *C. vulgaris* is used as a marmalade: the seeds are used in medicine: Order, Rosaceæ.

*CYDONIUM*, *si-do'ne-um*, *s.* A genus of coralline Zoophytes, having a coriaceous skin, internally caraneous, with numerous straight spicula perpen- dicular to the surface; polypi with a central open- ing, and an orifice at the base of the eight pin- nated tentacula.

*CYGNET*, *si-ku'net*, *s.* (dim. of *cygnus*, a swan, Lat.) A young swan.

*CYGNUS*, *si-ku'na*, *s.* (Latin.) In Ornithology, the Swan, a genus of natatorial birds, belonging to Ana- tidæ, or Duck family: Subfamily, Anserinæ. The swans are large; have the bill fleshy, tumid, and naked; neck remarkably long; feet black and short. The tame swan, *C. mansuetus*, is a native of eastern Europe and Asia, and is chiefly kept as an ornament on the private lakes or other enclosed waters of the wealthy. The wild swan, *C. ferus*, is not so large as the tame. It builds its nest in rushes on the margin of lakes; its eggs are usually five in number, and of an olive green colour with a white crust. In Astronomy, a constellation in the northern hemisphere, the bright stars in which, with those of *Lyra* and *Aquila*, form a remarkable triangle.

*CYLINDER*, *si-lid'rus*, *s.* A genus of Coleopterous insects: Family, Cleridæ.

*CYLINDER*, *si-lin'dur*, *s.* (*kylindros*, *Gr.*) A solid having two equal ends parallel to each other, and every plain section parallel to the ends; also a circle, and equal to them. *Cylinder of a steam-engine*, that part of a steam-engine in which the piston moves, and in which the motion of the whole is produced by the alternate admission and condensation of steam from the boiler.

*CYLINDRACEOUS*, *si-lin'dra'shus*, *a.* Partaking of the nature of a cylinder.

*CYLINDRIC*, *si-lin'drik*, *a.* of the nature of a cylinder.

*CYLINDRICAL*, *si-lin'dre-kal*, *a.* of a cylinder. *Cylindrical vault*, in Architecture, a vault on groins resting on two parallel walls; termed also a barrel, waggon-head, or cradle-vault.

*CYLINDRELLA*, *si-lin'drel'la*, *s.* (dim. of *cylinder*.) A genus of Mollusca, belonging to the subfamily Ovidinæ, in which the shell is cylindrical, narrow, and obtuse: the upper lip smooth, and no plaits on the pillar: Family, Cypridæ.

*CYLINDRICALLY*, *si-lin'dre-kal-le*, *ad.* In the man- ner of a cylinder.

## CYLINDRICITY—CYMBOCARPUM.

## CYMBULIA—CYNANTHROP

**CYLINDRICITY**, se-lin-dris'e-ty, *a.* A cylindrical form.

**CYLINDRIFORM**, se-lin'dre-fawrm, *a.* Having the form of a cylinder.

**CYLINDRODES**, se-lin'dro-des, *s.* A genus of apterous cylindrical-shaped insects: Family, Phasminæ.

**CYLINDROID**, sil'in-droyd, *s.* (*cylinder*, and *eidos*, form, Gr.) A solid body approaching to the figure of a cylinder, but differing in some respects, as having the bases elliptical, but parallel and equal.

**CYLINDROMETIC**, se-lin-dro-met'ik, *a.* Belonging to a scale used in measuring cylinders.

**CYLINDROSPORIUM**, se-lin-dro-spo're-um, *s.* (*cylin-dros*, a cylinder, and *spora*, a seed, Gr.) A genus of Fungi: Tribe, Coniomyces.

[The following combinations occur in Natural History:—(*Cylindrocera*, having the horns or antennæ cylindrical; *Cylindroflora*, having the flowers of a cylindrical shape; *Cylindrocarpus*, having cylinder-shaped seed; *Cylindroides*, like a cylinder.)]

**CYLISTA**, se-lis'ta, *s.* (*kylix*, a cup, Gr. in reference to the calyx being very large.) A genus of plants, consisting of twining Leguminous shrubs, with axillary simple racemes of yellow flowers: Tribe, Phascolææ.

**CYLLÆE**, sil'le-ne, *a.* (*Kyllæ*, bent, or rolled round, Gr.) A genus of small univalve Mollusca, the shell of which is ribbed longitudinally, and sub-conated with tubercles, sometimes cancellated: Subfamily, Eburninæ.

**CYMA**, si'ma, *s.* (Latin.) In Archi-

**CYMATHIUM**, se-ma'the-um, *s.* tecture, an undulating moulding, generally the upper one of a cornice.

**CYMAU**, se-ma'ri, *s.* A slight covering; a scarf.

**CYMAHA**, se-ma're-n, *s.* (*cyma*, a cyme, Lat. in allusion to the flowers being disposed in cymes.) A genus of plants, consisting of shrubs with small cymose flowers: Order, Lamiacææ.

**CYMBÆ**, sim'be, *s.* (*kymbæ*, a boat, Gr.) A genus of Mollusca, in which the shell is obovate, tumid, ventricose, and of a brownish red, covered with a strong brown epidermis; pillar four-plaited: found on the African coasts.

**CYMBAL**, sim'bal, *s.* (*cymbalum*, Lat.) A musical instrument used by the ancients, hollow, and made of brass. The modern *cymbals* are two concave metal plates, which the performer strikes together for the production of clear, sharp sounds.

**CYMBARIA**, sim-ba're-a, *s.* (*kymbæ*, a boat, Gr. in reference to the form of the fruit.) A genus of plants, with opposite leaves and large yellow flowers, usually solitary and sessile: Order, Rhinanthaceæ.

**CYMBIDIUM**, sim-bid'e-um, *s.* (*kymbæ*, a boat, Gr. in allusion to the form of the labellum.) A genus of plants: Order, Orchidaceæ.

**CYMBIFORM**, sim'be-fawrm, *a.* Shaped like a boat.

**CYMBIOLE**, sim-be-ô-la, *s.* (*kymbos*, a boat, Gr.) A genus of Mollusca, belonging to the Volutinæ, or true Volutes, having the spire more produced, but not more than one-half of the aperture; the terminal whorls are regular and sculptured; four plaits on the pillar: Family, Volutidæ.

**CYMBIUM**, sim'be-um, *s.* (*kymbos*, Gr.) The Voluta cymbium, a species of marine Mollusca, known also by the name of the Gondola.

**CYMBOCARPUM**, sim-bo-karp'um, *s.* (*kymbos*, and *karpus*, a seed, Gr. in allusion to the shape of the mericarps, which are hollow in front.) A genus of

small annual fetid plants with white flowers, Araliacææ.

**CYMBULIA**, sim-bu'le-a, *s.* (*Kymbæ*, Gr.) of Mollusca, the shell of which is oblong, pear-shaped: Family, Thecastrinæ.

**CYME**, si'me, *s.* (*cyma*, Lat. *kyma*, a cyme, mode of inflorescence, the general aspect of which resembles an umbel, and agrees in this respect, that its common stalks arise from one centre; but differs in having the branches alternately and variously divided, as in the cyme of the elder; also, a sprout, as of a

**CYMIPEPOUS**, si-mis'ar-us, *a.* (*cyma*, a bear, Lat.) Bearing or producing cymes.

**CYMINORMA**, sim-in-os'ma, *s.* (*kyminon*, and *come*, small, Gr. in reference to the fruit, which is like that of cumin.) A genus of plants, consisting of trees, with leaves and white corymbose flowers: Family, Rosacææ.

## D.

## D—DA.

D is the fourth letter of the English alphabet, and  
the third consonant. D is a dental articulation,  
formed in the voice by applying the top of the  
tongue to the forepart of the palate, and then part-  
ing them with a gentle gust of the breath, the lips  
meanwhile being open. It nearly approaches in  
sound to T. In English it is always uniform, and  
in no case quiescent or mute. As a numeral, D re-  
presents 500, and with a dash over it thus, D̄, it  
denotes 5000. As an abbreviation, D. stands for  
Doctor, as D.D., Doctor of Divinity; D.T., Doctor  
of Theology, or S.T.D., Doctor of Sacred Theology;  
M.D., Doctor of Medicine; A.D., Anno Domini;

tion; a single degree in the scale of generational generation; a rank in the scale of subordination. In Music, a passing from a note or sound more grave or less acute. In Mechanics, the motion of a body towards the centre of the earth, occasioned by the attraction of gravity. The laws of descent are—1. Bodies in an unresisting medium have a uniformly accelerated velocity. When the action of gravity is uniform, the space passed over in a given time is exactly one-half that which would be passed over in the same time by the velocity acquired at the end of the time continued uniformly. 3. The spaces passed in different times are proportioned to the squares of the velocities or the squares of the times. The time of the oblique descent of a body from any chord of a circle, drawn from the highest point of the circle, is equal to the time of descent through the diameter of the circle. 5. The time of descent through all arcs of the same circle is equal. 6. A heavy body falling to the earth under its own gravity is found to descend through 16 feet in the first second, 32 feet in the second second, 48 feet in the third, and so on according to the squares of the times. *Descent*, in Heraldry, expresses the coming of anything from above, as a lion en descent, with his head towards the base points, and lions passant guardant, one towards the chief, and the other towards the base, were leaping down from some high place.

She was worshipped by the Greeks under the name of Artemis: the sudden deaths of women were attributed to her darts, as those of men to the arrows of Apollo. She was invoked as Lucina in childbirth. In later times the name became confounded with Hecate, Proserpina, and Luna, or the Moon. She was generally represented as a healthy active maiden in a hunter's dress, with a handsome but robust countenance. She had temples in almost every city of note, but the most famous was that at Ephesus. She was the reputed daughter of Jupiter and Latona, and sister of Apollo. *Tree of Diana*, a name given to the arborescent form of the crystallized silver which becomes separated when mercury is put into a solution of the nitrate of silver. *Diana monkey*, *Cercopithecus Diana*, the Semia Diana of Linnaeus, or Palatine monkey of Pennant, an African species of the monkey, so named from the crescent-shaped band resembling that ornament which poets and mythologists assign to the goddess Diana. It is very gentle, and about eighteen inches in length, without reckoning the tail, which is about two feet in length.

**DIANANCASMUS, di-a-nan-kas'mus, s.** The reduction of a dislocation.

**DIANATHEROUS, di-an-a-the'rus, a. (dia, and antheros, flowery, Gr.)** Having two anthers, as in *Polanista dianthera*.

**DIANCHORA, di-an'ko-ra, s.** A genus of fossil Conchifera, the shells of which are delicate, adherent, regular, symmetrical, equilateral, subarticulated, and inequivalve; one valve hollowed within and convex without, the other flat; the hinge composed of two distant condyles.

**DIANDRIA, di-an'dre-a, s. (dia, two, and aner, andros, a male or stamen, Gr.)** One of the Linnaean botanical classes, comprehending those plants which have two stamens.

**DIANDRIAN, di-an'dro-an, a.** Having two stamens; belonging to the class Diandria.

**DIANELLA, di-a-nel'la, s. (dim. of Diana, in reference to the species being found in the recesses of forests.)** A genus of plants, chiefly Australian tuberous-rooted perennial herbs, with blue flowers: Order, Liliaceae.

**DIANEMA, di-a-ne'ma, s. (dia, two, and nema, a filament, Gr.)** Having two filaments, as in the pectoral rays of the fish *Lonchichius dianema*.

**DIANTHUS, di-an'thus, s. (deos, divine, and anthos, a flower, Gr. in allusion to the exquisite fragrance and neatness of the flowers.)** A genus of plants, including the pinks, carnations, and sweet-williams: Order, Caryophyllaceae.

**DIAPASON, di-a-pa'son, s. (dia, and pason, of all, Gr.)** In Music, the interval of the octave, so called because it includes all admitted musical sounds. It is also used to denote the compass of any voice or instrument, and by the French to express what is meant by the term *concert-pitch*.

From harmony, from heavenly harmony,  
This universal frame began;

# DIAPEDESIS—DIAPHRAGM.

# DIAPHRAGMATIC—DIARY.

From harmony to harmony.  
Through all the compass of the notes it ran,  
The diapason closing full in man.—*Dryden*.

**DIAPEDESIS**, di-a-pe-de'sia, *s.* (*diapedao*, I leap through, Gr.) The transudation or escape of blood through the coats of a vessel.

**DIAPENSIA**, di-a-pen'se-a, *s.* (the ancient Greek name of the plant *Sanicle*.) A genus of plants, consisting of small tufted American herbs, with salver-shaped corollas and alternate leaves: Order, *Diapensiaceæ*.

**DIAPENSIACEÆ**, di-a-pen-se-a'se-e, *s.* (*diapensia*, one of the genera, Gr.) A natural order of perigynous Exogens, belonging to the Gentian alliance of Lindley. It consists of prostrate under-shrubs, with densely-imbriated leaves and solitary terminal flowers; the calyx consists of five sepals, forming a broken whorl; corolla monopetalous and regular; five stamens, the filaments rising from the margin of the sinus of the corolla; anthers two-celled; ovary superior and three-celled: natives of the north of Europe and North America.

**DIAPENTE**, di-a-pen'te, *s.* (*dia*, and *pente*, five, Gr.) A musical term, signifying the interval of a fifth.

**DIAPER**, di'a-pur, *s.* (*Ypres*, in Flanders, where first manufactured, whence d'Ypres, corrupted into *diaper*.) A kind of ornamented linen used for table-cloths and towels;—*e. a.* to variegate; to diversify; to draw flowers on cloth.

**DIAPERIDÆ**, di-a-per'e-de, *s.* A tribe of Coleopterous insects.

**DIAPERIS**, de-ap'e-ris, *s.* (*dia*, and *apereido*, I fix firmly, Gr.?) A genus of Coleopterous insects: Family, *Taxicornes*.

**DIAPHANED**, di'a-faynd, *a.* (*dia*, through, and *phaino*, I show, Gr.) Transparent.—Little used.

**DIAPHANEITY**, di-a-fa-ne'e-ty, *s.* In Physics, the property of affording passage to the rays of light; transparency.

**DIAPHANIC**, di-a-fan'ik, *a.* Having power to transmit rays of light, as glass; pellucid; transparent; clear.

**DIAPHANOUS**, di-a-fa'nous, *a.* Transparent.

**DIAPHONICS**, di-a-son'iks, *s.* (*dia*, and *phono*, a sound, Gr.) The doctrine of refracted sounds.

**DIAPHORA**, di-af'o-ra, *s.* (*diaphoros*, various, Gr.) A genus of plants: Order, *Cypnoceæ*.

**DIAPHORESIS**, di-a-fo-re'sis, *s.* (*diaphoresis*, dispersion, Gr.) Augmented perspiration or elimination of the humours of the body through the pores of the skin.

**DIAPHORETIC**, di-a-fo-ret'ik, *a.* (*diaphoreo*, I carry through, Gr.) Sodorific, causing perspiration, or rather the discharge of humours through the skin in an imperceptible manner; having the power to increase perspiration.

**DIAPHORUS**, di-af'o-rus, *s.* A genus of Dipterous insects: Family, *Sanystoma*.

**DIAPHRAGM**, di'a-frag, *s.* (*diaphragma*, Gr.) The midriff, or large circular muscular organ situated between the thorax or chest and the abdomen, forming a moveable partition between these two cavities. Its most important office is connected with the function of respiration, being the principal agent both in enlarging the cavity of the thorax in inspiration and extending it in expiration, by virtue of the power it possesses, in common with the other muscles, of alternate contraction and relaxation. It is the antagonist of the ab-

dominal muscles in inspiration, but is not so in vomiting, in the discharge of the contents of the bowels and of the urinary bladder, assisting the expulsion of the contents in part. It is imperfectly developed in birds, and does not exist in the lower animals. The term is applied to the straight calcareous plate which divides the cavity of certain shells into two parts.

**DIAPHRAGMATIC**, di-a-frag-mat'ik, *a.* pertaining to the diaphragm.

**DIAPHRAGMATITIS**, di-a-frag-ma-ti'tis, *a.* inflammation of the diaphragm, or of its peritoneum.

**DIAPHTHORA**, di-af'tho-ra, *s.* (*diaphthoro*, I corrupt, Gr.) In Pathology, the corruption of a part.

**DIAPHYSIS**, di-a-fe'sis, *s.* (Greek.) In Anatomy, the state of growing between. In Architecture, a term applied to the body, or central part, of the long bones. By some botanists it is used to designate the *nodi* of the grasses, and is more correctly, the interstices or portions of culms between the nodes.

**DIAPLASIS**, di-a-pla'sis, *s.* (Greek.) The displacement of a luxated or fractured bone in its position.

**DIAPHNOE**, di-ap'no-e, *s.* (Greek.) A gaspiration or breathing moisture through the nose.

**DIAPHNOTIC**, di-ap-not'ik, *s.* (*diaphno*, to breathe, Gr.) In Materia Medica, applied to a medicine which operates by promoting gentle inspi-

ration.

**DIAPHRIA**, di-ap're-a, *s.* A genus of Hymenoptera: Family, *Pupivora*.

**DIAPHYESIS**, di-a-pi-e'sis, *s.* (Greek.) The process of suppuration.

**DIARRHENA**, di-ar-re'na, *s.* (*dia*, two, and *rhena*, a male, Gr.) A genus of plants, native of America: Order, *Graminaceæ*.

**DIARRHIERA**, di-ar-re'ra, *s.* (*dia*, two, and *rhiera*, a male, Gr.) A genus of North American plants: Order, *Graminaceæ*.

**DIARRHETIC**, di-ar-ret'ik, *a.* Promoting evacuation by stool; purgative.

**DIARRHODOMELI**, di-ar-ro-dom'e-li, *a.* (*dia*, a rose, and *meli*, honey, Gr.) A compound of the juice of roses, scammony, agaric, and honey.

**DIARRHŒA**, di-ar-re'a, *s.* (*diarreo*, I purge) A purging or flux of the bowels, generated from food or drink of too stimulating nature, or from overloading the stomach, tainted with living or dead animalcules, or from some cause of diarrhœa. The species are—*D. crapulosa*, (*crapula*, surfeit, or indigestion); *D. biliosa*, bilious; *D. muco-sa*; *D. hæmorrhœica*, hæmorrhœic, when the food passes off in a white like chyle; *D. verminosa*, from worms.

**DIARTHRODIAL**, di-ar-thro'de-al, *a.* Pertaining to diarthrosis; having free motion in the joints of the bones.

**DIARTHROSIS**, di-ar-thro'sis, *s.* (Greek.) A movable joint; an articulation of motion in various directions.

**DIARY**, di'a-re, *a.* (*diēs*, a day, Lat.) A book in which the occurrences of each day are registered. It is commonly used to signify a register of events in which the writer had a personal interest, or which have at least come in some way

## DIASCHISM—DIASTOPORA.

observation by having happened in his  
*di-as-kism*, } *s.* (*di-schizo*, I cleave,  
*di-as-kia-ma*, } Gr.) In Music, an  
 consisting of a minor semitone or diesis.  
*di-a-sil'-le-um*, *s.* (*dia*, and *skilla*,  
 all, Gr.) A preparation of oaymel and  
 of squilla.

*di-as-pa'-se-a*, *s.* (*di-as-pasia*, a pulling  
 Gr. in reference to the segments of the  
 which is salver-shaped, with a five-parted  
 A genus of plants, natives of New Hol-  
 lander, Goodeniaceae.

*di'-as-pore*, *s.* (*di-as-peiro*, I scatter,  
 A mineral occurring massive in slightly  
 lar laminae, of a shining pearly lustre and  
 grey colour; also, in cellular masses,  
 bed of slender crystals of a pearly lustre,  
 intercept each other in every direction:  
 exposed to heat in a matraass it decipitates  
 y, is dispersed, (hence its name,) and splits  
 into white brilliant scales. It consists of  
 and water, and in some specimens mixed  
 with 3 to 7 per cent. of oxide of iron.

*di-a-stal'tik*, *a.* (Greek.) Dilated;  
 bold; an epithet given by the Greeks to  
 intervals in music.

*di-as-tase*, *s.* (*dia*, and *istemi*, I set, Gr.)  
 for vegetable principle, analogous to gluten,  
 and during the germination of barley, wheat,  
 the amount of *diastase* in malted grain  
 more than 1-500th part. It is, however,  
 action of this small portion that the starch  
 barley is converted into sugar in the first  
 brewing, preparatory to the fermentation  
 in ale or malt spirits is obtained.

*di-as-tas'-is*, *s.* (Greek.) Literally, dis-  
 division; separation. In Surgical Pa-  
 the separation of two bones previously in-  
 ar of the pieces of a fractured bone.

*di'-a-stem*, *a.* (*diastema*, Gr.) In An-  
 music, a simple interval as distinguished  
 compound one.

*di-as-te'-ma*, *s.* (Greek.) In Zoology,  
 which occurs in the dentition of animals  
 canine teeth are wanting, as in the Ro-  
 a fissure or longitudinal aperture.

The following compounds connected with *dia-*  
*stema*, Gr., are used by Brechet for organic  
 or monostroties, characterized by a longi-  
 tudinal or fissure of the part: as, *Diastemato-*  
*the vagina*: *diastematocephalia*, of the brain;  
*diastema*, of the trunk of the body; *diastemato-*  
*the lip*: *diastematoceania*, of the skull; *dia-*  
*stema*, of the bladder; *diastematogastria*, of the  
 of the belly; *diastematoglossia*, of the tongue;  
*diastema*, of the jaws; *diastematometria*, of the  
*diastematopylia*, of the pelvis; *diastematomachia*,  
*diastematostomia*, of the nose; *diastemato-*  
*diastema*, of the urula; *diastematostoma*, of the ster-  
*diastema*, of the intestinal canal; *diastema-*  
*diastema*, of the body.

*di-as-to'-le*, *s.* (*diastello*, I separate, Gr.)  
 extension of the heart and arterica. In  
 the extension of a syllable, or a figure  
 a syllable naturally short is made long.

*di-as-top'o-ra*, *s.* (*diastisso*, I separate  
 and pores, a pore, Gr.) A genus of  
 in which the cells are rather tubular,  
 and openings disposed irregularly in ver-

on one face of a lamelliform, irregular,  
 and disposed polyyparia: Subclass, Poly-  
 branaceae.

## DIASTREMMA—DIAZENETIC.

**DIASTREMMA**, di-as-trem'ma, } *s.* (*diastropho*, I  
**DIASTROPHE**, di-as'tro-fe, } turn aside, Gr.)  
 A distortion in any part of the body.

**DIASTRODOX**, di-as'tro-doks, *s.* (*dia*, and *astrom*, a  
 star, and *doxa*, glory, Gr.) The name given to a  
 machine for displaying the glory of the starry fir-  
 nament.

**DIASTYLE**, di'-as-tile, *s.* (*dia*, and *stylos*, a column,  
 Gr.) In Architecture, that mode of intercolumn-  
 nation in the arrangement of pillars, where the  
 space between the columns consists of three, or,  
 according to others, of four diameters.

**DIASYLLIS**, di-as-til'lis, *s.* A genus of Decapod  
 Crustaceans of the crab kind, found on the coasts  
 of Florida and Georgia.

**DIATERETICUS**, di-a-ter-et'o-kus, *s.* (*diaterco*, I pre-  
 serve, Gr.) A medicine which preserves health  
 and prevents disease.

**DIATESSARON**, di-a-tes'sa-ron, *s.* (*dia*, and *tesara*,  
 four, Gr.) In Greek Music, the interval of a third.

**DIATHERMAL**, di-a-ther'mal, } *a.* (*dia*, and  
**DIATHERMATOUS**, di-a-ther'ma-tus, } *therme*, heat,  
 Gr.) A term applied to such transparent bodies  
 which suffer the radiation of heat to pass through  
 them, as in the case of rock salt, &c.

**DIATHESES**, di-a-the'sia, *s.* (*diatithemi*, I depose, Gr.)  
 In Pathology, a certain state of constitution by  
 which a person is predisposed to particular diseases.

**DIATOMACEÆ**, di-a-to-ma'se-e, *s.* (*diatoma*, one of  
 the genera.) An order of minute Algae, consist-  
 ing of crystalline fragmentary bodies, generally  
 bounded by right lines—rarely included in curve  
 lines—flat, stiff, and brittle, usually nestling in  
 slime, uniting into various forms, and then sepa-  
 rating again. 'They seem to form the extreme  
 limits of the vegetable and animal kingdoms. Their  
 regular form, and the power of separating into  
 distinct particles, which most of them have, are  
 almost as much the attributes of the mineral as  
 of the animal or vegetable kingdom. Agardh  
 includes them among plants; Kützting asserts  
 that their life is as much animal as vegetable.'—  
 Lindley.

**DIATOMOUS**, di'a-to-mus, *a.* (*dia*, and *temno*, I  
 cleave.) In Mineralogy, having crystals with one  
 distinct diagonal cleavage.

**DIATONI**, di-at'o-ni, *s.* (*dia*, and *tonos*, an exten-  
 sion, Gr.) In ancient Architecture, a term ap-  
 plied when the angle stones of a wall, wrought  
 with two faces and stretching beyond the stones  
 both above and below, make a good bend or tie to  
 the work.

**DIATONIC**, di-a-ton'ik, *a.* (*dia*, and *tonos*, a tone,  
 Gr.) In Music, the *diatonic* is the natural scale  
 of music proceeding by degrees, and including  
 both tones and semitones. It includes the inter-  
 vals formed by the natural notes, as well as those  
 produced in the transposition of the natural.

**DIATRIBE**, di'a-tribe, *s.* (Greek.) A continued  
 discourse or disputation.

**DIATRIBIST**, di-at're-bist, *s.* One who prolongs  
 his discourse or discussion.

**DIAVOLETTI**, di-a-vol-let'te, *s.* An Italian name  
 for lozenges made of cocoa and the most pungent  
 aromatics, to excite venereal desire.

**DIAZENETIC**, di-a-se-net'ik, *s.* (*di-azegnymi*, I  
 separate, Gr.) In ancient Greek Music, a term  
 applied to the tone disjoining two fourths, one on  
 each side, and which, when joined to either the  
 one or the other, made a fifth.

# DIAZOMA—DICASTERIUM.

# DICE—DICHOBUNE.

**DIAZOMA**, di-a-zo'ma, *s.* (*dia*, and *soma*, a cincture, Gr.) In ancient Architecture, a term used for the landing and resting places which encircled the amphitheatre, at different heights, like so many bands. In Zoology, a genus of the Acidia, in which the species dispose themselves circularly or in rays, often sufficiently regularly disposed round a centre, so as to form one or more stelliform systems, imbedded in a horizontal gelatinous mass.

**DIAZOSTER**, di-a-zos'ter, *s.* (Greek.) The twelfth lumber vertebra, so termed from its corresponding to the waistband of the human figure or dress.

**DIBBLE**, dib'bl, *s.* A pointed instrument for making holes with in the ground, in the process of planting;—*v. n.* in Angling, to nibble;—*v. a.* to plant with a dibble.

**DIBBLER**, dib'blur, *s.* One who makes holes in the ground to receive seed.

**DIBOLIA**, dib-o'le-a, *s.* A genus of Coleopterous insects, in which the greater part of the head is sunk in the thorax and the posterior tibiae, terminated by a forked spine: Family, Cyclica.

**DIBOTHRID**, dib-oth'ri, } *s.* (*dis*, twice, and  
**DIBOTHRIDIAN**, dib-oth're-anz, } *bothria*, a pit, Gr.)  
A division of the Entozoa, including those tape-  
worms of the family Bothriocephala which have  
not more than two pits or fossae on the head.

**DIBOTHRORHYNCHUS**, di-both-re-o-ring'kus, *s.* (*dis*, *bothria*, a pit, and *rhynchos*, a snout, Gr.)  
A genus of Entozoa, in which the summit of the  
head is furnished with two little trunks or tenta-  
cula, bristled with hooks.

**DIBRANCHIA**, di-brang'ke-a, *s.* (*dis*, two, and  
*branchia*, gills, Gr.) A name given by Latreille  
to a class of the Cirripedeæ, comprehending such  
as have their respiratory organs in two leaf-like  
expansions.

**DIBRANCHIATA**, di-brang'ke-ay-ta, } *s.* An order  
**DIBRANCHIATES**, di-brang'ke-ay-ta, } of the Cepha-  
lopods, including such as are furnished with two  
gills, have three distinct hearts, an apparatus for  
secreting and discharging an inky fluid, with  
never more than ten arms set with acetabulae.

**DIBSTONE**, dib'stone, *s.* A little stone which chil-  
dren throw at another stone.

**DICACITY**, di-kas'e-te, *s.* (*dicacitas*, Lat.) Pert-  
ness; much talk, as prating.—Seldom used.

As every one had something to say to Perry, so Perry  
had something to say to every one; and this gave a sort  
of petulant *dicacity* to his repartees.—*Gravia.*

**DICÆLUS**, di-se'lus, *s.* A genus of Coleopterous  
insects: Family, Carabideæ.

**DICÆUM**, di-se'um, *s.* A genus of birds belonging  
to the family Cinyridæ, or Sun-birds, natives of  
the Indian and Australian islands.

**DICALYX**, di-kal'ika, *s.* (*dis*, double, and *kalyx*, a  
calyx, Gr. in reference to the calyx being calycu-  
lated by bractææ, which assume the appearance of  
an outer calyx.) A genus of plants, consisting of  
trees, natives of Java and Cochinchina: Order,  
Pomaceæ.

**DICARTUM**, di-ka're-um, *s.* (*dis*, double, and *ka-  
rtyon*, a nut, Gr. from the drupe containing two  
nuts.) A genus of South American trees, with  
opposite leaves and terminal panicles, or axillary  
racemes of flowers: Order, Strychnaceæ.

**DICAST**, di'kast, *s.* (*dikase*, Gr.) In ancient Greece,  
an office answering nearly to our juryman.

**DICASTERIUM**, di-kas-te-re-um, *s.* (*dike*, justice,  
620

Gr.) In ancient Architecture, the name  
tribunal in the city of Athens.

**DICE**, dise, *s. plu.* of Die. Also a game  
—*v. n.* to play a game with dice.

**DICE BOX**, dise'box, *s.* A box from which  
thrown in gaming.

**DICE COAL**, dise'kole, *s.* A local name for  
coal.

**DICEPHALOUS**, di-sef'a-lus, *a.* (*dis*, two  
*kephale*, a head, Gr.) Having two heads  
body.

**DICER**, di'sur, *s.* A player at dice.

**DICERA**, dis'e-ra, *s.* (*dis*, double, and *keras*,  
Gr. in allusion to the anthers being termi-  
nated in two bristles.) A genus of plants, com-  
prising shrubs and trees with laurel-like leaves:  
Tiliaceæ.

**DICERANDRIA**, di-ser-an'dre-a, *s.* (*dis*, two  
and *andros*, a male, from the anthers be-  
ing horned, each of the cells being spurred at  
the tip.) A genus of Labiate plants: Order, Lam-  
iaceæ.

**DICERAS**, dis'e-ra, *s.* (*dis*, and *keras*, a  
horn.) A genus of fossil shells, found in the  
sand and upper oolite, and thus named be-  
ing two prominent spiral umbones, which  
appearance of two twisted horns.

**DICERATA**, di-se-ra'ta, } *s.* (*dis*, and *keras*,  
a horn, Gr.)

**DICERATES**, dis'e-rayts, } Gr.) A name  
Blainville to a family of Mollusca, com-  
prising such gastropods as have the head furnished  
with two tentacula.

**DICERMA**, di-ser'ma, *s.* (*dis*, twice, and  
*kerma*, a prop, Gr. in reference to the calyx being  
proped by two bractææ.) A genus of Leguminosæ  
consisting of shrubs with trifoliate leaves,  
purple or yellow flowers: Suborder, Papilion-  
aceæ.

**DICEROS**, dis'e-ros, *s.* (*dis*, and *keras*, a  
horn.) A genus of Lizards of the Chamaeleonideæ,  
or lion family. It is distinguished by the  
male being produced into two compressed  
masses horns.

**DICH**, ditsh, *v. a.* This word seems corrupt  
for, *do it*—Obsolete.

Rich men sin and I eat root;  
Much good dost thy good heart, *Aperçus.*

**DICHÆTÆ**, di-ke'te, *s.* A subdivision of  
terous insects, consisting of two families,  
*Dichæta* and the *Pupipara*, the first of which  
is distinguished by the sucking-tube being  
within the proboscis, and the terminal joint  
antennæ being usually patelliform. Both  
have two setæ to the proboscis.

**DICHÆLUS**, di-ke'les, *s.* (*dis*, and *cheilos*, a  
lip, Gr.) A genus of Coleopterous insects: Family,  
Curculionideæ.

**DICHILESTIUM**, di-ke-le'ste-um, *s.* (*dis*, and  
a lip, Gr.) A genus of Psilocypodæum  
with narrow elongated bodies, slightly  
bifurcate, and composed of seven segments:  
Siphonostoma.

**DICHILUS**, di-k'ilus, *s.* (*dis*, twice, and  
a lip, Gr. in reference to the calyx being  
bilobed.) A genus of Leguminosæ suborder  
of the Cape of Good Hope: Suborder, Papil-

**DICHOBUNE**, di-k'o-bune, *s.* A genus of  
fossil quadrupeds, differing from the *Amb-*  
and *Xiphodons* in having two small  
toes on each foot, at the side of the  
ones. They occur in tertiary rocks, and

**DICHONDR**, *dik-on'dra*, *s.* (*dis*, and *chondros*, a male, in reference to its double capsule.) A creeping downy herbs: Order, Convolv.

**DICHONDR**, *dik-o-re-zan'dra*, *s.* (*dis*, *choris*, and *aner andros*, a male, in reference to the two anthers upon which the genus depends.) A genus of Order, Commelinaceæ.

**DICHUM**, *dik-o-spo're-um*, *s.* (*dicha*, double, a seed, Gr.) A genus of Fungi: Order, Mycetozoa.

**DICHOTOMIA**, *dik-o-to-ma're-a*, *s.* (*dichotomos*, into two parts, Gr.) A genus of membranaceous, originating in a short simple stem, ending in compressed dichotomous ramifications at the extremity: Family, Compositæ.

**DICHOTOMIZE**, *dik-ot'o-mize*, *v. n.* To separate

**DICHOTOMOUS**, *dik-ot'o-mus*, *a.* (*dichotomos*, Gr.) In pairs, as the veins of some ferns and the wings of certain insects; re-furcated.

**DICHOTOMY**, *dik-ot'o-ma*, *s.* An artificial arrangement of objects into pairs. In Botany, by constant forking, as when the stem of a plant divides into two branches, each dividing into two others, and so on.

**DICHROMISM**, *dik-ro-zim*, *s.* (*dis*, *chroma*, colour, Gr.) The property of appearing under two colours, according to the direction in which the light is transmitted through a body, as in the muscivora, which appears of a deep red along the axis, and of a lively green when the light is transverse direction.

**DICK**, *dise'ing-hows*, *s.* A house where a gaming-house.

**DICKENS**, (*derivation uncertain*.) An exclamation used by some of our old sailors with the devil.

Had you this pretty weathercock I would tell what the dickens his name is my hat him of.—*Shaks.*

**DICKER**, *s.* (probably from *dika*, ten, Gr.) A score, the number or quantity of ten, by ten hides or skins; sometimes applied to things, as a *dicker* of gloves, &c.

**DICKSONIA**, *dik-so-ne-a*, *s.* (in honour of Mr. James Dickson.) Order, Polyp-

**DICKSONIA**, *dik-le-dan-the'ra*, *s.* (*diklis*, and *anthera*, an anther, Gr. in reference to the anthers dehiscing by two valves.) A genus of plants, consisting of small shrubs or herbaceous and elongated, often pendulous; thick petiolate leaves, and racemate flowers with cream-coloured corolla become purplish on drying—natives of Order, Ebenaceæ.

**DICKSONIA**, *s.* In Botany, applied to a plant which has its sexes in distinct flowers.—

**DICKSONIA**, *dik-lip'te-ra*, *s.* (*dis*, and *kleio*, I shut, the fruit being composed of two valves.) A genus of plants: Order, Acanthaceæ.

**DICKSONIA**, *dik-kok'kus*, *s.* (*dis*, and *kokkos*, a berry, or grain; consisting of two cohering seeds, with one seed in each.

**DICKSONIA**, *dik-kol'o-fus*, *s.* (*dicha*, separately, and

*lyphos*, a crest, Gr.) A genus of Wading-birds, in which the crown of the head is furnished with a tuft of feathers which spreads in two directions—hence the name.

**DICORPHE**, *di-kawr'fe*, *s.* (*dis*, and *corphe*, a vertex, Gr. in reference to the two horns on the top of the fruit.) A genus of plants, natives of Madagascar: Order, Hamamelidaceæ.

**DICOTYLEDON**, *di-ko-te-le'dun*, *s.* (*dis*, and *kotyledon*, a seed-leaf, or lobe, Gr.) A plant which has cotyledons or seminal leaves.

**DICOTYLEDONÆ**, *di-ko-te-le-do-ne-e*, *s.* (*dis*, two, and *kotyledon*, a seed-leaf, or lobe, Gr.) Exogens, one of the names given by botanists to the first grand division of the vegetable kingdom; so termed from the embryo having two opposite cotyledons, or, when more, disposed in a whorl; the stem is increased by external layers, with an evident distinction between bark and wood; the leaves are traversed by branch veins, and the parts of the flower very commonly disposed in a quinary number. The plumule is situated in the centre of the point of junction of the cotyledons; the inferior end of the embryo is elongated into a radicle, and does not contain any secondary radicle in its substance.—See Exogens and Botany.

**DICOTYLEDONIA**, *di-ko-te-le-do-ne-a*, *s.* (*dis*, two, and *kotyledon*, a seed-leaf, or lobe, Gr.) Exogens, one of the names given by botanists to the first grand division of the vegetable kingdom; so termed from the embryo having two opposite cotyledons, or, when more, disposed in a whorl; the stem is increased by external layers, with an evident distinction between bark and wood; the leaves are traversed by branch veins, and the parts of the flower very commonly disposed in a quinary number. The plumule is situated in the centre of the point of junction of the cotyledons; the inferior end of the embryo is elongated into a radicle, and does not contain any secondary radicle in its substance.—See Exogens and Botany.

**DICOTYLEDONS**, *di-ko-te-le'duns*, *s.* (*dis*, two, and *kotyledon*, a seed-leaf, or lobe, Gr.) Exogens, one of the names given by botanists to the first grand division of the vegetable kingdom; so termed from the embryo having two opposite cotyledons, or, when more, disposed in a whorl; the stem is increased by external layers, with an evident distinction between bark and wood; the leaves are traversed by branch veins, and the parts of the flower very commonly disposed in a quinary number. The plumule is situated in the centre of the point of junction of the cotyledons; the inferior end of the embryo is elongated into a radicle, and does not contain any secondary radicle in its substance.—See Exogens and Botany.

**DICOTYLEDONOUS**, *di-ko-te-le-do-nus*, *a.* Having two seed-leaves.

**DICOTYLES**, *di-kot'e-les*, *s.* The Peccaries, a genus of hogs which have the grinder and incisor teeth very similar to the domesticated hogs, but their canines are like those of ordinary quadrupeds, and do not project from the mouth. They have no tail, and are without an external toe on the hinder feet. In their mode of living they resemble the common pig.

**DICREUS**, *dik're-us*, *a.* (*dikroos*, double-headed, Gr.) Bifid; cloven.

**DICRANIA**, *di-kra'ne-a*, *s.* (*dikranos*, having two prongs, Gr.) A genus of Coleopterous insects, natives of Brazil: Family, Lamellicornes.

**DICRANOCERUS**, *dik-ra-nos'e-rus*, *s.* (*dikranos*, forked, and *keras*, a horn, Gr.) A genus of quadrupeds belonging to the Antelope family, in which the horns are greatly compressed, rough, with an anterior process, and the point uncinate backwards, placed upon the orbits, and impending over the eyes; tail very short; structure cervine; facial line convex.

**DICRANOURA**, *dik-ra-now'ra*, *s.* (*dikranos*, having two prongs, and *oura*, a tail, Gr. from the posterior of the caterpillar being forked.) A genus of Lepidopterous insects: Family, Nocturna.

**DICROITE**, *dik'royt*, *s.* A mineral of a blue colour and shining lustre. It is likewise called *iolite*. It is the prismatic quartz of Mohs. It occurs in granite and gneiss, and consists of silica 50, alumina 30, magnesia 11, oxide of iron 5, with a trace of manganese.

**DICROMATIC**, *di-kro-mat'ik*, *a.* (*dis*, and *chroma*, colour, Gr.) Having two colours; producing two colours.

**DICROTIC**, *di-krot'ik*, *a.* (*dis*, and *kroyo*, I strike, Gr.) In Pathology, applied to a pulse which, when felt, conveys the sensation of a double pulsation.

**DICURINÆ**, *dik-ru're-ne*, *s.* (*dicurus*, one of the genera.) The Drongo Shrikes, a subfamily of

**PACTIC—DIDYMOCARPUS.**

**di-dak'tik,** } *a.* (*didaktikos*, Gr.)  
*de-dak'te-kal,* } Preceptive; adapted  
 containing precepts, doctrines, prin-  
 ciples intended to instruct.

**di-dak'te-kal-le,** *ad.* In a didac-  
 tical manner.

**di-dak'tile,** *s.* (*dis*, and *daktylos*, *a*  
*r.*) Two-toed, or two-fingered. In  
 applied to various animals—as to the  
 among quadrupeds, the ostrich among  
 amphibia among reptiles, and to cer-  
 tain birds.

**di-dak'te-lus,** *a.* Having two toes.

**di-das'ka-lik,** *a.* (*didaskalikos*, Gr.)  
 preceptive; giving precepts in some art.  
**di-dur,** *v. n.* (*didderum*, Teut.) To shiver  
 —Ubbolte.

**di-dl,** *v. n.* To move or totter like an  
 old man or a child walking; to trick.

**di-dral,** *di-dak-a-he'dral,* *a.* In Cry-  
 stalline, having the form of a decahedral or  
 prism, with pentahedral or five-sided  
 faces.

**di-del'fi-de,** *s.* (*didelphis*, one of the  
*r.*) A family of the Marsupialia, including  
 opossums, kangaroos, and other species of the  
 marsupials.

**di-del'fis,** *s.* (*dis*, and *delphys*, *a*  
*r.*) Womb, Gr.) A genus of Marsupial  
 animals, possessed, as the name implies, of an  
 abdominal pouch or sac, in which the  
 young are placed after a short period of uterine  
 life, and where it remains suspended to the  
 mother's mouth until sufficiently matured to  
 crawl into the air, as in the species opossum  
 &c.

**di-del'foy-d,** *a.* Having two wombs;  
 the Didelphidae.

**di-del'ta,** *s.* (*dis*, and *delta*, the Greek  
 letter, from the receptacle resembling a double  
 T.) A genus of Composite plants: Sub-  
 umbelliferae.

**di-did'ma,** *s.* (*didymos*, and *krater*, *a*  
*r.*) A cup, Gr.) A genus of  
 Tubifera, Physomyces.

**di-der'ma,** *s.* (*dis*, and *derma*, skin, Gr.)  
 of its double peridium.) A genus of  
 Tubifera, Gasteromycetes.

**di-der'mum,** *s.* A name given by  
 Linnaeus to the Synoicum subgelatinosum.—See  
 Synoicum.

**di-des'mus,** *s.* (*dis*, and *dermos*, a chain,  
 the pod being two-jointed like the links  
 of a chain.) A genus of Cruciferous plants, con-  
 annual erect-branched herbs with white  
 flowers: Tribe, Orthoploceae.

**di-dis'kus,** *s.* (*dis*, and *diskos*, a disk,  
 the mericarp appearing like two disks.)  
 Umbelliferous plants, belonging to the  
 Orthospermeae: Tribe, Hydrocotyleae.  
 The second person of the imperfect  
 tense of the verb *didonai*, to give.

**di-duk'shun,** *s.* (*ductio*, Lat.) Sepa-  
 rating or drawing one part from the other.

**di-dy-mo-kar'pus,** *s.* (*didymos*,  
 & *karpos*, fruit, Gr. in reference to the  
 fruit.) A genus of perennial herbs, with  
 red or purple flowers involucreted and  
 dichotomous umbels: Order, Gesneraceae.

**DIDYMOCHETON—DIERESILIS.**

**DIDYMOCHETON,** *di-dy-mo-ke-ton,* *s.* (*didymos*,  
 double, and *chiton*, a coat, Gr.) A genus of  
 plants: Order, Miliaceae.

**DIDYMOCHILAZNA,** *di-dy-mo-ke-na,* *s.* (*didymos*, and  
*chilina*, a cloak.) A genus of Ferns: Order,  
 Polypodiaceae.

**DIDYMODON,** *di-dim'o-don,* *s.* (*didymos*, and *odon*,  
 a tooth, Gr. in reference to the geminate arrange-  
 ment of the teeth of the theca.) A genus of  
 Mosses: Order, Bryaceae.

**DIDYMOPHYSA,** *di-dy-mo-fi'za,* *s.* (*didymos*, and  
*physis*, a bladder, Gr.) A genus of Cruciferous  
 plants: Suborder, Pleurorhizeae.

**DIDYMOUS,** *di-dy-mus,* *a.* (*didymos*, twofold, Gr.)  
 Two united. In Botany, applied to fruit when it  
 occurs in pairs.

**DIDYNAMIA,** *di-dy-na'me-a,* *s.* The fourteenth  
 class of the botanical arrangement of Linnaeus.  
 It comprehends those plants which, like Tetradyn-  
 amia, have four stamens, only two are shorter  
 than the other two. Lamia, Verbena, Scrophularia,  
 Bignonia, Acanthia, and their cognate genera, be-  
 long to this artificial class, which is divided into  
 two orders: 1st, Gynandropertnia, including those  
 genera, the ovary of which split into four seed-  
 like lobes; and 2d, Angiosperma, those which  
 have the seed enclosed in a pericarp of some kind.

**DIDYNAMIAN,** *di-dy-na'me-an,* *a.* In Botany,  
 DIDYNAMOES, *di-dy-na'mus,* } having two long  
 stamens and two short ones on the same flower.

**DIE,** *di,* *v. n.* (*doe*, Swed.) To lose life; to expire;  
 to pass into another state of existence; to perish;  
 to be punished with death; to lose life for a  
 crime, or for the sake of another; to come to an

 with affection; to recede as sound, and become  
 less distinct; to become less and less; to vanish  
 from the sight, or disappear gradually; to lose  
 vegetable life; to wither; to perish, as plants or  
 seeds; to become vapid or spiritless, as liquors;  
 to become indifferent to, or to cease to be under  
 the power of. In Theology, to perish everlast-  
 ingly; to suffer divine wrath and punishment in  
 the future world;—*s.* (*de*, Fr.) *pl.* Dice; a small  
 cube, marked on its faces with numbers from one  
 to six, used in gaming, by being thrown from a  
 box; any cubic body; a flat tablet; hazard;  
 chance. In Architecture, the cubical part of the  
 pedestal, between its base and cornice;—*s.* *pl.*  
 Dies. In the Arts, a stamp, or reversed impres-  
 sion of a coin, medal, or other similar object,  
 made for the purpose of impressing the device or  
 motto, cut out on the surface of it, upon a piece  
 of metal prepared to receive the impression.

**DIECTOMIS,** *di-ek'to-mis,* *s.* (*dis*, and *ektome*,  
 cutting out, Gr.) A genus of plants: Order,  
 Gramineae.

**DIELYTRA,** *di-e-li'tra,* *s.* (*dis*, and *elytron*, a sheath,  
 Gr. in allusion to the sheath-like spurs at the base of  
 the flower.) A genus of perennial herbs, with  
 racemose, white, or purple flowers: Order, Fa-  
 rmarisaceae.

**DIENTIA,** *di-e-ne-a,* *s.* (*dis*, and *enia*, a rein or shoe-  
 string.) A genus of plants: Order, Orchidaceae.

**DIERESILIS,** *di-e-re-sil'is,* *s.* A term invented by  
 Mirbel to denote a many-celled superior fruit,  
 the cells of which are dry, indehiscent, few-seeded,  
 and cohering by a common style round a common  
 axis, as in the marsh-mallow.

**DIERVILLA**, di-er-vil'la, *s.* (in honour of M. Dier-ville, a French surgeon.) A genus of erect shrubs; Order, Caprifoliaceæ.

**DIESIS**, di-e'sis, *s.* (Greek.) The mark (‡), called also a double dagger, and used as a mark for reference. In ancient Music, the division of a tone in a major and minor semitone, in which the greater was termed an *apotome*, and the lesser a *diesis* or *limma*; to the difference between the two, the name of *comma* was given.

**DIET**, di'et, *s.* (*dieta*, Lat.) Food or victuals; food regulated by a physician, or by medical rules; food prescribed for the prevention or cure of disease, and limited in kind or quantity; allowance of provision; board or boarding, as to pay a certain sum for diet; (*ryksdag*, Dut. *reichstag*, Germ.) an assembly of the states or circles of the empire of Germany and of Poland; a convention of princes, electors, ecclesiastical dignitaries, and representatives of free cities, to deliberate on the affairs of the empire; there are also diets of states and cantons;—*v. a.* to feed; to board; to furnish provisions for; to take food by rules prescribed; to furnish aliment;—*v. n.* to eat according to rules prescribed; to eat; to feed.

**DIETARY**, di'e-ta-re, *a.* Relating to diet or the rules of diet;—*s.* a medicine of diet.

**DIET-DRINK**, di'et-drink, *s.* Medicated liquors; drink prepared with medicinal ingredients.

**DIETER**, di'et-ur, *s.* One who diets; one who prescribes rules for eating; one who prepares food by rules.

**DIETETIC**, di-et-tet'ik, } *a.* (*diætetike*, Gr.)

**DIETETICAL**, di-et-tet'e-kal, } Relating to diet, or to the rules for regulating the kind and quantity of food to be eaten.

**DIETETICS**, di-et-tet'iks, *s. pl.* The science or philosophy of diets, or that which teaches us to adapt the quantity and quality of particular kinds of food to suit the state or power of the digestive organs, also with a view to extract the greatest quantity of nutrition from a given quantity of nutritive matter.

**DIETINE**, di'et-tine, *s.* A subordinate or local diet; a cantonal convention.

**DIEING**, di'et-ing, *s.* The act of eating according to prescribed rules.

**DIEU ET MON DROIT**, du e mong drwa, (French.) 'God and my Right,' the motto of the Royal Arms of England. It was first assumed by King Richard I. to intimate that he did not hold his empire in vassalage of any mortal.

**DIFFAREATION**, dif-fur-ro-a'shun, *s.* (*dis*, and *farreatio*, Lat.) The parting of a cake, a ceremony of the ancient Romans, at the divorce of man and wife.

**DIFFERENCE**, dif fur-ens, *s.* The state of being unlike or distinct; distinction; disagreement; want of sameness; variation; dissimilarity; the quality by which one differs from another; dispute; debate; contention; quarrel; controversy; point in dispute; ground of controversy; a logical distinction; evidences of distinction; differential

marks. In Arithmetic, the remainder of quantity, when one number or number is subtracted. In Logic, an essential attribute to some species, and not found in others, being the idea that defines the species. Rallery, a certain figure added to a count, serving to distinguish one family from another, to show how distant a younger branch is from the elder or principal branch;—*v. a.* to cause difference or distinction.

**DIFFERENT**, dif fur-ent, *a.* Distinct; not the same; of contrary qualities; dissimilar.

**DIFFERENTIAL**, dif fur-en'shal, *a.* A term to an infinitely small quantity, so small that it is less than any assignable quantity; thus a *differential quantity*. *Differential* is an instrument for measuring very small differences of temperature. *Differential* is a method of finding the ratios of the different variable magnitudes, on the supposition that differences become infinitely small. A *coefficient*, the ratio of the differential function of a variable quantity to the differential of the variable.

**DIFFERENTLY**, dif fur-ent-le, *ad.* In a different manner.

**DIFFICILE**, dif-fi-sil, *a.* (*difficilis*, Lat.) Hard; not easy; scrupulous.—*Obsolete.*

Latin was no more dead  
Than for a blackbird 'tis to whistle.

**DIFFICILENESS**, dif-fi-sil-ness, *s.* Difficult persuasion.—*Obsolete.*

**DIFFICULTATE**, dif-fi-sil'e-tate, *s. a.* Difficult.—*Obsolete.*

**DIFFICULT**, dif-fi-kult, *a.* (*difficilis*, Lat.) To be made, done, or performed, not attended with labour and pains; troublesome; hard to please; not complaisant; moderating; rigid; peevish; not easily—*v. a.* to render difficult; to perplex; as a verb. Lord Chancellor Thurlow, using this verb, as he *difficulted* the use of the word was pronounced unjustifiable.

**DIFFICULTATE**, dif-fi-kul-tate, *s. a.* Difficult.—*Obsolete.*

**DIFFICULTY**, dif-fi-kul-te, *s.* (*difficultas*, Lat.) To be done or accomplished; anything which renders its performance or perplexing; distress; opposition; an affair; uneasiness of circumstances; an obstacle to belief; that which cannot be understood, explained, or believed;—*Obsolete.*

**DIFFIDE**, dif-fide, *v. n.* (*diffido*, Lat.) To have no confidence in.—*Obsolete.*

The man *diffides* in his own auger  
And doubts the gods.—*Tragedy.*

**DIFFIDENCE**, dif-fi-dens, *s.* (*diffidentia*, Ital.) Distrust; want of confidence in others; doubt; want of confidence in a doubt respecting some personal or modest reserve; a moderate degree of bashfulness.

**DIVK**, dif-fin'e-tiv, a. Determinate; definite.

**ION**, dif-fish'un, s. (*diffusio*, Lat.) The act of moving or splitting.—Obsolete.

**ITION**, dif-tia'shun, s. (*diffusio*, Lat.) The scattering by a blast of wind.

**ENCE**, dif-flu-ens, } s. (*diffusio*, Lat.) The quantity of flowing or away on all sides.

**ENT**, dif-flu-ent, a. Flowing away on all sides; not fixed.

**OGIA**, dif-flu'je-a, s. (*diffuere*, to spread out, or run out in all parts, Lat.) A genus of *Hydropyria* Dubia, in which the body is small, round, contractile, enclosed in an oval sub-stance, extended into a straight termination, covered with areaceous grains, with unequal contractile tentacula: inhabitants of fresh water.

**ISM**, dif-fawm', a. (*dis*, diversity, and *forma*, Lat.) Irregular in form; not uniform; dissimilar; unlike; anomalous, as a *diffuse* flower, the parts of which do not correspond in proportion.

**MENT**, dif-fawr-me'te, s. Irregularity of form; dissimilitude.

**MENT**, dif-frakt', v. a. (*diffingo*, *diffractum*, to break in pieces.) To break in pieces.

**CTIONS**, dif-frak'shun, s. The act of breaking in pieces. *Diffraction of light*, the peculiar deviation which light undergoes when it passes the edge of an opaque body.

**ISEMENT**, } See Disfranchise and Disfranchisement.) franchise-ment.

**ION**, dif-fuze', v. a. (*diffusus*, Lat.) To pour out; spread as a liquid; to cause to flow and to spread; to send out or extend in all directions; to scatter; to disperse.

**ION**, dif-fuze', a. Widely spread; dispersed; diffuse; prolix; using many words; giving full explanations; verbose; not concise.

**ION**, dif-fu'zed-le, ad. In a diffused manner; with wide dispersion.

**ION**, dif-fu'zed-ness, s. The state of being widely spread.

**ION**, dif-fuze-le, ad. Widely; extensively; diffusely; not concisely.

**ION**, dif-fu'zur, s. One who diffuses.

**ION**, dif-fu'ze-bil'e-te, s. The quality of being diffusible, or capable of being spread.

**ION**, dif-fu'ze-bl, a. That may flow or be spread in all directions; capable of being diffused.

**ION**, dif-fu'ze-bl-ness, s. Diffusibility.

**ION**, dif-fu'zhun, s. Dispersion; the state of being scattered in every direction; a spreading; diffusion; propagation; copiousness; exuberance.—Obsolete in the last two senses. *Diffusion of gases*, in Chemistry, when two gaseous bodies which do not act chemically upon each other are mixed together in any relative proportion, they diffuse themselves through each other until they are intimately blended—the heavier one sinks, and the lighter one floats.

**ION**, dif-fu'viv, a. Having the quality of flowing or spreading by flowing as liquid substances, or of dispersing as minute particles; extended, spread widely; extending in all directions; extensive.

# DIFFUSIVELY—DIGESTEDLY.

**ION**, dif-fu'viv-le, ad. Widely; extensively; every way.

**ION**, dif-fu'viv-ness, s. Extension; dispersion; the power of diffusing; the state of being diffused; want of conciseness; verbosity; copiousness of words or expression.

**ION**, dif, v. a. (*dika*, Swed. *diger*, Dan. *dic*, Sax. *Post*, Digged or Dug; *past* and *past part*. Digged or Dug.) To open and break or turn up the earth with a spade or other sharp instrument; to excavate; to form an opening in the earth by digging and removing the loose earth; to pierce with a pointed instrument; to thrust in; to pierce or open, as by swine and moles; to dig down, to undermine and cause to fall by digging; to dig out or to dig from, to obtain by digging, as to dig out fossils, or to dig coals from a mine; to dig up, to obtain something from the earth by opening it, or uncovering the thing with a spade or other instrument;—c. n. to work with a spade or other piercing instrument; to do servile work; to work in search of; to search; to dig in, to pierce with a spade or other pointed instrument; to dig through, to open a passage through; to make an opening from one side to the other.

**ION**, dig-am'ma, s. (*dis*, and *gamma*, the G of the Greek alphabet.) The name of a letter in the ancient Greek alphabet, which was written much in the same form as the Roman capital F, and considered to have had the sound of the English W, V, or F.

**ION**, dig-a-me, s. (*dis*, and *gamia*, marriage, Gr.) Second marriage; marriage to a second wife after the death of the first, as opposed to bigamy.

**ION**, dig-as'trik, s. (*dis*, and *gaster*, the belly, Gr. from its having the appearance of a double belly.) A term applied to a double muscle situated externally between the lower jaw and the mastoid process. Its office is to pull the lower jaw downwards and backwards, and when the jaws are shut to draw the larynx, and with it the pharynx, upwards in the act of swallowing.

**ION**, dij'er-ent, a. (*dyperens*, Lat.) Digging.—Obsolete.

**ION**, dij'est, s. (*digestus*, Lat.) A collection or body of Roman laws, digested or arranged under proper titles by order of the Emperor Justinian; a pandect; any collection, compilation, abridgment, or summary of laws, disposed under proper heads or titles.

**ION**, de-jest', v. a. (*digestum*, Lat.) To distribute into suitable classes, or under proper heads or titles; to arrange in convenient order; to arrange methodically in the mind; to form with due arrangement of parts; to separate or dissolve in the stomach, as food; to reduce to minute parts fit to enter the lacteals and circulate; to concoct; to convert into chyme; to reduce to any plan, scheme, or method; to receive without loathing or repugnance; not to reject; to dispose an ulcer or wound to suppurate; to dissolve and prepare for manure, as plants and other substances. In Chemistry, to soften and prepare by heat; to expose to a gentle heat in a boiler or matrass, as a preparation for chemical operations;—c. n. to be prepared by heat; to generate healthy pus, as an ulcer or wound; to dissolve and be prepared for manure, as substances in compost.

**ION**, de-jest'ed-le, ad. In a methodical and regular way.

**DIGESTER**, de-jes'tur, *s.* He that digests or disposes in order; one who digests his food; a medicine or article of food that aids digestion, or strengthens the digestive power of the stomach. In Chemistry, a strong iron or copper vessel, having the lid tightly fitted and furnished with a safety valve, in which bodies may be subjected to high pressure from steam.

**DIGESTIBILITY**, de-jes'te-bil'i-te, *s.* The quality of being digestible.

**DIGESTIBLE**, de-jes'te-bl, *a.* Capable of being digested.

**DIGESTION**, de-jes'tahun, *s.* (*digestio*, Lat.) The conversion of food into chyme, or the process of decomposing aliment in the stomach, and recombining it in a new form, and thus preparing it for circulation and nourishment; the act of methodizing and reducing to order; the maturation of a design; the process of maturing an ulcer or wound, and disposing it to generate pus; the process of dissolution and preparation of substances for manure, as in compost. In Chemistry, the operation of exposing bodies to a gentle heat, to prepare them for some action on each other; or the slow action of a solvent on any substance.

**DIGESTIVE**, de-jes'tiv, *a.* Having the power to cause digestion in the stomach; capable by heat of softening and preparing; methodizing; reducing to order; causing maturation in wounds or ulcers; dissolving;—*s.* in Medicine, any preparation or medicine which increases the tone of the stomach and aids digestion; a stomachic; a corroborant. In Surgery, an application which ripens an ulcer or wound, or disposes it to suppurate. *Digestive salt*, the muriate of potash.

**DIGESTIVES**, de-jes'tiv, *s.* Applications which promote the generation of healthy pus.

**DIGESTURE**, de-jes'ture, *s.* Concoction; digestion. —Seldom used.

**DIGGABLE**, dig'ga-bl, *a.* That may be digged.

**DIGGED**. *Past and past part.* of Dig.

**DIGGER**, dig'gur, *s.* One who digs; one who opens, throws up, and breaks the earth.

**DIGHT**, dite, *v. a.* (*dihl*, Sax.) To prepare; to put in order; to dress; to deck; to adorn.—Obsolete.

But now, ye shepherd lasses, who shall lead  
Your wandering troops, or sing your virelays?  
Or who shall dight your bow'rs, with she is dead  
That was the lady of your holy-days!—*Spenser.*

**DIGIT**, dij'it, *s.* (*digitus*, a finger, Lat.) The measure of a finger's breadth, or three-fourths of an inch. In Astronomy, the twelfth part of the diameter of the sun or moon: a term used to express the quantity and magnitude of an eclipse—thus, an eclipse is said to be of six digits, when six of these parts are hid. In Arithmetic, any integer under 10, so called from counting on the fingers; thus, 1, 2, 3, 4, 5, 6, 7, 8, 9, are called *digits*.

**DIGITAL**, dij'e-tal, *a.* (*digitalis*, Lat.) Relating to the fingers or to digits.

**DIGITALIA**, dij-e-ta'le-a, } *s.* A vegetable alkali  
**DIGITALINA**, dij-e-ta'le-na, } procured from Digitalis purpurea. It has, like other alkalis, the property of restoring the blue colour of bitumens which has been reddened. Its medical properties are similar to those of the Foxglove.

**DIGITALIS**, dij-e-ta lis, *s.* (*digitalis*, of or belonging to a finger, Lat. from the resemblance which the flower has to the finger of a glove.) Foxglove, a

genus of herbs with alternate leaves, racemes of second, bracteate, drooping. Four ounces of the leaves of foxglove, drachms of water, and 78 grains of extract. When taken into the stomach it is to diminish the frequency of the pulsations of the system, and to increase the absorbents and the discharge. When taken in excess, it produces weakness of sight, vertigo, delirium, hiccoughs, collapse, and death.

**DIGITARIA**, dij-e-ta're-a, *s.* A genus so named from its fingered spikes: *T. ceca*.

**DIGITATE**, dij'e-tate, } *a.* In Botany  
**DIGITATED**, dij'e-tay-ted, } *tate* leaf is divided into several distinct leaflets or when a simple undivided petiole bears several leaflets at the end of it.

**DIGITATELY**, dij'e-tate-le, *adv.* In a digitated manner.

**DIGATION**, dij-e-ta'shun, *s.* Division of or finger-like processes, as exhibited by the muscles, particularly those of *Nervus* and *Obliquus externus abdominis*, in leucence on the ribs.

**DIGITIFORM**, dij'e-te-fawrm, *a.* Having the appearance of fingers, as in the leaves of digitiformis.

**DIGITGRADE**, dij'e-to-grade, *a.* Wall of the

**DILUVIAL**, de-lu've-al, *a.* (*diluvialis*, Lat.)

**DILUVIAN**, de-lu've-an, *s.* longed to be

the deluge. The superficial deposits of sand, sometimes containing bones of land mammalia, which lie far distant sites on hills, and in other situations no forces of water now in action can explain them, have attracted much of the attention of geologists, but as yet no satisfactory explanation has been given. 'Violent passing over the land, streams flowing in levels and in lines now impossible, the action of the sea during the time of the deluge, glacier movements and the changes over the surface while it was covered by the ocean, have all been strongly adopted, but the phenomena are very complex and seem to require many partial changes of level of sea and land and of the condition.'—*Pers. Cyc.*

**de-lu've-al-ist**, *s.* One who attributes effects, as the dispersion of the erratic action of the deluge.

**de-lu've-ate**, *v. a.* To run as a flood.

**di-u've-um**, *s.* (Latin, a flood.) In term given to the clay, sand, and salts, which occupy the surface or under strata in this and other countries. *Minium* has been given it from the fact that it was deposited at the flood of its antiquity is now considered as of a date later than that event.

about twelve or thirteen feet between the extremities of the extended wings. It feeds on fish and other marine animals. There are three species.

**DION**, di'un, *s.* A genus of plants: Order, Cycadaceæ.

**DIONÆA**, di-o-ne'a, *s.* (one of the names of Venus.) Venus's Fly-trap, a genus of curious plants, the leaves of which are of an anomalous form, and have a singular motion, by which insects are caught. On each side of the leaf are three highly irritable bristles, which, when touched, cause the two lobes to fold together like a rat-trap. An insect alighting on the leaf is speedily entrapped, and continues so as long as it struggles to escape; but when quiet, the leaf expands, and it is set free. The flowers are white and terminal corymbs: Order, Droseraceæ.

**DIONIX**, di'o-niks, *s.* (*dis*, and *onyx*, a claw, Gr.) A genus of Coleopterous insects: Family, Sclaphinidæ.

**DIONYSISCUS**, di-o-ne-nis'kus, *s.* (Dionysos, Bacchus, who was sometimes represented as having horns.) A name given by Vogel to certain bony excrescences near the temples.

**DIONYSIUS**, di-o-ne'she-us, *s.* One of the names of Bacchus; the Grecian festivals, in honour of whom, were termed *Dionysia*.

**DIOPSIDE**, di'op-side, *s.* (*diopsis*, transparent, Gr. in allusion to the occasional transparency of its crystals.) A mineral which occurs in colourless or pale-green prismatic crystals, generally striated longitudinally, with a shining lustre. It is likewise Muscovite and Alalite. A specimen from Piedmont contained silica, 57.50; lime, 16.50; magnesia, 18.50; oxides of manganese and iron, 6.00.

**DIOPSIS**, di-op'sis, *s.* (*dis*, through, and *ops*, an eye, Gr.) The name of a genus of Dipterous insects, in which the eyes and antennæ are situated at the extremity of long, slender, horny peduncles, rising from the sides of the head.

**DIOPTASE**, di'op-tase, *s.* (*diophtamai*, I look through, Gr. in allusion to the possibility of seeing the natural joints by transparent light: called also *emerald copper*, *emerald malachite* or *achrite*.) A mineral of a fine emerald-green colour, the crystals of which are elongated rhombic dodecahedrons. It consists of from 48 to 55 per cent. of the oxide of copper; 33 to 43 per cent. of silica; water, 12 per cent.; and sometimes a little of the protoxide of iron: sp. gr. 3.2—3.4.

**DIOPTRA**.—See Speculum.

**DIOPTRIC**, di-op'trik, *a.* (*dioptrikos*, Gr.)

**DIOPTRICAL**, di-op'tre-kal, *a.* Affording a medium for the sight; assisting the sight in the view of distant objects; relating to dioptrics, or the science of refracted light: sometimes written *dioptric* and *dioptrical*.

**DIOPTRICS**, di-op'triks, *s.* The science of refractive vision, or that part of optics which treats of the different refractions of light in passing through different media, as air, water, glass, &c.

**DIORAMA**, di-o-ra'ma, *s.* (*dis*, through, and *orama*, sight, Gr.) An exhibition of paintings, so arranged as to receive shades of light and various hues by means of moveable blinds.

**DIORAMIC**, di-o-ra'mik, *a.* Relating to a diorama.

**DIORISM**, di'o-ri-ism, *s.* (*diorisma*, Gr.) Distinction or definition, which, in a few words, explains what is spoken of.—Seldom used.

**DIOBISTIC**, di-o-ris'tik, *a.* Distinguishing; defining.

**DIOBISTICALLY**, di-o-ris'to-kal-le, *ad.* In a distinguishing manner.

**DIORITE**, di'o-rite, *s.* (*dioriso*, I separate, from the distinctness of the component minerals.) A variety of greenstone.

**DIORITIC**, di-o-rit'ik, *a.* Resembling diorite; containing diorite; of the nature of diorite.

**DIORRHOISIS**, di-or-ro'sis, *s.* (Greek.) In Pathology, the dissolution of the solids of the animal body, and their evacuation by the urinary passages.

**DIORTHROSIS**, di-awr-thro'sis, *s.* (Greek.) In Surgery, the reduction of a fractured or dislocated bone.

**DIOSCOREA**, di-o-sko're-a, *s.* (in memory of Pedacius Dioscorides, a Greek physician.) A genus of plants: some of the species produce the large farinaceous tubers called yams, which form as important an article of food in tropical countries as the potato does in Europe: Order, Dioscoreaceae.

**DIOSCOREACEAE**, di-o-sko-re-á-se-e, *s.* (*dioscorea*, one of the genera.) A natural order of plants, belonging to the class Dicotyledons. The order consists of twining shrubs, with large tubes either above or below ground, with alternate reticulated leaves; flowers small; calyx and corolla confounded; six stamens inserted into the base of the sepals and petals; anthers turned inward and bursting longitudinally; ovary adherent and three-celled; style deeply trifid; stigmas undivided; ovules suspended; fruit leafy and compressed.

**DIOSMA**, di-os'ma, *s.* (*dios*, divine, and *osme*, smell, Gr. the leaves when bruised having an exquisite smell.) A genus of small leaf-like shrubs, with white or red flowers: Order, Rutaceae.

**DIOSMINE**, di'os-mine, *s.* A name given by Brandes to a substance extracted from the leaves of the *Diosma crinata*.

**DIOSPYROS**, di-os-pi'rus, *s.* (*dios*, divine, and *pyros*, wheat, Gr. divine wheat, called by Pliny *Crauum Joris*, or *Jupiter's wheat*.) The Date plum, a genus of plants, consisting of trees and shrubs, with white or pale-yellow flowers, and the fruit a globose berry.

E.

E.

E.

E, the second vowel, and the fifth letter of the English alphabet. Its long and natural sound in English coincides with the sound of *i* in the Italian and French languages, and is formed by a narrower opening of the glottis than that of *a*. It has a long sound, as in *here, mere, me, &c.*; and a short sound, as in *met, men*; and the sound of *u* open or long, in *there, prey, vein*. As a final

letter, it is generally quiescent; but it lengthens the sound of the preceding vowel, at least to indicate that the preceding vowel has its long sound, as in *man, can, plum*. After *e* and *y*, the *e* is to indicate that *a* is to be pronounced as *f*. In a numerous class of words, the

## EACH—EAGLE-FLIGHTED.

From Greek, the final *e* is silent. In words in *ine*, as *active*; in *ile*, as *futile*; in *ine*, as *examine*, *examine*; in *ite*, as in *definite*; usually silent. As a numeral, *E* stands for five. In the Calendar, it is the fifth of the letters; as an abbreviation, it stands for *East*, as in charts; *E.* by *S.*, east by south. In old and ancient coins, it stands for the name of any city, the name of which begins with *E*.

**ELATOR**, *s.* (*elator*, an impeller, Gr. in al- an elastic spine or spring which projects hinder extremity of the breast, by which it is enabled to spring up when it falls back, and replace itself on its legs.) A Coleopterous insects: Family, Elatidae.

**ELATER**, e-la-ter'e-da, *s.* (*elater*, one of the A family of Coleopterous insects, be- to the section Sternoxi.

**ELATE-RIN**, *s.* The active principle of the inspissated juice of the fruit of *Elaeterium*.

**ELATER-RE-OSPERMUM**, *s.* an impeller, and *sperma*, a seed, Gr.) A of plants: Order, Euphorbiaceæ.

**ELATERITE**, *s.* Elastic mineral pitch, a massive variety of bitumen.

**ELATER-REUM**, *s.* (*elater*, an impeller, reference to the elastic seed-vessels.) The Squirting Cucumber, a genus of plants, chiefly of Mexico: Order, Cucurbitaceæ. *Ela- elaterium*, when the Squirting Cucumber before it ripens, and the juice is gently and a green sediment is deposited which is dried: one-eighth of a grain operates as a purge.

The Water-peppers, a small natural Exogone, consisting of little annual plants in marshy places, with fistular creeping The leaves are opposite, with stipules be- articles; the flowers are polypetalous; three or five; petals same number as the

sepals; stamens hypogæous, and twice the number of the petals; ovary with three or five cells; fruit three or five-celled.

**ELATINE**, e-lat'ine, *s.* (*elute*, a fir, Gr. its fine leaves having been compared to those of a fir-tree.) Water-wort, a genus of singular water plants, with insignificant flesh-coloured flowers: Order, Elatinaceæ.

**ELATION**, e-la'shun, *s.* An inflation or elevation of mind proceeding from self-approbation; self-esteem, vanity, or pride, resulting from success; haughtiness; pride of prosperity.

**ELATOBANCHIA**.—See Lamellibranchia.

**ELATOR**, e-la'tur, *s.* He or that which elates.

**ELAXATE**, e-laks'ate, *v. n.* (*elazo*, Lat.) To loose; to widen.

**ELAXATION**, e-laks-a'shun, *s.* (*elaxatio*, Lat.) The act of loosening or untying.

**ELBOW**, el'bo, *s.* (*elboga* or *elnebo*, Sax.) The outer angle made by the bend of the arm; any flexure or angle: the obtuse angle of a wall, building, or road; to be at the angle, is to be very near; to be by the side; to be at hand;—*v. a.* to push with the elbow; to push or drive to a distance; to encroach on;—*v. n.* to jut into an angle; to project; to bend. In Anatomy, the juncture of the cubitus and radius, or the outer angle made by the bend of the arm.

**ELBOW-CHAIR**, el'bo-tshare, *s.* A chair with arms to support the elbows; an arm-chair.

**ELBOW-ROOM**, el'bo-room, *s.* Room to extend the elbows on each side; perfect freedom from confinement; ample room for motion or action.

**ELCESAITES**, el-se-sa'tes, *s.* An ancient sect of heretics, named after their leader Elcesai. They worshipped but one God, observed the Jewish Sabbath, and rejected almost all the books of Moses, the prophets, and the writings of St. Paul. They made their appearance in the reign of Trajan.

**ELD**, eld, *s.* (*eld* or *add*, Sax.) Old age; decrepitude; old people; persons worn out with age.—Obsolete.

They count him of the green-hair'd *eld*.—Chapman.

**ELDER**, el'dur, *s.* The common English name of the trees and shrubs of the genus *Ebolus*.

**ELDER**, el'dur, *a.* (*ælder*, Sax.) The comparative degree of *eld*, now written *old*.—See *Old*. (Older; senior; having lived a longer time; born, produced, or formed before something else; prior in origin; proceeding in the date of a commission;—*s.* one who is older than another or others; an ancestor; a person advanced in life, and who, on account of his age, experience, and wisdom, is selected for office. Among the Jews, *elders* were persons considerable for age, experience, and wisdom, as the seventy men associated with Moses in the government of the people: of the same class were those who afterwards held the first rank in the synagogue as presidents. In the first Christian churches, *elders* were persons who enjoyed offices or ecclesiastical functions; and the term includes apostles, pastors, presbyters, bishops, or overseers—hence the first councils of the Christians were called *presbyteria*, or *councils of elders*. In the Presbyterian churches, *elders* are officers who, with the ministers and deacons, compose the sessions of the kirk, and have authority to take cognizance of matters of religion and discipline.

**ELDERLY**, el'dur-le, *a.* Somewhat old; advanced beyond middle age; bordering on old age.

# ELDERSHIP—ELECTIVE.

**ELDERSHIP**, el'dur-ship, *s.* Seniority; the state of being elder; the office of an elder; presbytery; order of elders.

**ELDEST**, el'dest, *a.* (*entdest*, Sax.) Superlative of *eld*, *old*. Oldest; most advanced in age; that was born before others.

**ELDING**, el'ding, *s.* (*alim*, Sax.) Poet.—A local term.

**EL DORADA**, el do-ra'da, *s.* (Spanish, the golden region.) A fabulous region, far surpassing all others yet discovered, formerly imagined to exist in the interior of South America.

**ELIATIC**, el-e-at'ik, *a.* An epithet applied to the philosophy of Xenophanes of Elea, the object of which was to confine the thoughts of its disciples to ideas of God, or the Being, as it is in itself. Instead of fixing their attention on external nature, they considered time, space, and change as mere illusions generated by the deceiving senses, and incapable of scientific explanation.

**ELECAMPANE**, el-e-kám'pane, *s.* (from the official name *Enula campana*.) *Inula helenium*, one of the largest British herbaceous, composite herbs: Suborder, Tubulifloræ.

**ELECT**, e-lect', *v. a.* (*electus*, Lat.) To pick out; to select from among two or more; that which is preferred; to select or take for an office or employment; to choose from among a number; to select or manifest preference by vote or designation. In Theology, to designate, choose, or select as an object of mercy or favour; to choose; to prefer; to determine in favour of;—*a.* chosen; taken by preference from among two or more; chosen, but not inaugurated, consecrated, or invested with office. In Theology, chosen as an object of mercy; chosen, selected, or designated to eternal life; predestinated in the divine counsels;—*a.* one chosen or set apart. In Theology, applied to a person, or persons, chosen or designated by God to salvation—being predestinated to glory as the end, and to sanctification as the means; or to a nation or body set apart as a peculiar church and people.

**ELECTANT**, e-lect'ant, *s.* One who has the power of choosing.—Obsolete.

**ELECTICISM**.—See Electicism.

**ELECTION**, e-lek shun, *s.* (*electio*, Lat.) The act of choosing; choice; the act of selecting one or more from others; the act of choosing a person to fill an office or employment by any manifestation of preference, as by ballot, uplifted hands, or *acclamation*; voluntary preference; free-will; liberty to act or not; power of choosing or selecting; discernment; discrimination; distinction; the ceremony of a public choice; the day of a public choice of officers; those who are elected. In Theology, divine choice; predetermination of God, by which persons are distinguished as objects of mercy, become subjects of grace, are sanctified, and prepared for heaven.

**ELECTIONER**, e-lek-shun-er', *v. a.* To make interest for a candidate at an election; to use arts for securing the election of a candidate.

**ELECTIONEERER**, e-lek-shun-er'ur, *s.* One employed in securing votes, and otherwise using influence for the election of a candidate.

**ELECTIONEERING**, e-lek-shun-er-ing, *s.* The arts or practices used in securing the election of a candidate for an office.

**ELECTIVE**, e-lek'tiv, *a.* Dependent on choice;

bestowed or passing by election; consisting in choice or right of choice; the power of choice; selecting for one; an *elective attraction or affinity*; a bodies to unite with certain kinds of preference to others.

**ELECTIVELY**, e-lek'tiv-le, *ad.* By preference of one to another.

**ELECTOR**, e-lek'tur, *s.* One who elects; who has the right of choice; a person by law or constitution, the right of an officer. In Germany, a title of one who formerly elected the emperor.

**ELECTORAL**, e-lek'to-ral, *a.* Relating to electors.

**ELECTORALITY**.—See Electorate.

**ELECTORATE**, e-lek'to-rate, *s.* The territory of an elector in the German empire.

**ELECTRA**, e-lek'tra, *s.* A genus of *Celastraceæ* in which each articulation is composed of cells, arranged in a ring: Family, *Celastraceæ*.

**ELECTRE**.—See Electron.

**ELECTRESS**, e-lek'tres, *s.* The wife of an elector in the German empire.

**ELECTRIC**, e-lek'trik, *s.* (*electricus*, amb.) A body or substance capable of exhibiting by means of friction or otherwise, and the passage of it from one body to another. *Electric fishes*, fishes which, when touched, produce an electric shock; the most of which are the *Torpedo gymnotus*, and *Malapterurus electricus*.

**ELECTRIC**, e-lek'trik, } *a.* (*electricus*, amb.)  
**ELECTRICAL**, e-lek'tre-kal, } Containing electricity, or capable of exhibiting it without friction; in general, relating to electricity derived from or produced by electricity, exhibiting a shock like electricity.

**ELECTRICALLY**, e-lek'tre-kal-le, *ad.* In manner of electricity, or by means of it.

**ELECTRICIAN**, e-lek'trish'an, *s.* One who deals with electricity, and investigates its properties and experiments; one who is a science of electricity.

**ELECTRICITY**, e-lek'tris'e-ty, *s.* A series of phenomena presented by substances, either naturally, or when excited, consisting in the evolution of a subtle fluid, which seems to be different from most bodies. It derives its name from *electron* (amber), which, when rubbed, has the property of attracting bodies. It is given to the fluid as well as to the phenomena which it presents.

**ELECTRIFIABLE**, e-lek'tri-f-a-bl, *a.* Capable of receiving electricity, or of being changed that may become electric; capable of and transmitting the electrical fluid.

**ELECTRIFICATION**, e-lek'tri-fi-ka-shun, *s.* The act of electrifying, or state of being electrified.

**ELECTRIFY**, e-lek'tri-fi, *v. a.* To convert into electricity; to charge with electricity; to give electricity to pass through; to effect; to give an electric shock to; to excite; to give a sudden shock;—*a.* to be electrified.

**ELECTRINE**, e-lek'trin, *a.* (*electrum*, Lat.) Relating to amber.

**ELECTRIZATION**, e-lek'tri-za-shun, *s.* The act of electrifying.

## TRIZE—ELECTROPHORUS.

e-lek'trise, v. a. (*electrifier*, Fr.) To

electro, *a.* In Composition, a word others, denoting their connection with us—*Electro-chemistry*, that portion of science which treats of the agency of and galvanism in the production of phenomena. *Electro-dynamics*, the of electricity of motion. *Electro-* designating what pertains to magnetism, and with electricity, or affected by it. *Magnetism*, the agency of electricity and in communicating magnetic properties. *Welding*, the application of electricity to the operations of gilding, plating. *Electro-motion*, passage of the electric one body to another. *Electro-motive*, electro-motion. *Electro-negative*, positive property of being repelled by bodies electrified, and attracted by those positively. *Electro-polar*, applied to conductors of which is positive, and the other *Electro-positive*, the opposite of electric. *Electro-puncturing*, the operation of two or more needles in a part or parts, and then touching them with the poles of a galvanic machine. *Electro-*—See *Malacutrum*.

o-*lek'trode*, *s.* (*elektron*, and *odos*,  
A name given by Prof. Faraday to a  
which electricity passes in and out of

For the term *Electrode*, Prof. Faraday has introduced the following in connection with the set — *Anode*, (from *ana*, up,) the point at which electricity enters, and *Cathode*, (kata, point out of which electricity passes). The point of an electrolyzed body are termed *ions* — grows to the *Anode*, *anion* — and that which to the *Cathode*, *cation* — thus, if water be electrolyzed and hydrogen are *ions*, the former an *ion* or a *cation*.

**Ξ,** e-lek'tro-lite, *s.* (elektron, and lyo, Gr.) A substance susceptible of direct action by the action of the electric current.

To decompose a compound substance by the action of galvanism.

**ELECTROMETER**, e-lek-troi'n'e-tur, *s.* (*electrum*, Lat. *ē*, a measure, Gr.) An instrument for measuring the quantity or intensity of electricity, or an instrument for discharging it.

**ELECTROMETER**, e-lek-tro-met'tre-kal, *n.* Per-  
an electrometer; made by an electro-

**JOHNS, e-lek-trof-o-ma, s. (elektrom, and -ary, Gr.)** An instrument, consisting of a disk of resin, having a plate of brass, with a handle placed upon it. The resin is rendered electrically by friction, and the brass plate becomes electro-polar by induction. The plate, if touched by the finger whilst the resin is being rubbed, gives off a spark from the resin, and lifted off by its glass handle, gives a spark of positive electricity. The instrument is used as a convenient substitute for the Leyden jar.

electric machine, particularly in inflaming a jet of hydrogen gas in Volta's inflammable air-lamp.

**ELECTROSCOPE**, e-lek'tro-sko-pe, *s.* (*elektron*, and *skopeo*, I view, Gr.) An instrument by which electrical attraction and repulsion is rendered apparent, as in the gold-leaf electrometer.

**ELECTROTYPE.**—*e-lek'tro tīnt, s.* A method of etching by galvanism, in which a paint or pigment is used, possessing the properties of working freely, lying on without spreading, and resisting the action of sulphate of copper: a composition of white wax, lard, lamp-black, olive-oil, and turpentine, is said to answer the purpose well. The plate used is of some mixed metal, presenting a white surface, such as German silver. The artist sketches his design on the dull white surface by means of brushes and composition. All the parts which are white in the impression, are left uncovered by the paint. When the picture is finished, it is coated with black-lead, and exposed to the electro-coppering process, by which a plate is produced for working in the copperplate press, having the lines of the device marked in intaglio, or sunken.—*Pen. Cyc.*

**ELECTROTYPE**, *e-lek'tro-tipe*, *n.* The art of executing fac-simile medals by electricity. **Electroplating**, a process by which a pattern, cast in alloy or white metal, composed of copper, nickel, and zinc, hard, white, and fusible only at high temperature, after being properly chased and prepared, and dipped in a vessel containing a solution of phosphorus, is transferred to a tank or trough, and subjected to galvanic agency. In the tank is a chemical solution of silver; and the wires of a galvanic battery are so arranged that the current, in completing its circuit, must necessarily pass through the solution. The result is, the solution is decomposed, and a fine film of metallic silver is deposited on the surfaces of the articles suspended in the trough.—For further information, see *Sup. Pen. Cov.*

**ELECTRUM.** e-lek'trum, *a.* (Latin, from *elektron*, Gr.) Argentiferous gold ore, a variety of gold ore of a pale brass colour. According to Pliny, the electrum of the ancients was a mixture of gold and silver; also, amber.

**ELECTUARY**, e-lek'tu-er-ē, *s.* (*electuarium*, Lat.) In Pharmacy, a powder mixed up with sirup, &c., so as to be of the consistency of honey.

**ELIADONA**, e-lee'do-na, *s.* A genus of Coleopterous insects; Family, Taxicornes.

**ELEIDONE**, e-led'o-ne, *s.* (Greek.) A genus of Cephalopods, distinguished by having a single row of suckers on each arm.

**ELEEMOSYNARY**, e-le-mo's-na-ry, *a.* (*elemosyne*, Gr.) Given in charity; given or appropriated to support the poor; relating to charitable donations; intended for the distribution of alms, or for the use and management of donations, whether for the subsistence of the poor, or for the support and promotion of learning;—*s.* one who subsists on alms or charity. *Eleemosynary corporations*, corporations constituted for the perpetual distribution of free alms, or the bounty of their founder, to such persons as he has directed.

notes that fine polish, politeness, or grace, the result of a good education, and an association with well-bred company; applied to speaking, it is propriety of diction and utterance, and the gracefulness of action or gesture. In Composition, it consists in correct, appropriate, and rich expressions, or well-chosen words, arranged in a happy manner. In Architecture, the due symmetry and distribution of the parts of an edifice.

**ELEGANT**, el'e-gant, *a.* (*elegans*, Lat.) Polished; neat; pure; rich in expression; pleasing to good taste; graceful; refined; polite; uttering or delivering elegant language with propriety and grace; symmetrical; regular; well-formed in its parts, proportions, and distribution; nice; sensible to beauty; discriminating beauty from deformity or imperfection; beautiful in form and colours; pleasing; rich; costly and ornamental.

**ELEGANTLY**, el'e-gant-ly, *ad.* In a manner to please; with elegance; with beauty; with pleasing propriety; with due symmetry; with well-formed and duly proportioned parts; richly; with rich or handsome materials well disposed.

**ELEGIA**, el'e-je-a, *s.* (*elegia*, lamentation, Gr. from the sad and mourning colour of the plants.) A genus of cord-leaved plants: Order, Restiacea.

**ELEGIAC**, el'e-ji'ak, *a.* (*elegia*, Lat.) Belonging to elegy; plaintive; expressing sorrow or lamentation; used in elegies;—*s.* elegiac verse.

**ELEGIACAL**, el'e-ji'a-kal, *a.* Belonging to an elegy.

**ELEGIAST**, el'e-ji'ast, } *a.* A writer of elegies.

**ELEGIST**, el'e-ji-st, }  
**ELEGIT**, el'e-ji-t, *s.* In Law, a writ of execution which lies for a person who has recovered debt or damages; or upon recognizance in any court, against a defendant that is not able to satisfy the same in his goods, directed to the sheriff, commanding him to make delivery of a moiety of the party's land and all his goods, except beasts of the plough, the creditor holding the moiety of the land until satisfaction be obtained, during which he is termed tenant by *elegit*.

**ELEGY**, el'e-je, *s.* (*elegia*, Lat.) A plaintive poem, or a funeral song; a poem or a song expressive of sorrow and lamentation; a short poem without points or affected elegancies.

**ELEOTIS**, el'e-i-o'tis, *s.* (*eleotus*, a dormouse, and *ous*, *ous*, an ear, Gr.) A genus of Leguminous plants: Suborder, Papilionacea.

**ELEMENT**, el'e-ment, *s.* (*elementum*, Lat.) The first or constituent principle, or minutest part of anything; an ingredient; a constituent part of any composition; in a chemical sense, an atom; the minutest particle of a substance; that which cannot be divided by chemical analysis, and therefore considered as a simple substance, as oxygen, hydrogen, nitrogen, &c.: in the plural, the first rules or principles of an art or science; in a popular sense, fire, air, earth, and water are called the four elements, as it was formerly supposed that these constitute the four simple bodies of which the world is composed; the substance which forms the natural or most suitable habitation of an animal; the proper state or sphere of any thing; the state of things suited to one's temper or habits; the matter or substances which compose the world; the outline or sketch, as the *elements* of a plan; moving cause or principle; that which excites action; *element*, in the singular, is sometimes used for the

**ELEMENTAL**, el'e-men'tal, *a.* Pertaining to elements; produced by some of the first elements, as *elemental* war; produced by arising from first principles.

**ELEMENTALITY**, el'e-men-tal'-e-ty, *s.* C of principles or ingredients.

**ELEMENTALLY**, el'e-men'tal-le, *ad.* A elements; literally.

**ELEMENTARITY**, el'e-men-tar'-e-ty,

**ELEMENTARINESS**, el'e-men-tar'-e-ness, being elementary; the simplicity of the compounded state.

**ELEMENTARY**, el'e-men'ta-ry, *a.* Principle; uncompounded; uncombined; the one principle or constituent part; in elemental; containing, teaching, or disseminating principles, rules, or rudiments; treatments; collecting, digesting, or explaining.

*Elementary substances*: These are simple or elementary substances at present that is, substances which, under any application to them, are found to be inseparable by analysis, and are therefore called elementary substances. Five of these

separate state as gases—namely, oxygen, chlorine, nitrogen, and fluorine; the last of these has not yet been obtained in a separate state and is only known to be a distinct substance by the qualities of the compounds it forms. Seven are non-metallic solids—namely, sulphur, phosphorus, selenium, carbon, bromine, and iodine; of the last, bromine and iodine, are either gases or solid, according to the temperature. phosphorus, selenium, boron, and carbon, but differ from the remaining being non-conductors of electricity.

remainder, thirteen are metallic or metalloids, uniting with oxygen to form the earths—namely, sodium, aluminium, magnesium, lithium, potassium, glucinum, barium, thorium, strontium, yttrium, zirconium, nine are what are commonly called metals—five—namely, iron, tin, cadmium, zinc, and manganese—decompose water at a red heat; do not decompose water—namely, antimony, copper, molybdenum, uranium, chromium, cerium, nickel, vanadium, tungsten, titanium, mercury, columbium, osmium, silver, palladium, rhodium, gold, iridium. To the class of addition has recently been made for the of *lantane*, which makes the fifty-fifth body.

**ELEM**, el'e-mi, *s.* The resinous exsude plant *Amyris elemifera*. The constituent of the pharmacopoeia, is a part of this substance.

act of raising or conveying from a lower or deeper

place to a higher; the act of exalting in rank,

degree, or condition; exaltation; an elevated

state; dignity; exaltation of mind by more noble

conceptions; exaltation of style; lofty expres-

sions; words and phrases expressive of lofty con-

ceptions; exaltation of character or manners;

attention to objects above us; a raising of the

mind to superior objects; an elevated place or

station; elevated ground; a rising ground; a hill

or mountain; a passing of the voice from any note

to one more acute; also, a swelling or augmenta-

tion of voice. In Astronomy, altitude; the dis-

tance of a heavenly body above the horizon, or the

arc of a vertical circle intercepted between it and

the horizon. In Gunnery, the angle which the

chance of a cannon or mortar, or the axis of the

hollow cylinder, makes with the plane of the hori-

zon. In Dialing, the angle which the style makes

with the substylar line. In Architecture, a view

or perspective of an edifice; a front view of a

building or object, drawn to a scale, without

regard to perspective; height above the ground.

*Elevation of the host*, in Catholic countries, that

part of the mass in which the priest raises the

or sore.

**EQUABILITY**, e-kwa-bil'e-te, *s.* (*aequalitas*, Lat.)  
Equality in motion; continued equality, at all  
times, in velocity or movement; uniformity; con-  
tinued equality; evenness or uniformity.

**EQUABLE**, e'kwa-bl, *a.* (*aequalis*, Lat.) Equal  
and uniform at all times, as motion; even; smooth;  
having a uniform surface or form.

**EQUABLENESS**, e'kwa-bl-nea, *s.* State of being  
equable.

**EQUABLY**, e'kwa-ble, *ad.* With an equal or uni-  
form motion; with continued uniformity.

**EQUAL**, e'kw'al, *a.* (*aqualis*, Lat.) Having the same  
magnitude or dimensions; being of the same  
extent; having the same value; having the same  
qualities or condition; having the same degree;  
even; uniform; not variable; being in just pro-  
portion; impartial; neutral; not biased; indis-  
ferent; of the same interest or concern; just;  
equitable; giving the same or similar rights or  
advantages; being on the same terms; enjoying

## EQUALITY—EQUATION.

the same or similar benefits; adequate; having competent power, ability, or means;—a. one not inferior or superior to another; having the same or a similar age, rank, station, office, talents, strength, &c.;—v. a. to make equal; to make one thing of the same quantity, dimensions, or quality as another; to rise to the same state, rank, or estimation with another; to become equal to; to be equal to; to make equivalent to; to recompense fully; to answer in full proportion; to be of like excellence or beauty. In Botany, applied to petals and sepals when they are equal in size and shape with each other; and to the calyx in Cruciferous plants, when it is without pouches at the base.

**EQUALITY**, e-kwal'ô-te, *s.* (*equalitas*, Lat.) An agreement of things in dimensions, quantity, or quality; likeness; similarity in regard to two things compared; the same degree of dignity or claims; evenness; uniformity; sameness in state or continued course; plainness.

**EQUALIZATION**, e-kwal-e-za'shun, *s.* The act of equalizing, or state of being equalized.

**EQUALIZE**, e'kwäl-ize, *v. a.* To make equal.

**EQUALLY**, e'kwál-le, *ad.* In the same degree with another; alike; in equal shares or proportions; impartially; with equal justice.

**EQUALNESS**, o'kwal-nēs, *s.* Equality; a state of being equal; evenness; uniformity.

**EQUANGULAR**, e-kwang'gu-lar, a. (*æquus*, equal, and *angulus*, an angle, Lat.) Consisting of equal angles.

**EQUANIMITY**, e-kwa-nim'-e-te, *s.* (*æquus*, and *animus*, mind, Lat.) Evenness of mind; that calm temper or firmness of mind which is not easily elated or depressed, which sustains prosperity without excessive joy, and adversity without violent murmurs or bitter repining.

**EQUANIMOUS**, e-kwan'e-mus, *a.* Of an even, composed frame of mind; of a steady temper; not easily elated or depressed.

**EQUANT, e'kwant, s.** In Astronomy, an imaginary circle, used for determining the motions of the planets.

**EQUATION.** e-kwa'shun, *a.* In Algebra, a proposition stating the equality of two quantities by placing the sign (=) between them. The general rule for the solution of questions producing simple equations, is to express the unknown quantities by letters, and the relations between the known and unknown, or, as they are called, the conditions, by equations, which, being resolved, give the answer. *Example*—If the question is concerning two numbers, they may be called  $x$  and  $y$ , and the conditions from which they are to be investigated must be expressed by equations, thus: If it be required that the sum of two numbers sought be 60, that condition is thus expressed,  $x+y=60$ . If their difference must be 24, then  $x-y=24$ . If their product is to be 96, then  $xy=96$ . If their quotient is to be 6, then  $\frac{x}{y}=6$ . *Equation of a curve*, an equation expressing the nature of a curve, the relation between an absciss and a corresponding ordinate, or the relation of their fluxions. *Equation of time*, in Astronomy and Chronology, the reduction of the apparent time or motion of the sun, to equable, mean, or true time. In Astronomy, the small connections which must be added or subtracted from the results of the

simple law, characteristic of all the relations, are termed equations, as in the time, equation of the equinoxes, equi-centre, and annual equation. *Equations*, in Arithmetic, finding the several debts at once, which are due, and bearing no interest till day of payment, so that no less shall be the parties making or receiving payment. *EQUATOR*, e-kwa'tur, *a*. (*Æquator*, Lat. circle of the terrestrial globe, equidistant to the poles, and dividing it into two equal parts, one north and the other south.

**EQUATORIAL**, o-kwa-to're-al, a. Pertaining to the equator. *Equatorial universal observatory*, is an instrument intended for a number of useful purposes in practice independent of any particular observation.

**EQUEBY**, ek'kwer-re, or e-kwer'e, a.  
An officer of princes, who has the management of his horses; a stable horses.

**EQUES**, e'kwis, s. (Latin, a horseman.)  
given to the equestrian order among

given to the equestrian order among the Equites constituted the second nobility, succeeding the senators in position, they required to be possessed of a horse before being admitted into the order. A horse given and kept at the public soldier, he was obliged to serve in it wore a ring given him by the state of fishes, having, as in Umbria, the obtuse, and truncate; caudal fin reclined upwards; two dorsal fins, one and falcate, the second long; ventral the pectoral; anal very short and oval at the base. Family. *Characodon*.

**EQUESTRIAN**, e-kwes'tre-an, *n.* (*equester*, a horse, Lat.) Relating to horses or ship; performed with horses; being skilled in horsemanship; representing horseback; celebrated by horse race to knights. Among the ancient equestrian order was the order of knights also their troopers or horsemen in civil life, the knights stood contrast from the senators in the field from —See Equester.

**EQUIANGULAR**, o-kwe-ang'gu-lur, *a.* (from *equus*, and *angulus*, an angle, Lat.) In Geometry, consisting of, or having equal angles, as a square, whose angles are all equal, such as an equilateral triangle, a parallelogram.

**EQUIBALANCE**, e-kwe-bal'ans, *n.* (from *equus*, Lat.) Equal weight;—*v. n.* to have with something.

EQUICRURAL, e-kwe-kroo'ral, } a. (of)  
EQUICRURE, e-kwe-kroo'r', } a leg  
ing legs of equal length; having  
longer than the base; isosceles.

EQUIDIFFERENT, e-kwe dif fer-ent,  
equal differences: arithmetically

2. Discretely equidifferent is when, in four numbers or quantities, there is an equal difference between the first and second, and between the second and third—as, 2, 4, 6, 8.

# EQUINOCTIALLY—EQUIPAGE.

the third and fourth—such are 3, 6,

**ANCE**, e-kwe-dis'tans, *s.* (*agmus*, and *dis-*  
tant, Lat.) Equal distance.

**ANT**, e-kwe-dis'tant, *a.* Being at an equal  
from some point or place.

**ANTLY**, e-kwe-dis'tant-le, *ad.* At the  
an equal distance. In Botany, applied to  
of veneration, or of arrangement of leaves  
pect to each other, in which the sides or  
ternately overlap each other.

**ITY**, e-kwe-fawr'me-to, *s.* (*agmus*, and  
brm, Lat.) Uniform equality.

**EAT**, e-kwe-lat'er-al, *a.* (*agmus*, and *late-*  
st.) Having all the sides equal;—*s.* a  
ity corresponding to others.

**ITE**, e-kwe-lib'rate, *v. a.* (*agmus*, and  
poise, Lat.) To balance equally two  
ides or ends; to keep even with equal  
in each side.

**ATION**, e-kwe-li-bra'shun, *s.* Equipoise;  
of keeping the balance even, or the state  
equally balanced.

**OURS**, e-kwe-lib're-us, *a.* Equally poised.

**OUSLY**, e-kwe-lib're-us-le, *ad.* In equal

**WT**, e-kwil'o-brist, *s.* One that balances

**ITY**, e-kwe-lib're-te, *s.* (*aguilibras*, Lat.)  
n of being equally balanced; equal balance  
sides; equilibrium.

**UM**, e-kwe-lib're-nm, *s.* (Latin.) In  
um, equipoise; equality of weight; the  
the two ends of a lever or balance, when  
e charged with equal weight, and they  
e an even or level position parallel to the  
equality of powers; equal balancing of  
e between motives or reasons; a state of  
ee or of doubt, when the mind is sus-  
p indecision between different motives, or  
tent forces of evidence.

**PLES**, e-kwe-mal'te-pla, *s.* (*agmus*, and  
s, Lat.) Multiples in which equal num-  
times are taken: thus 7 times A and 7  
are equimultiples of A and B; a league  
ard are equimultiples of a mile and a foot.  
e-kwi'nal, } *a.* (*equinus*, Lat.) Pertain-  
e-kwine, } ing to a horse, or to the  
quus.

**ESARY**, e-kwe-nec'sa-sa-re, *a.* Neces-  
sary in the same degree.

**EAL**, e-kwe-nok'shal, *a.* (*agmus*, and *nox*,  
st.) Pertaining to the equinoxes; desig-  
in equal length of day and night; per-  
to the regions or climate of the equino-  
; or equator; in or near that line; per-  
to the time when the sun enters the  
bal points; *equinoctial flowers*, flowers  
is at a regular stated hour;—*s.* in Astro-  
great circle of the celestial globe, whose poles  
poles of the world. It is so called, be-  
cause the sun comes to this circle, the  
d nights are equal all over the globe;  
e same with that which the sun seems  
ide, at the time of the equinoxes of  
and autumn. All stars directly under  
do have no declination, and always rise  
and set full west. The hour circles are  
right angles to it, passing through every  
degree; and the parallels to it are called

parallels of declination. *Equinoctial colure*, the  
great circle which passes from the poles of the  
world through the equinoctial points. *Equino-*  
*ctial dial*, a dial, the plane of which is parallel to  
the equator. *Equinoctial line*, same as equator.  
*Equinoctial points*, the two great points in which  
the equator and ecliptic cross each other, the  
one in the first point of Aries, and the other in  
the first point of Libra.

**EQUINOCTIALLY**, e-kwe-nok'shal-le, *ad.* In the  
direction of the equinox.

**EQUINOX**, e'kwe-noks, *s.* (Latin.) The time when  
the sun enters either of the equinoctial points,  
where the ecliptic intersects the equinoctial.  
Knowing the precise moments, and also the rate  
of the sun's motion in the ecliptic, it is easy  
to ascertain the precise point of the ecliptic in  
which the equator intersected it. By a series of  
such observations made at Alexandria, between  
the years 161 and 127 B.C., Hipparchus found  
that the point of the autumnal equinox was  
about six degrees to the eastward of the star  
called Spica Virginia. Eager to determine every-  
thing by multiplied observations, he ransacked all  
the Chaldean, Egyptian, and other records, to  
which his travels could procure him access, for  
observations of the same kind; but he does not  
mention his having found any. He found, how-  
ever, some observations of Aristillus and Timo-  
charis, made about 150 years before. From these,  
it appeared evident that the point of the autumnal  
equinox was then about eight degrees east of the  
same star. He discusses these observations with  
great sagacity and rigour; and on their authority,  
he asserts that the equinoctial points are not fixed  
in the heavens, but move to the westward about  
a degree in 75 years. This motion is called the  
precession of the equinoxes, because by it the time  
and place of the sun's equinoctial station precedes  
the usual calculations. It is fully confirmed by all  
subsequent observations. In 1750, the autumnal  
equinox was observed to be 20° 21' westward of  
Spica Virginia. Supposing the motion to have been  
uniform during this period of ages, it follows that  
the annual precession is about 50 $\frac{1}{2}$ ''; that is, if  
the celestial equator cuts the ecliptic in a particu-  
lar point on any day of this year, it will, on the  
same day of the following year, cut it in a point  
50 $\frac{1}{2}$ '' to the west of it, and the sun will come to  
the equinox 20' 23'' before he has completed his  
round of the heavens. Thus, the equinoctial, or  
tropical year, or true year of seasons, is so much  
shorter than the revolution of the sun or the side-  
real year. The *Vernal equinox* is that intersec-  
tion of the equator and the ecliptic in which the  
sun is when about to rise into the northern hemi-  
sphere; the *Autumnal equinox* being that in which  
the sun is when about to sink into the southern  
hemisphere.

**EQUINUMERANT**, e-kwe-nu'me-rant, *a.* (*agmus*, and  
*numerus*, number, Lat.) Having or consisting of  
the same number.—Seldom used.

**EQUIP**, e-kwip', *v. a.* (*equiper*, Fr.) To dress; to  
habit; to furnish with arms, or a complete suit  
of arms, for military service; to furnish with men,  
artillery, and munitions of war, as a ship; to fit  
for sea.

**EQUIPAGE**, ek'kwe-paje, *s.* The furniture of a  
military man, particularly arms and their appen-  
dages; the furniture of an army or body of troops.

## EQUIPAGED—EQUISONANCE.

infantry, or cavalry; the furniture of an armed ship, or the necessary preparations for a voyage; attendance; retinue, as persons, horses, carriages, &c.; carriage of state; vehicle; accoutrements; habiliments; ornamental furniture.

**EQUIPAGE**, ek'kwe-payj, *a.* Furnished with equipage; attended with a splendid retinue.

**EQUIPENDENCY**, e-kwe-pen'den-se, *s.* (*æquus*, and *pendeo*, I hang, Lat.) The act of hanging in equipoise; not determined either way.

**EQUIPMENT**, e-kwip'ment, *s.* The act of equipping, or fitting for a voyage or expedition; anything that is used in equipping furniture; habiliments; warlike apparatus; necessities for an expedition or voyage.

**EQUIPOISE**, e'kwe-poyz, *s.* (*æquus*, Lat. and *poise*, weight, Fr.) Equality of weight or force; equilibrium; a state in which the two ends or sides of a thing are balanced.

**EQUIPOLLENCE**, e-kwe-pol'lens, } *s.* (*æquus*, and  
**EQUIPOLLENCY**, e-kwe-pol'len-se, } *pollentia*, power,  
Lat.) Equality of power or force. In Logic, an equivalence between two or more propositions, or when two or more propositions signify the same thing, though differently expressed.

**EQUIPOLLENT**, e-kwe-pol'lent, *a.* Having equal power or force; equivalent. In Logic, having equivalent signification.

**EQUIPOLLENTLY**, e-kwe-pol'lent-le, *ad.* With equal power.

**EQUIPONDERANCE**, e-kwe-pon'der-ans, *s.* (*æquus*, and *pondero*, I weigh, Lat.) Equality of weight; equipoise.

**EQUIPONDERANT**, e-kwe-pon'der-ant, *a.* Being of the same weight.

**EQUIPONDERATE**, e-kwe-pon'der-ate, *v. n.* (*æquus*, and *pondero*, I weigh, Lat.) To be equal in weight; to weigh as much as another thing.

**EQUIPONDIOUS**, e-kwe-pon'de-us, *a.* Having equal weight on both sides.

**EQUIREA**, ek-we're-a, *s.* (Latin.) In Antiquity, an equestrian festival instituted by Romulus, and celebrated on the 27th February, in honour of Mars.

**EQUISETACEÆ**, ek-we-se-ta'se-e, *s.* A natural order of Acrogens, belonging to the Muscal alliance of Lindley. The Equiseta are leafless branched plants, with a striated hollow stem, in the cuticle of which silica is secreted to the amount of nearly half their weight when dried; stomates arranged longitudinally on the cuticle; spore cases opening inwards by a longitudinal slit attached to the lower face of peltate scales, which are collected into terminal cones; spores oval, grains wrapped with a pair of highly elastic clavate elaters. The Equisetum is the only genus belonging to the order.

**EQUISETIC**, ek-we-set'ik, *a.* Pertaining to the Equisetum;—*s.* Equisetic acid, an acid obtained from the plant Equisetum fluviatile, in which it exists in combination with magnesia. It is obtained in small colourless radiating crystals, and is somewhat analogous to tartaric acid.

**EQUISETIFORM**, ek-we-se'te-fawrm, *a.* Having the form of the Equisetum; resembling the Equisetum, or Horse-tail plant.

**EQUISETUM**, ek-we-se'tum, *s.* (Latin.) Horse-tail, a genus of plants: Type and only genus of the natural order Equisetaceæ.

**EQUISONANCE**, e-kwe-so'nans, *s.* An equal sounding; a name by which the ancient Greeks distin-

guished the consonances of the octave and double octave.

**EQUITABLE**, ek'kwe-ta-bl, *a.* (French.) Equal in regard to the rights of persons; distributing equal justice; giving each his due; assigning to one or more what law or justice demands; just; impartial; having the disposition to do justice, or doing justice; held or exercised in equity, or with chancery powers.

**EQUITABLENESS**, ek'kwe-ta-bl-nes, *s.* The quality of being just and impartial; equity; the state of doing justice, or distributing to each according to his legal and just claims.

**EQUITABLY**, ek'kwe-ta-ble, *ad.* In an equitable manner; justly; impartially.

**EQUITANGENTIAL**, ek-kwe-tan-jen'shal, *a.* (*æquus*, and *tangent*, Lat.) In Geometry, applied to the tangent of a curve, equal to a constant line.

**EQUITANT**, ek'kwe-tant, *a.* (*equitans*, Lat.) In Botany, such a situation of unexpanded leaves in a leaf-bud, that they overlap each other entirely, and in a parallel manner, without any involution.

**EQUITATION**, ek-kwe-ta'shun, *s.* A riding on horse-back.

**EQUITY**, ek'kwe-te, *s.* (*æquitas*, Lat.) Justice; right; impartiality; a just regard to right or claim. In practice, equity is the impartial distribution of justice, or the doing that to another which the laws of God and man, and of reason, give him a right to claim; it is the treating of a person according to justice and reason. In Jurisprudence, the correction or qualification of law when too severe or defective, or the extension of the words of the law to cases not expressed, yet coming within the reason of the law. Hence, a court of equity or chancery, is a court which corrects the operation of the literal text of the law, and supplies its defects, by reasonable construction, and by rules of proceeding and deciding, which are not admissible in a court of law. Equity, then, is the law of reason exercised by the chancellor or judge, giving remedy in cases to which the courts of law are not competent. *Equity of redemption*, in Law, the advantage allowed to a mortgager, of a reasonable time to redeem lands mortgaged, when the estate is of greater value than the sum for which it was mortgaged.

**EQUIVALENCE**, e-kwiv'va-lens, *s.* (*æquus*, and *valens*, strong, Lat.) Equality of value; equal rate or worth; equal power or force;—*v. a.* to equiperate; to be equal to.—Obsolete as a verb.

Whether the transgression of Eve seducing Adam exceed Adam seducing Eve, or whether the revolutility of his reason did not equiperate the faculty of her seduction, we shall refer to schoolmen.—Brown.

**EQUIVALENT**, e-kwiv'va-lent, *a.* Equal in value or worth; equal in force, power, or effect; equal in moral force, cogency, or effect on the mind; of the same import or meaning; equal in excellence or moral worth;—*s.* that which is equal in value, weight, dignity, or force, with something else. In Chemistry, the proportion in which the various chemical bodies unite, oxygen or hydrogen being assumed as unity. Under the word Chemical is given a table of equivalents, assuming hydrogen as unity. The following comprises Dr. Thomson and Berzelius's table of atomic weights or equivalents:—

EQUALLY, e-kwiv'va-lent-le, ad. In an equal

ly, e-kwe-valv, s. A bivalve shell, in which the valves are equal in size and form;—the valves equal.

EQUALLY, e-kwiv'vo-ka-se, s. (æquus, and ceco, Lat.) Equivocalness.—Obsolete.

EQUALLY, e-kwiv'vo-kal, a. (æquus, and ceco, a.) Being of doubtful signification; that understood in different senses; capable of interpretation; ambiguous; doubtful; of different constructions; not decided;

uncertain; proceeding from some unknown cause, or not from the usual cause;—s. a word or term of doubtful meaning, or capable of different meanings. In Logic, a word is said to be employed *equivocally*, and called an *equivocal term*, when the middle term is used in different senses in the two premises; or when a proposition is liable to be understood in various senses, according to the various meanings of one of its terms. *Equivocal generation*, a term applied to such species of generation in the animal and vegetable kingdoms, as is supposed by some to take place without seed or sexual intercourse.

**EQUIVOCALLY**, e-kwiv'vo-kal-le, ad. Ambiguously; in a doubtful sense; in terms susceptible of different senses; by uncertain birth; by equivocal generation.

**EQUIVOCALNESS**, e-kwiv'vo-kal-ness, s. Ambiguity, double meaning.

**EQUIVOCATE**, e kwiv'vo-kate, v. n. (*equivocare*, Fr.) To use words of a doubtful signification; to express one's opinions in terms which admit of different senses; to use ambiguous expressions;—v. a. to render capable of a double interpretation.

**EQUIVOCATION**, e-kwiv'vo-ka'shun, s. Ambiguity of speech; the use of words or expressions that are susceptible of a double signification.

**EQUIVOCATOR**, e-kwiv'vo-kay-tur, s. One who equivocates.

**EQUIVOCATORY**, e-kwiv'vo-ka-tur-e, a. Savouring of equivocation.

**EQUIVOKE**, e-kwe-voke, s. (*equivocare*, Fr.) An ambiguous term; a word susceptible of different significations; equivocation.—An old term, and seldom or never used.

I know your *equivokes*;  
You're grown the better fathers of 'em o' late.—  
Ben Jonson.

**EQUIVOROUS**, e-kwiv'o-rus, a. (*equus*, a horse, and *vor*, I eat, Lat.) Feeding or subsisting on horse flesh.

**EQUULA**, ek-u'-la, s. (Latin, a filly.) A genus of fishes, in which the body is short, oval, and often diaphanous; the mouth capable of being projected in the form of a tube, but, when shut, forming an angle on the throat; scales smooth and soft, or wanting.

**EQUULEUS**, e-ku-ul'e-us, s. (Latin, a colt.) A constellation of the northern hemisphere, whose stars, according to Ptolemy and Tycho's catalogues, are four, but in Mr. Flamsteed's ten. Also, a kind of rack used by the ancient Romans in extorting confessions. It was originally practised upon slaves, but, at a later period, it was employed against the Christians. *Equuleus Pictoria*, the Painter's Horse or Easel, a constellation of Lacaille, situated close to Canopus, the principal star in the constellation Argo.

**EQUUS**, e'ku-us, s. (Latin.) The Horse, a genus of quadrupeds, placed by Cuvier in his family Solipedes, and order Pachydermata. Its distinguishing generic characteristics are the possession of six incisors, or cutting teeth, in each jaw, the crowns of which, at an early age, are marked with a fossula; and six molars throughout with a square crown, marked by lunine of enamel which dip into them, with four crescents, and, in the upper ones, with a small disk in the inner edge. The male has also two small additional canines in the upper, and sometimes in both, which are

almost always wanting in the female. Between these canines and the first molar is an unoccupied space, which corresponds to the angle of the lips where the bit is placed, by which man alone has been able to subdue these powerful and most useful animals. The stomach is simple and moderate in size, but the intestines are long, and the cæcum enormous. The mamme are situated between the thighs. The species are *E. caballus*, or Common horse; *E. hemionus*, or Tartary horse; it is intermediate between the horse and ass, and lives in troops in a wild state in the deserts of Central Asia; *E. asinus*, the Ass; *E. zebra*, the Zebra, marked over the whole body with elegant black and white stripes; *E. quagga*, or *quichea*, the Quagga; *E. montana*, the Onagga or Daur, an African species, smaller than the ass, of a brownish colour, with black stripes, alternately wider and narrower on the head, neck, and body, with the legs and tail white.

**ER**, the termination of many English words, is the Teutonic form of the Latin *or*, the one contracted from *uer*, the other from *cir*, a man. It denotes an agent, originally of the masculine gender, but now applied to men or things indifferently, as in *hater*, *farmer*, *henter*, *gruter*. At the end of names of places, *er* signifies a man of the place, as *Londoner*, a *London man*.

**ERA**, *e'ra*, *s.* (*ara*, Lat. *ere*, Fr. *era*, Span.) In Chronology, a fixed point of time, from which any number of years is begun to be counted, as the Christian *era*. It differs from *epoch* in this—*era* is a point of time fixed by some nation or denomination of men; *epoch* is a point fixed by historians and chronologists;—a succession of years proceeding from a fixed point, or comprehended between two fixed points.

**ERADIATE**, *e-ra'de-ate*, *v. a.* (*e*, from, and *radio*, I beam, Lat.) To shoot as rays of light; to beam.

**ERADIATION**, *e-ra-de-a'shun*, *s.* Emission of rays or beams of light; emission of light or splendour.

**ERADICABLE**, *e-rad'e-ka-bl*, *a.* (*e*, from, and *radiz*, a root, Lat.) That may or can be eradicated.

**ERADICATE**, *e-rad'e-kate*, *v. a.* (*eradico*, Lat.) To pull up the roots, or by the roots; to destroy anything that grows; to extirpate; to destroy thoroughly.

**ERADICATION**, *e-rad-e-ka'shun*, *s.* The act of plucking up by the roots; extirpation; excision; total destruction; the state of being plucked up by the roots.

**ERADICATIVE**, *e-rad'e-ka-tiv*, *a.* That extirpates; that cures or destroys thoroughly;—*s.* a medicine that effects a radical cure.

**ERAGROSTIS**, *er-a-gros'tis*, *s.* (*er*, the spring, and *agrostis*, herbage, Gr.) A genus of plants: Order, Graminaceæ.

**ERANARCHA**, *er-a-nar'ka*, *s.* (*eranizo*, I collect contributions, and *arche*, a magistrate, Gr.) A public officer among the ancient Greeks, whose business was to preside over and direct the alms of the poor.

**ERANI**, *er'a-ni*, *s.* (*eranoi*, Gr.) Clubs or societies which existed during the Roman empire, for charitable, convivial, commercial, or political purposes.

**ERANTHEMUM**, *e-ran'the-mum*, *s.* (a name applied by the ancients to their Anthemis, from *er*, the spring, and *anthos*, a flower, Gr.) A genus of plants: Order, Acanthaceæ.

**ERANTHIS**, *e-ran'this*, *s.* (*era*, the earth, and *anthos*,

a flower, Gr. in reference to the bright yellow blossoms which seem to lie upon the earth.) Winter-aconite, a genus of pretty little tuberos-rooted plants, with divided leaves. The name Winter-aconite is given to it from its time of flowering, and from its leaves resembling those of the acorn: Order, Ranunculaceæ.

**NOTE**.—We have given G. Don's etymology of the term, but include to think the true one is the same as is given under *Eranthemum*—*er*, the spring, from its flowering so early in the year.

**ERASABLE**, *e-ra'sa-bl*, *a.* (*e*, out, and *rado*, I scrape, Lat.) That may or can be erased.

**ERASE**, *e-rase'*, *v. a.* To rub or scrape out, as letters or characters written, engraved, or painted; to efface; to obliterate; to expunge; to blot out; to destroy; to destroy to the foundation. In Heraldry, anything is said to be *erased* which appears forcibly torn off, leaving the edges jagged and uneven.

**ERASEMENT**, *e-rase'ment*, *s.* The act of erasing; a rubbing out; expunction; obliteration; destruction.

**ERASION**, *e-ra'shun*, *s.* The act of erasing; obliteration.

**ERASMA**, *e-ras'ma*, *s.* (*ernanis*, lovely, Gr.) A genus of plants: Order, Brunniacæ.

**ERASTIAN**, *e-ras'te-un*, *s.* A follower of Erastes, the leader of a religious sect, who denied the power of the church to discipline its members.

**ERASTIANISM**, *e-ras'te-un-izm*, *s.* The principles of the Erastians. This sect maintained that the pastoral office was only persuasive. The Lord's Supper, like other ordinances of the gospel, they asserted should be free to all; unworthy applicants were to be reasoned with on the impropriety of their partaking, but in no case refused or censured; the punishment of all offences being referred to the civil magistrate.

**ERASURE**, *e-ra'zhure*, *s.* The act of erasing; a scratching out; obliteration; the place where a word or letter has been erased or obliterated.

**ERATA**, *er-a'ta*, *s.* (*eratos*, lovely, Gr.) A genus of Mollusca, belonging to the Ovulinea or Ovules the shell of which is ovate, more or less angulated, smooth or granulated, with a dorsal scar, dark spine, and larger, angulated, emarginated aperture; the pillar slightly crinated; outer lip reflected and denticulated on the inner. It resembles *Murg-nella*, but has no folds on the pillar: Family, Cypræidæ.

**ERATO**, *er'a-to*, *s.* (*eros*, love, Gr.) In Mythology, the Muse who presided over lyric and love poetry. She is represented as crowned with roses and myrtle, and holding a lyre in her hand.

**ERATOGETRYS**, *er-a-to-let'ris*, *s.* (*eratos*, lovely, and *botrys*, a bunch of grapes, Gr.) A genus of plants: Order, Liliacæ.

**ERE**, *ayr*, *ad.* (*ær*, Sax.) Before; sooner than;—*prep.* before.

**EREBUS**, *e're-bus*, *s.* (*erebos*, Gr.) A deity of hell, son of Chaos and Darkness. He married Night, by whom he had Light and Day. Erebus is often used by the poets to signify hell itself, and particularly that part where the souls of the virtuous dwell previous to passing into the Elysian fields. In Zoology, a genus of large Lepidopterous insects: Family, Nocturnæ.

**ERECT**, *e-rekt'*, *a.* (*erectus*, Lat.) Upright, or in a perpendicular posture; directed upwards; upright

and firm; bold; unshaken; raised; stretched; intent; vigorous; extended;—*v. a.* to raise and set in an upright or perpendicular direction, or nearly such; to raise as a building; to set up; to build; to set up or establish anew; to found; to form; to elevate; to exalt; to exalt; to animate; to encourage; to extend; to distend; to raise a consequence from premises;—(seldom used in the last sense.)

Malebranche erects this proposition.—Locke.

To erect a perpendicular, is to set or form one line on another at right angles;—*v. a.* to raise upright;—*a.* in Botany, leaves are said to be erect when they form a very acute angle with the stem. The epithet is applied to petioles, flowers, pedicels, or branches, rising in an upright direction.

ERECTABLE, *e-rek'ta-bl, a.* That can be erected.

ERECTED, *e-rik'ted, a.* Aspiring; generous; noble; sublime.—Seldom used as an adjective.

Glory, the reward  
That sole excites to high attempts, the flame  
Of most erected spirits, most temper'd pure  
Eth'ral, who all pleasures else despise.—Milton.

ERECTOR, *e-rek'tor, a.* One who erects; one that raises or builds.

ERECTILE TISSUE, *e-rek'tile tish'n, s.* A peculiar tissue described by Dupuytren and Rullier, which is susceptible of erection and active turgescence by an increased flow of blood. This tissue is said to be found in the corpus cavernosa of the penis and clitoris, in the corpus spongiosum uteræ, the nipples, lips, &c. The existence of this tissue is a matter of dispute, it being considered by some anatomists as merely a congeries of blood-vessels largely supplied with blood.

ERECTION, *e-rek'shun, s.* The act of raising and setting perpendicular to the plane of the horizon; a setting upright; the act of raising or building, as an edifice or fortification; the state of being raised, built, or elevated; establishment; settlement; formation; elevation; exaltation of sentiments; act of rousing; excitement; anything erected; a building of any kind; distension and extension.

ERECTIVE, *e-rek'tiv, a.* Setting upright; raising.

ERECTLY, *e-rek'tle, ad.* In an erect posture.

Erectly spreading, in Botany, between erect and spreading.

ERECTNESS, *e-rek'tness, s.* Uprightness of posture or form.

ERECTOR, *e-rek'tor, s. (erecteur, Fr.)* In Anatomy, a term applied to the muscles, *E. penis* and *E. clitoris*; also, in Physiology, to designate an organ which, previously flaccid, swells from an accumulation of blood.

ERELONG, *ayr-long', ad.* Before a long time shall elapse; before a long time had elapsed.—Seldom used in the last sense.

The anger already began to paint revenge in many colours, ere long he had not only gotten pity but pardon.—Dryden.

EREMACAUISIS, *er-e-ma-kaw'sis, s. (eremos, lonely, or tranquil, and kausos, burning, Gr.)* In Chemistry, the gradual combination of the combustible elements of a body with the oxygen of the atmosphere, as in the change of the elements of wood into the substance called humus, the formation of acetic acid from alcohol, and the production of nitrates of the alkalis. *Eremacausis* differs from fermentation and putrefaction in its

requiring the access of atmospheric air; and to its action are owing the changes in colour, consistence, &c., which vegetable juices, saw-dust, and leaves of plants undergo when exposed to the atmosphere. It requires a higher temperature than that of 32 deg. Fahrenheit to enable oxygen to combine in the manner of *eremacausis*.

EREMEA, *er-e-me'a, s. (eremios, solitary, Gr.)* A genus of plants: Order, Myrtaceæ.

EREMITAGE.—See Hermitage.

EREMITE.—See Hermit.

EREMITICAL.—See Hermitical.

EREMOCARPUS, *er-e-mo-kar'pus, s. (eremos, solitary, and karpos, a seed, Gr.)* A genus of Composite plants: Tribe, Sesselinae.

EREMODON, *er-e-mo'don, s. (eremos, solitary, and odous, a tooth, Gr.)* A genus of moss plants: Order, Bryaceæ.

EREMOPHILUS, *er-e-mof'e-lus, s. (eremophiles, a lover of solitude, Gr.)* A genus of fishes, in which the body is smooth and oblong; eyes very small and lateral; dorsal fin single; caudal short; pectoral pedunculated, and placed near the belly; cirri six: Family, Siluridae.

EREMOSTACHYS, *er-e-mos'ta-kia, s. (eremos, solitary, and stachys, a spike, Gr. in reference to the species being inhabitants of desert places, and from the flowers growing in verticillate spikes.)* A genus of plants, consisting of herbs with yellow or purple flowers: Order, Lamiaceæ.

EREMURUS, *er-e-mu'rus, s. (eremos, solitary, and oura, a tail, Gr. from its inhabiting the desert, and its long yellow tail-like spikes.)* A genus of plants, natives of Siberia: Order, Liliaceæ.

EREMUS, *er'e-mus, s. (eremos, Gr.)* In Botany, a term applied by Mirabel to a pericarp which has neither valve nor suture, but proceeds from an ovary not supporting a style.

ERENOW, *ayr-now', ad.* Before this time.

EREOCNEMA, *er-e-ok-ne'ma, s. (erion, and knema, a shank, Gr.)* A genus of plants: Order, Melastomaceæ.

EREPTION, *e-rep'shun, s. (ereptio, Lat.)* A taking or snatching away by force.

ERESIS, *er'e-sis, s. (eresos, I row, Gr.)* A genus of spiders, belonging to the family Araneidae: Order, Pulmonarie.

ERETHISM, *er'e-thizm, s. (erethico, I excite, Gr.)* Constitutional irritation; a morbid state of energy in the performance of any function.

ERETHISTIC, *er-e-this'tik, a.* Relating to erethism.

ERETHIZON, *er-e-thi'zun, s. (erethico, I excite, Gr.)* The *Hystrix dorsata* of some authors, a subgenus of American porcupines, furnished with long hair, having the spines short and concealed, and a prehensile tail of moderate length: Order, Rodentia.

EREWHILE, *ayr'hwile, s. (ad. Sometime ago; before, Gr.)* Erewhiles, *ayr'hwilez,* fore a little while.—Obsolete.

I am as fair now as I was erewhile;  
Since night you lov'd me, yet since night you left me.  
—Shakspeare.

Armed uninvited guests, who erewhiles, we know, were wont to surprise us.—Keats of Italy.

ERGASTULUM, *er-gas'tu-lum, s. (Latin.)* A name given by the ancient Romans to a prison or house of correction, where slaves, on the authority of their masters, were confined and subjected to hard labour as a punishment for offensive conduct.

ERGAT—ERICALA.

**ERGAT**, er'gat, v. n. (*ergo*, Lat.) To infer; to draw conclusions.—Obsolete.

Little doth it concern us what the schoolmen *ergat* in their schools.—*Haag.*

**ERGO**, er'go, ad. (Latin.) Therefore; consequently.

**ERGOT**, er'got, s. (French.) In Agriculture, a disease of the rye, produced by the parasitical fungus *Acinula clava*, which is horn-like, cylindrical, powdery, purple-black outside, and white inside. In Medicine, it produces a stimulating effect on the uterus, on which account it is used in cases of difficult parturition. In Farriery, a stub, like a piece of soft horn, about the size of a chestnut, situated behind and below the pastern joint, and commonly hid under the tuft of the fetlock. In Anatomy, a medullary cavity in the lateral ventral of the brain, composed interiorly of cortical substance.

**ERGOTINE**, er'go-tine, s. A narcotic and poisonous substance, obtained as a brown powder, of a pungent and bitter taste, in the ergot of rye, *secula cornutum*.

**ERGOTISM**, er'go-tizm, s. (*ergo*, Lat.) A logical inference; a conclusion. In Pathology, the morbid affection produced on the human system by the ergot of rye, the chief symptoms of which are gangrene of the fingers and toes, sometimes of the hands and feet, and occasionally convulsions.

**ERIA**, e're-a, s. (*erion*, wool, Gr. on account of the downy nature of the flowers.) A genus of Epiphytous plants: Order, Orchidaceæ.

**ERIAH**, e're-ak, s. In the Irish Brehon Law, in a case of murder, the brehon or judge was wont to compound between the murderer and the friends of the deceased who prosecuted him, by causing the malefactor to give them, or the wife or child of the murdered person, a recompense, which was called an *eriah*.—*4 Bl. Com.* 313.

**ERICHNE**, er-e-ak'ne, s. (*erion*, and *achne*, a glume, Gr.) A genus of plants: Order, Gramineæ.

**ERIANThERA**, er-e-an-the'ra, s. (*erion*, and *anthera*, an anther, Gr. from its downy anthers.) A genus of plants: Order, Acanthaceæ.

**ERICA**, e-ri'ka, s. (*ereike*, from *eriko*, I break, Gr. from the supposed quality of some of the species in breaking the stone in the bladder, and because the small leaves are cleft.) Heath, a genus of plants, with scattered, verticillate, or racemose leaves, and terminal, fasciated, or racemose flowers; pedicels scaly;—natives of Europe and Africa: Type of the natural order Ericaceæ.

**ERICACEÆ**, er-i-ka'se-e, s. (*erica*, one of the genera.) The Heaths, or Heath-worts, a natural order of hypogynous Exogens, consisting of shrubs, or under shrubs, with evergreen leaves, which are rigid, entire, whorled, or opposite, and without stipules; the inflorescence variable, and often exceedingly beautiful; the pedicels generally bracteate; flowers hermaphrodite, asymmetrical, and regular; calyx four or five-cleft, nearly equal, inferior, and persistent; corolla hypogynous, monopetalous, four, rarely five-parted; stamens definite, and equal in number to the segments of the corolla, or double that number, hypogynous, or scarcely inserted into the base of the corolla; style and stigma undivided; capsule free, or adhering to the fleshy calyx, therefore baccate; cells for the most part many-seeded; albumen fleshy; embryo erect and slender.

**ERIOCHILUS**, e-ri-o-kil'us, *s.* (*erion*, and *cheilos*, a lip, Gr. from the labellum being pubescent.) A genus of plants: Order, Orchidaceæ.

**ERIOCHRYSA**, e-ri-ok're-sis, *s.* (*erion*, and *chryseos*, golden, Gr.) A genus of plants: Order, Gramineæ.

**ERIOCOCCUS**, e-ri-o-kok'kus, *s.* (*erion*, and *kokkos*, a kernel, Gr.) A genus of plants: Order, Euphorbiaceæ.

**ERIOLEKEDRON**, e-ri-o-den'dron, *s.* (*erion*, wool, and *dektron*, a tree, Gr. in allusion to the capsule being filled with a fine silken-woolly substance.) Wool-tree, a genus of plants, with palmate leaves, and red, scarlet, or white flowers rising singly or in clusters from the sides or tops of the branches.

**ERIOLEMA**, e-ri-o-des'me-a, *s.* (*erion*, and *desme*, a fascicle, Gr. from the flowers resembling a fascicle of wool.) A genus of plants, consisting of shrubs, natives of the Cape of Good Hope: Order, Ericaceæ.

**ERIODON**, e-ri'o-don, *s.* (*eri*, much, or great, and *odon*, a tooth, Gr.) A genus of spiders, belonging to the family Araneides: Order, Pulmonariæ.

**ERIOGLOSSUM**, e-ri-o-glos'sum, *s.* (*erion*, wool, and *glossa*, a tongue, Gr. in allusion to the scales of the petals being woolly.) A genus of plants, with pinnate leaves and edible fruit; natives of Java: Order, Sapindaceæ.

**ERIOGONUM**, e-ri-o-go'num, *s.* (*erion*, and *gone*, a knee, Gr. the stem of the plants being very woolly at the joints.) A genus of plants: Order, Polygonaceæ.

**ERIOLENA**, e-ri-o-le'na, *s.* (*erion*, wool, and *chlaina*, a clock, Gr. in reference to the woolly involucre and

calyx.) A genus of East Indian plants, consisting of trees with yellow flowers: Order, Byttneriaceæ.

**ERIMETER**, e-ri-o-m'e-tur, *s.* An optical instrument for measuring the diameters of minute particles and fibres, by ascertaining the diameter of any one of the series of rings which they produce.

**ERIOPE**, e-ri'o-pe, *s.* (probably from *erion*, and *ope*, a hole, Gr. because the throat of the calyx is closed with wool.) A genus of plants: Order, Lamiaceæ.

**ERIOPETALUM**, e-ri-o-pet'a-lum, *s.* (*erion*, and *petalon*, a petal, Gr. from the segments of the corolla being internally densely woolly.) A genus of plants: Order, Asclepiadaceæ.

**ERIOPHORUM**, e-ri-ofo-rum, *s.* (*erion*, and *phoro*, I bear, Gr. the seeds being covered with silky tufts of a wool-like substance.) A genus of plants: Order, Cyperaceæ.

**ERIOPHYLLUM**, e-ri-o-sil'lum, *s.* (*erion*, and *phyl-lon*, a leaf, Gr. from its woolly foliage.) A genus of Composite plants: Suborder, Tubulifloræ.

**ERIOPHYTON**, e-ri-o-si'ton, *s.* (*erion*, and *phyton*, a plant, Gr. in allusion to the plant being clothed with long white wool.) A genus of plants: Order, Lamiaceæ.

**ERIOPTERA**, e-ri-op'ter-a, *s.* (*erion*, and *pteron*, a wing, Gr.) A genus of Dipterous insects: Family, Nemocera.

**ERIOSICTHON**, e-ri-o-si'k'te-un, *s.* (*erion*, and *diktyon*, a net, Gr.) A genus of plants: Order, Hydrophyllaceæ.

**ERIOSEMA**, e-ri-o-se'ma, *s.* (*erion*, and *osma*, a standard, Gr. in reference to the vexillum, which is clothed with silky hairs.) A genus of Leguminous subshrubs, with trifoliate leaves and yellow flowers: Suborder, Papilionaceæ.

**ERIOSOLENA**, e-ri-o-so-le'na, *s.* (*erion*, and *solen*, a funnel or tube, Gr.) A genus of plants: Order, Thymelaceæ.

**ERIOSTEMON**, e-ri-o-ste'mon, *s.* (*erion*, and *stemon*, a stamen, Gr. the stamens being woolly.) A genus of plants, consisting of shrubs, natives of New Holland: Order, Rutaceæ.

**ERUBESCENT**, er-u-bes'sent, *a.* Red or reddish; blushing.

**ERUCA**, er-u'ka, *s.* (*uro*, I burn, Lat. in reference to the seeds having an acrid, burning taste, and when applied to the skin occasioning blisters.) A genus of Cruciferous plants, consisting of erect annual branching herbs, with racemes of white or yellow flowers, which are beautifully reticulated with brown veins: Suborder, Orthoplocceae. Also, a genus of univalve Mollusca, the shell of which resembles that of *Pupella*, only the tip of the spire is thicker, and there is only one or no plate upon the thinner lip: Subfamily, Achatinae.

# ERUCARIA—ERYNGIUM.

# ERYON—ERYTHRINUS.

**ERUCARIA**, er-u-ka're-a, *s.* (*eruca*, a rocket, Lat. from its resemblance to that plant.) A genus of Cruciferous plants, forming the type of the tribe *Erucarieæ*, in which the silique is lomentaceous, (i. e. falls asunder when ripe at the joints;) two-jointed; lower joint two-celled, upper one ensiform. The genus consists of smooth annual herbs, with white or purple flowers: Suborder, *Spirolobem*.

**ERUCIVORA**, e-ru-siv'o-ra, *s.* (*eruca*, a plant, and *cora*, I devour, Lat.) A genus of birds belonging to the *Ceblepyrina*, or Caterpillar-catchers: Family, *Laniidae*.

**ERUCT**, e-rukt', *v. a.* (*eructo*, Lat.) To **ERUCTATE**, e-rukt'ate, *v.* belch; to eject from the stomach, as wind.—Seldom used.

They would make us believe in *Syracusa*, now Messina, that *Ætna* in times past hath *eructed* such huge gobslets of fire, that the sparks of them have burnt houses in Malta, above fifty miles off.—*Hosell*.

**ERUCTION**, e-ruk-ta'shun, *s.* (*eructatio*, Lat.) The act of belching wind from the stomach; a belch; a violent bursting forth, or ejection of wind or other matter from the earth.

**ERUDITE**, er'u-dite, *a.* (*eruditus*, Lat.) Instructed; taught; learned.

**ERUDITION**, er-u-dish'un, *s.* Learning; knowledge gained by study, or from books and instruction; particularly, learning in literature, as distinct from the sciences.

**ERUGINOUS**, e-ru-je-nus, *a.* (*eruginosus*, Lat.) Partaking of the substance or nature of copper, or the rust of copper; resembling rust.

**ERUPT**, e-rupt', *v. n.* (*eruptus*, Lat.) To burst forth.—Obsolete.

**ERUPTION**, e-rupt'shun, *s.* (*eruptio*, Lat.) The act of breaking or bursting forth from enclosure or confinement; a violent emission of anything, particularly of flames and lava from a volcano; a sudden or violent rushing forth of men or troops for invasion; sudden excursion; violent exclamation.—(Seldom used in the last sense.)

It did not run out in voice or indecent *eruptions*, but filled the soul, as God the universe, silently and without noise.—*South*.

In Pathology, an acute cutaneous disease; a breaking out or efflorescence of the skin.

**ERUPTIVE**, e-rupt'iv, *a.* Bursting forth; attended with eruptions or efflorescence, or producing eruptions.

**ERYUM**, er'yum, *s.* (*erw*, tilled land, Celt. from some of the species being a pest in cultivated fields.) Lentil, a genus of Leguminous plants, the pea of which is in very general use on the Continent, and particularly by Roman Catholics in the time of Lent.

**ERYCINA**, er-e-si'na, *s.* (*Erycina*, one of the names of Venus) A genus of Mollusca, in which the shell is bivalve, always transverse, generally cuneate, but rarely equilateral; both valves closing; cardinal teeth 8, with the ligament between them; lateral teeth 8, one of which is lengthened: Family, *Tellinidae*. Also, a genus of Lepidopterous insects.

**ERYCINIDÆ**, er-e-sin'o-de, *s.* (*erycina*, one of the genera.) A family of beautiful, and in colouring exceedingly diversified, Lepidopterous insects, containing the genera *Erycina*, *Polyommatus*, and *Thecla*; the larva is short, broad, flattened, and naked.

**ERYNGIUM**, e-rin'je-um, *s.* (*erygo*, I belch, Gr.

from its being considered a remedy for flatulency.) *Eryngo*, a genus of Umbelliferous herbs, usually spiny, with the flowers congregated into oblong or roundish heads: Suborder, *Orthospermeæ*.

**ERYON**, e-ri'on, *s.* (*eryo*, I draw, Gr.) A genus of decapod Crustaceans: Family, *Macrousa*.

**ERYSINE**, er-e-si'ne, *s.* (the East Indian name of one of the species.) A genus of climbing shrubs, with alternate leaves, and terminal panicles of flowers: Order, *Cordiaceæ*.

**ERYSIMUM**, e-ris'e-mum, *s.* (*eryso*, I draw, Gr.; it is said to draw and produce blisters, and is reckoned a powerful cure for a sore throat.) A genus of Cruciferous plants: Suborder, *Notorhizeæ*.

**ERYSIPELAS**, er-e-sip'e-las, *s.* (Greek, from *eryo*, I draw, and *pelas*, adjoining, from its propensity to spread.) A disease which consists in a particular kind of inflammation, vulgarly termed *Rose*, from its redness; and *St. Anthony's Fire*, because he was supposed to heal it miraculously. It occurs chiefly in the skin, and is generally attended with vesications on the afflicted part, and with symptomatic fever. Its species are *E. phlegmonodes*, phlegmonous; *E. adenatodes*, edematose; *E. gangrene*, gangrenous; *E. erraticum*, wandering.

**ERYSIPELATOUS**, er-e-se-pel'a-tus, *a.* Eruptive; **ERYSIPELOUS**, er-e-sip'e-lus, *a.* resembling erysipelas, or partaking of its nature.

**ERYTHEMA**, er-e-the'ma, *s.* (*erythros*, red, Gr.) A morbid redness of the skin; an inflammatory blush; a full redness of the skin, terminating in scales, and sometimes in gangrene. Its species are *E. fugax*, fugaceous; *E. lare*, smooth; *E. marginatum*, margined; *E. papulatum*, papulated; *E. tuberculatum*, tuberculated; *E. nodosum*, nodose; *E. intertrigo*, fret or erosion of the skin.

**ERYTHRÆA**, er-e-thr'a, *s.* (*erythros*, red, Gr. in reference to the red-coloured flowers.) Centaury, a genus of small annual glabrous plants, with opposite leaves and funnel-shaped red or yellow flowers: Order, *Gentianaceæ*.

**ERYTHREUS**, e-ri-th're-us, *s.* (*erythræus*, reddish, Gr.) A genus of Arachnidea, belonging to the *Acarides* or *Mite* tribe: Family, *Holetro*.

**ERYTHRIC ACID**, e-ri-th'rik as'id, *s.* (*erythros*, red, Gr.) Red-coloured acid, obtained by the action of nitric upon uric acid.

**ERYTHRINA**, er-e-thri'na, *s.* (*erythros*, red, Gr. in allusion to the red colour of the flowers.) A genus of Leguminous plants, with red, scarlet, or crimson flowers: Suborder, *Papilionaceæ*.

**ERYTHRINUS**, er-e-thri'nus, *s.* A genus of fishes, with oblong bodies, covered with large and strong but deciduous scales; the mouth large, and the jaws armed with a row of formidable conic teeth. They inhabit the rivers of Central America. They are classed by Swainson among the *Cyprinæ*, or *Carpæ*: Family, *Salmonidae*.

**NOTE**.—The following Latinized adjectives occur in Natural History, having *erythros*, red, or some of its forms, thus compounded:—*Erythrismus*, red or nearly red; *erythrocerus*, having red seeds; *erythrocerus*, having red antennæ; *erythropectinus*, having antennæ pectinated and ferruginous in appearance; *erythroperus*, having a red abdomen; *erythrogrammus*, marked with red rays; *erythroleucus*, being red and white; *erythroleucus*, having a red crest or tuft; *erythromelus*, red and black; *erythromela*, having a red back; *erythrophthalmus*, having red eyes; *erythrophyllus*, having red leaves; *erythrotis*, having red wings; *erythropsus*, having a red snout; *erythrovampus*, having a red beak; *erythrorhynchus*, having a red snout; *erythrosomus*, having a red body; *erythrospemus*, having red seeds; *erythrostrisus*, having a red mouth; *erythrothorax*, having a red breast; *er*

**ESSENES**, } es-senz', *s.* A sect among the Jews  
**HESSENES**, } previous to, and during the life of Christ. They lived in communities, had all things in common, and ate at a common table; they were generally agriculturists, kept no slaves, and were abstemious, never taking food till after sunset; they abstained from wine, wore white garments, and generally led a life of celibacy; they sent offerings to the temple, but never offered sacrifices there. No one was admitted into the community without undergoing a probation of three years, and taking an oath to worship and serve God, to love

and speak the truth, and not to disclose the mysteries of the fraternity. They were rigid observers of the Sabbath; they believed in the immortality of the soul, but denied the resurrection of the body; they held the Scriptures in great veneration, but considered them as mystic writings which were to be explained metaphorically; they held the doctrine of the predestination of all events. There were two sects in Egypt, the practical Essenes, whose manner of life was the same as that of the Essenes of Palestine, and the contemplative Essenes, called the Therapeutæ, or Healers. It has been supposed that the early Christians derived many of their customs and maxims from this sect; and Mr. Taylor, the editor of Calmet's Dictionary of the Bible, gives many reasons for believing that John the Baptist belonged to it.

*(a. cath. Sax.)* Essay.—Obsolete.

*teel* is *etke* to beguile.—Chaucer.

*tel*, *a.* (Saxon.) Noble.—Obsolete.

*ther*, *s.* (*ether*, Gr.) In Chemistry, a volatile, fragrant, inflammable, and intoxicant, produced by distilling equal weights of acetic acid and alcohol. Formula,  $C^4, H_8, A=O$ ; syn. Sulphuric ether. The differs are—the acetic, oxalic, chloric, hydrochloric, hydrobromic, sulphuric, mercuric, carbonic, cyanic, benzoic, and fœlic.

*e-ther'e-al*, *a.* Formed of ether; con-

taining or filled with ether; heavenly; celestial; consisting of ether or spirit.

*ETHEREALIZE*, *e-the're-al-ize*, *v. a.* To convert into ether, or into a very subtle fluid.

*ETHEREOUS*, *e-the're-us*, *a.* Formed of ether; heavenly.

*ETHERIA*, *e-the're-a*, *s.* (*etheira*, hair, Gr.) A genus of River Oysters, the shell of which has two muscular impressions: Type of the family Etheridae.

*ETHERIDÆ*, *e-ther'e-de*, *s.* (*etheria*, one of the genera.) River Oysters, a family of Mollusca, in which the shell is irregular, inequivalve, and foliaceous; pearly within; the epidermis of an olive-green colour; and the ligament partly internal and partly external: Family, Ostracidae.

*ETHERIFORM*, *e-ther-e-fawrm*, *a.* Having the resemblance of ether.

*ETHERINE*, *e-the-rin*, *s.* In Chemistry, a peculiar carburetted hydrogen, supposed to consist of 4 equivalents of carbon, and 4 of hydrogen.

*ETHERIUM*, *e-the're-um*, *s.* In Chemistry, a theoretic carburetted hydrogen, consisting of 4 equivalents of carbon = 24; and 5 of hydrogen = 5.

*ETHERIZE*, *e-ther-ize*, *v. a.* To convert into ether.

*ETHEROLE*, *e-ther-ole*, *s.* (*ether*, *etion*, oil, Gr.) Light oil of wine, a colorless oily liquid which boils at  $586^{\circ}$ , becomes viscid at  $-13^{\circ}$ , and solid at  $-31^{\circ}$ . It is sparingly soluble in rectified spirits, but very soluble in absolute alcohol and ether. When etherole is left for a long time at low temperature it deposits crystals of etherine, which are brilliant, long, translucent, tasteless, friable prisms and plates: soluble in alcohol and ether, but not in water. *Ethero-sulphuric acid*, an acid prepared by passing the vapour of a hydrous sulphuric acid slowly into absolute alcohol kept cold. It consists of two equivalents of sulphuric acid = 80; one of etherine = 28; one of water = 9.

*ETHIC*, *eth'ik*, } *a.* (*ethicus*, Lat.) Relating to manners or morals; treating of morality; delivering precepts of morality.

*ETHICAL*, *eth'e-kal*, } *a.* (*ethicus*, Lat.) Relating to manners or morals; treating of morality; delivering precepts of morality.

*ETHICALLY*, *eth'e-kal-le*, *ad.* According to the doctrines of morality.

*ETHICS*, *eth'iks*, *s.* The doctrines of morality or social manners; the science of moral philosophy, which teaches men their duty and the reasons of it; a system of moral principles and rules for regulating the actions and manners of men in society.

*ETHIONIC ACID*, *e-the-on'ik as'sid*, *s.* When alcohol is decomposed by anhydrous sulphuric acid, and the compound formed is sulphate of etherole =  $4SO^3 + C^4, H_8$ , this compound can be produced by saturating anhydrous sulphuric acid with olifant gas. White fusible crystals are formed, which, when dissolved in cold water, combine with one atom of water, and form *ethionic acid*,  $4SO^3 + C^4, H_8O$ . By boiling this solution, the *ethionic acid* loses two atoms of sulphuric acid, and is converted into isethionic acid,  $2SO^3 + C^4, H_8O$ .

*ETHIOP*, *e-the-op*, } *a.* A native of Ethiopia.

*ETHIOPIAN*, *e-the-o-pe-an*, } *a.* A native of Ethiopia. *Ethiopian pepper*, the seeds of the plant *Unona Ethiopica*—termed also Negro or Guinea pepper. They have an aromatic and pungent taste, and were formerly, if they are not still, an article of commerce. *Ethiopian sour gourd*, the *Adansonia digitata*.—Which see.

*ETHIOPS*, *e-the-opa*, *s.* A name given formerly by the old chemists to denote certain dark-coloured

- ETHNOGRAPHICAL**, *eth-no-graf'e-kal*, } ing hea-
- then nations, or nations and tribes in general.
- ETHNOGRAPHY**, *eth-nog'gra-fe*, *s.* (*ethnos*, and *graphein*, I describe, Gr.) An account of heathen nations, or of nations in general.
- ETHNOLOGY**, *eth-nol'o-je*, *s.* (*ethnos*, and *logos*, a discourse, Gr.) A treatise on nations.
- ETHOLOGICAL**, *eth-o-lod'je-kal*, *a.* (*ethos*, morals, and *logos*, a discourse, Gr.) Treating of ethics or morality.
- ETHOLOGIST**, *ethol'o-jist*, *s.* One who writes on morality.
- ETHOLOGY**, *ethol'o-je*, *s.* (*ethos*, and *logos*, Gr.) A treatise on morality, or the science of ethics.
- ETHULE**, *e-thu'le*, *s.* (*aitheer*, ether, and *ule*, matter, Gr.) The hypothetical base, or radical of the ethers. It has not yet been obtained in a separate form. With oxygen, *ethule* forms ether, the oxide of *ethule*. Alcohol is the hydrate oxide of *ethule*. Formula C<sub>4</sub> H<sub>2</sub>. Symb. Ac.
- ETHULIA**, *e-thu'le-a*, *s.* (*ethus*, familiar, and *ule*, a shrub, Gr.?) A genus of Composite plants: Suborder, Tubuliflorae.
- ETHUSA**, *e-thu'za*, *s.* A genus of brachyurous Crustaceans, established at the expense of the genus *Dorippe*, by M. Roux.
- ETIOLOGATE**, *e-ti'o-late*, *v. n.* (*aithō*, I shine, Gr.) To become white or whiter; to be whitened by excluding the light of the sun;—*v. a.* to blanch; to whiten by excluding the sun's rays.
- ETIOLOGATION**, *e-ti-o-la'shun*, *s.* The operation of being whitened, or of becoming white; the process of whitening plants, by excluding the light of the sun.
- ETIOLOGICAL**, *e-te-o-lod'je-kal*, *a.* (*aitia*, cause, and *logos*, Gr.) Pertaining to etiology.
- ETIOLOGY**, *e-te-o-l'o-je*, *s.* (*aitia*, a cause, and *logos*, a discourse, Gr.) That branch of Pathology which treats of the causes of disease.
- ETIQUET**, } *et-e-ke't*, *s.* (*etiquette*, Fr.) Forms of
- ETIQUETTE**, } ceremony or decorum; the forms which are observed towards particular persons, or in particular places.
- ETHMOPTERUS**, *et-mop'ter-us*, *s.* (*etimos*, prompt, and *pteryx*, a fin, Gr.?) A genus of fishes of the Shark kind, with two round spiracles; the muzzle produced; dorsal fins two, and both armed with a spine in front; tail unequal and oblique; teeth small and acute: Family, Squalidae.

## ETNEAN—EUCHÆTIS.

- ETNEAN**, *et-ne'an*, *a.* (from *Ætna*.) Pertaining to Etna, a volcanic mountain in Sicily.
- ETRUSCAN**, *e-trus'kan*, *s.* A native of Etruria;—*a.* belonging to Etruria, the ancient name of a district in Italy.
- ETTIN**, *et'tin*, *s.* (derivation uncertain.) A giant.—Obsolete.
- They say the king of Portugal cannot sit at his meat but the giants and the *ettins* will come and snatch it from him.—*Beau & Flit.*
- ETTL**, *et'tl*, *v. n.* To intend.—A Scottish word.
- ETUI**, } *et'we*, *s.* (*etui*, a case, Fr.) A case for
- ETWEE**, } pocket instruments.
- ETYMOLOGER**.—See Etymologist.
- ETYMOLOGICAL**, *et-e-mo-lod'je-kal*, *a.* Pertaining to etymology, or the derivation of words; according to, or by means of, etymology.
- ETYMOLOGICALLY**, *et-e-mo-lod'je-kal-le*, *ad.* According to etymology.
- ETYMOLOGISE**, *et-o-mol'o-jize*, *v. n.* To search into the origin of words; to deduce words from their simple roots.
- ETYMOLOGIST**, *et-e-mol'o-jist*, *s.* One versed in etymology, or the deduction of words from their originals; one who searches into the origin of words.
- ETYMOLOGY**, *et-o-mol'o-je*, *s.* (*etymos*, true, and *logos*, a discourse, Gr.) That part of philology which explains the origin and derivation of words, with a view to ascertain their radical or primary signification. In Grammar, *etymology* comprehends the various inflections and modifications of *nouns*, and shows how they are formed from their simple roots; the analysis of compound words into their primitives.
- ETYMON**, *et'e-mon*, *s.* (Greek.) An original root, or primitive word.
- EU**. A Greek prefix attached to many words, particularly scientific terms, signifying well, good, or fine.

of Smaragd or Moh's Prismatic emerald.  
Its are silica, alumina, glucina, and  
iron and tin. The primitive form of  
is a rectangular prism, whose bases

**eu-keia, s.** (*eutkeia*, glory or beauty, Gr.  
the permanent beauty of the neat  
age.) A genus of plants, natives of  
Good Hope: Order, Ebenaceae.

**eu-kleid'e-um, s.** (*eu*, and *kleidoo*, I shut  
ference to the well-closed seed-pods.)  
Annual Cruciferous plants, with small  
flowers: Suborder, Pleurohizae.

**eu-ne-mis, s.** (*eu*, and *kneme*, a leg,  
tas of Coleopterous insects: Family,

**eu-mis, s.** (*eu*, and *kome*, hair or foliage,  
hat of the fine tuft of leaves by which  
are mounted.) A genus of handsome  
plants: Order, Liliaceae.

# EUCRASY—EUDORA.

**EUCRASY, u'kra-se, s.** (*eu*, and *kratze*, strong, Gr.)  
An agreeable temperament, or good condition of  
the body.

**EUCRATIA, u-kra'she-a, s.** (*eukrator*, firmly, Gr.) A  
genus of coralline Zoophytes, in which each ar-  
ticulation is composed of several cells arranged  
in a ring: Family, Cellularii.

**EUCROSTA, u-kro'zhe-a, s.** (*eu*, and *krossoe*, a fringe,  
Gr. in allusion to the beautiful fringe of the flower,  
formed by the cup of united stamens.) A genus  
of plants: Order, Liliaceae.

**EUCRYPHIA, u-kri'fo-a, s.** (*eu*, and *kryphia*, a cover,  
Gr. in allusion to the flowers being covered with a  
calyptra before expansion.) A genus of plants,  
natives of South America: Order, Hypericaceae.

**EUCTICAL, uk'te-kal, a.** Containing acts of thanks-  
giving.

**EUDEA, u'de-a, s.** (*eudon*, serene, Gr.) A genus of  
Zoophytes, consisting of sponges, forming a mass,  
filiform, attenuated, and subpedicellated at one  
end; the other enlarged, and rounded with a ter-  
minal pit; the surface reticulated by irregular  
lacunae, and minutely porous.

**EUEDEMIA, u-de'me-a, s.** (in honour of Eudemus of  
Rhodes, a pupil of Aristotle.) A genus of plants,  
consisting of small tufted perennial Cruciferous  
herbs, with blunt leaves and solitary white flowers:  
Suborder, Notorhizae.

**EUEDESMA, u-des'me-a, s.** (*eu*, and *desme*, a bundle,  
Gr. in reference to the stamens being connected  
into bundles.) A genus of New Holland shrubs,  
with broad lanceolate leaves, and umbels of white  
flowers: Order, Myrtaceae.

**EUDIALITE, u-di'a-lite, s.** (*eu*, well, and *dialyo*, I  
break in pieces, Gr.) A mineral which occurs  
both crystallized and massive. The crystals are  
generally small; the primary form is a rhomboid,  
the colour is red or brownish-red, and the crystals  
are faintly translucent or opaque; lustre vitreous,  
sometimes dull: sp. gr. 29; hardness, 5.0—5.5;  
streak white; fracture uneven. The massive varie-  
ties are imbedded and amorphous. It consists  
of silica, 52.47; zirconia, 10.89; lime, 10.14;  
soda, 13.93; oxide of iron, 5.85; oxide of man-  
ganese, 2.57; muriatic acid, 1.03; water, 1.80  
= 99.67.

**EUDIAPNEUSTIA, u-de-ap-nu'ste-a, s.** (*eu*, and *di-  
apneo*, I perspire, Gr.) In Physiology, a healthy  
state of perspiration.

**EUDIOMETER, u-de-om'e-tur, s.** (*eu*, *dios*, and *me-  
tron*, a measure, Gr.) An instrument for ascer-  
taining the purity of the air, or the quantity of  
oxygen it contains. It is of two forms. In one it  
consists merely of a graduated tube in which the  
air to be examined is placed, and a glass bottle  
(as in Dr. Hope's) attached to it. In Dr. Henry's,  
an Indian-rubber bottle is substituted for that of  
glass. The outer form of the instrument supposes  
that the gases are to be inflamed by the electric  
spark. They, therefore, are furnished with two  
wires nearly meeting each other within the tube.

**EUDIOMETRIC, u-de-o-met'rik, } a.** Pertain-  
**EUDIOMETRICAL, u-de-o-met'ro-kal, }** ing to a  
eudiometer; performed or ascertained by a eudio-  
meter.

**EUDIOMETRY, u-de-om'e-tre, s.** The act or practice  
of ascertaining the purity of the air by the eudio-  
meter.

**EUDORA, u-do'ra, s.** (*eu*, and *dora*, a gift, Gr.?) A  
genus of Acalephans: Order, Simplicia.

# EUDOXIA—EULIMA.

**EUDOXIA**, u-dok'se-a, *s.* (*eu*, and *doxa*, glory, Gr. in reference to the beauty of the species.) A genus of plants, consisting of perennial erect herbs, with large drooping snowy flowers, disposed in terminal thyrsoid panicles: Order, Gentianaceae.

**EUDYNAMIS**, u-din'a-mis, *s.* (*eu*, and *dynamis*, power, Gr.) A genus of birds, belonging to the Cuculinae, or parasitic cuckoos. The bill and feet are remarkably strong—hence the name: Family, Cuculidae.

**EUCK**, u'je, *s.* Applause.—Obsolete.

His actions being such as his best and purest reason approves, have the cheerful eyes and applauses of his conscience.—*Scott*.

**EUGENIA**, u-je'ne-a, *s.* (in honour of Prince Eugene of Saxony.) A genus of plants, consisting of trees or shrubs, natives of the West Indies and South America. *E. caryophyllus* produces a kind of cloves: Order, Myrtaceae.

**EUGENIACRINITES**, u-je-ne-a-kre-ni'tes, *s.* (*eugenia*, and *criniton*, a lily, Gr.) A genus of fossil Crinoidens, the clove-like lily-shaped animals of Miller.

**EUGENIN**, u'je-nin, *s.* A substance obtained in small laminar crystals from the distilled water of cloves. They are colourless, transparent, and pearly.

**EUGENT**, u-je-ne, *s.* (*eu*, and *genos*, family, Gr.) Nobleness of birth.

**EUGH**, u, *s.* A tree.—Obsolete.—See *Yew*.

At the first stretch of both his hands he drew,  
And almost join'd the horns of the tough *cuph*.—*Dryden*.

**EUGLOSSA**, u-glos'sa, *s.* (*eu*, and *glossa*, a tongue, Gr.) A genus of the Apidae, or Bees, of which it is uncertain whether they are social, and if their communities consist of three kinds of individuals or not: Family, Scopolipedes.

**EUGNATHUS**, u-na'thus, *s.* (*eu*, and *gnathos*, a jaw, Gr.) A genus of fossil Placoid fishes, from the Lias formation.

**EUHARMONIC**, u-hdr-mon'ik, *a.* (*eu*, well, Gr. and *harmonic*.) Producing harmony or concordant sounds.

**EUKAIRITE**, u-ka'rite, *s.* (*eukairios*, opportune, Gr. in allusion to its discovery just as Berzelius had completed his examination of selenium.) A cupreous seleniuret of silver, consisting of silver, 38.93; selenium, 26; copper, 23.05; earthy matter, 8.90; carbonic acid and loss, 3.12. It is of a shining lead-grey colour, with a granular texture; occurs massive, and disposed in thin superficial, black, metallic fibres. It is extremely rare.

**EULABES**, u-la'bes, *s.* (*eulabes*, timid, Gr.) A genus of Passerine birds, belonging to the family of thrushes, and distinguished by having broad stripes of naked skin on each side of the occiput, and a bald spot on the cheek; the bill nearly resembles that of a thrush; their nostrils are round and smooth.

**EULAIMA**, u-la'ma, *s.* (*eu*, and *laima*, greediness, Gr.) A genus of social bees, allied to *Bombus*: Family, Scopolipedes.

**EULALIA**, u-la'le-a, *s.* (*eula*, a worm, and *ala*, the sea, Gr.) A genus established by Savigny, and placed by Cuvier among his Dorsibranchiate Annelides.

**EULIMA**, u'li'ma, *s.* (*eu*, and *limos*, hunger, Gr.) A genus of marine Mollusca, allied to *Turritella*;

# EULIMENE—EUNETUS.

the shell is smooth and polished, the spire distorted and acute, and the outer lip dilated in the middle: Family, Turridae.

**EULIMENE**, u-lim'e-ne, *s.* A name given by Cuvier to a genus of Crustaceans, the body of which is almost linear; they are furnished with four uniform antennae, two of which are smaller than the others, and placed on the anterior extremity of the head: Order, Branchiopoda.

**EULOGIC**, u-lod'jik, } *a.* (*eu*, and *logos*, dis-  
**EULOGICAL**, u-lod'je-kal, } course, Gr.) Contain-  
ing praise; commendatory.

**EULOGICALLY**, u-lod'je-kal-le, *adv.* In a manner which conveys encomium or praise.

**EULOGIST**, u'lo-jist, *a.* One who praises and commends another.

drawing off a portion of a fluid in steam, that the  
residue may be of a greater consistence, or more  
concentrated.

**EVAPORIMETER**, e-vap-o-rom'e-tor, *s.* (*evaporare*,  
and *metrum*, a measure, Gr.) An instrument  
for ascertaining the quantity of a fluid evaporated in  
a given time.

**EVASION**, e-vā'zhun, *s.* (*evasio*, Lat.) The act of  
escaping, or of avoiding, or of escaping, particularly  
the pressure of an argument, from an accu-  
sation or charge, from an interrogatory and the  
excuse; subterfuge; equivocation; artifice;  
shift. In Law, a subtle endeavour to  
elude the truth, or to escape the punishment of  
a crime, which will not be endured. Thus, if a  
man says to another that he will not strike him,  
and then gives him a pot of ale to strike first, and  
then he strikes: the returning of it is pun-  
ishment; and if the person be killed, it is murder.

**EVASIVE**, e-vā'siv, *a.* Using evasion or artifice to  
elude; shuffling; equivocating; contain-  
ment; artfully contrived to elude a question,
